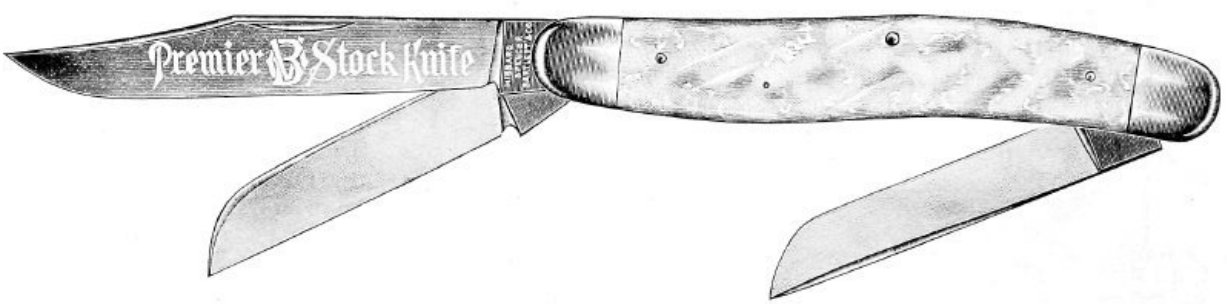
CUTLERY,

STERLING AND SILVER PLATED WARES, CLOCKS, WATCHES AND CUT GLASS WARE



Our stock embraces about three thousand styles of pocket knives, and a corresponding assortment of tables, shears, scissors, razors, etc. We illustrate our leading patterns only. Our warranted cutlery is excellent in quality. It is made by the most experienced American workmen, is highly finished, and put up in attractive style. The prices are low. Goods of our own brand are fully warranted.

Our specialty is a line of high grade cutlery etched in our trade mark—"Our Very Best."

We guarantee every article in this line to be unexcelled in quality, variety of patterns, or finish.

HIBBARD, SPENCER, BARTLETT & CO.

CHICAGO

ETCHING CUTLERY.

ETCHING DEPARTMENT.

The very best way of increasing trade in pocket cutlery is through the dealer's advertisement on the large blade of his best knives. If this is done wisely, it establishes a reputation for all knives bearing the dealer's name, adding his reputation to that of the maker, and thus is a convincing argument to the quality of the article. The consumer is sure of a double guaranty, and if the brand is unknown, he at least knows that the dealer would not have his name on inferior goods. It is also a strong safeguard against theft. Several times every year we hear of stolen goods recovered which had been etched by us, the name on the blade identifying the knives and establishing evidence to convict the thieves. Numbers of our customers have informed us that they had been robbed, the thieves leaving the etched knives untouched.

Our etching department, beginning in 1896 in a very modest way, has grown to an important adjunct to our cutlery business. Our etchers have become artists in their work, having every appliance necessary or desirable to produce fine results.

Etching has become popular, and the public is quick to notice the enterprise of a dealer who has something new to offer.

We make no charge whatever for this work, feeling that we are amply repaid by the increased business the dealer is sure to give us in consequence of adding to the selling quality of his knives. Our only requirements are that a sufficient (not a large) quantity is ordered each time to warrant it, and that the goods are such that we as a firm would care to affix our guaranty.

We shall be glad to explain more fully through our representatives or by letter our position in this matter and show samples of the work.

Cotton Samplers.

We do not carry pocket knife blades in stock. The illustrations shown on this page being reproductions of the different styles used in OVB pocket knives. Slight variations are made to adapt them to the different knives to which they form a part. All are made from Wardlow's Celebrated English crucible steel. **Each blade is forged in the most approved manner** by expert workmen. Great care is taken to avoid overheating the metal, the forging being done at a very low heat, thereby condensing the metal and making it extremely tough. The tempering is done by a process which insures uniform hardness through the metal. All blades bearing the OVB trademark are carefully ground, finished and crocus polished on both sides. The shank is carefully shaped and finished. Every blade is inspected, whetted to a fine cutting edge and warranted to be free from flaw and neither too hard or too soft.

In material, workmanship and design, the OVB pocket knife blades are equal, if not superior to any made in this or any other country. They are and always have been the product of one factory which has in its employ, men who have served thirty, forty and fifty years in their service.

POCKET KNIVES.

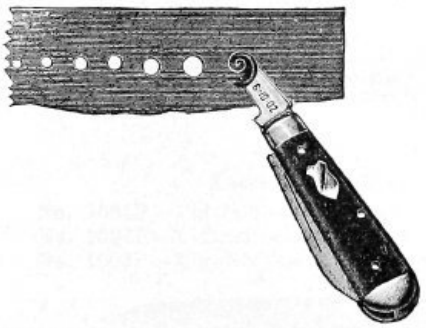
H. S. B. & CO.'S, WITH HARRISON PATENT PUNCH BLADES.



Showing work done by Harrison Patent Punch Blade.

All the pocket knives on this page are supplied with a Harrison patent punch blade as illustrated above. It is the only knife ever made that will cut perfectly round and smooth holes in leather. Will cut holes of any size up to 1/2 inch in diameter, and can be used to enlarge holes already made. Much more convenient to use than a punch, being always at hand, and making just the right size hole wanted every time.

Invaluable for Belting, Etc. An invaluable tool for repairing belting, for mending harness or making buckle holes. The curving upper face of the punch extending slightly over the end of the knife, making it easy to open, even if the user has on gloves. It is very strong, and will hold its sharp-cutting edge a long time without re-sharpening. This is the only punch manufactured that will cut a perfectly round, smooth hole of any desired size without damaging the leather.

The Very Best Quality. Both the patented punch blade, and the other blades are hand forged from the finest grade of crucible steel, highly tempered and warranted free from flaws. These knives are positively without equal for practicability.

No. 1311P—Length 3 1/2 in., 2 blades, stag, iron lined, large blade crocus polished, with Harrison belt punch, per dozen $8.00

HALF DOZEN IN A BOX.

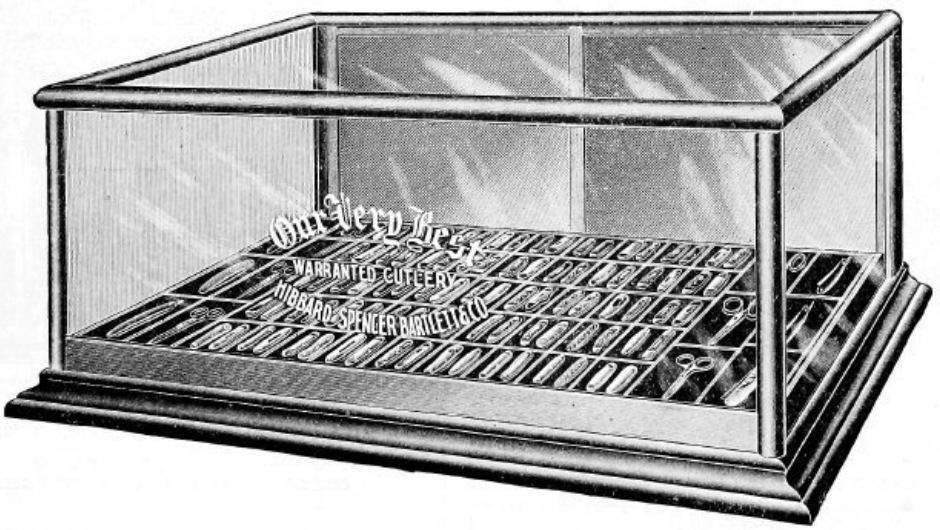
O. V. B. IMPROVED CUTLERY SHOW CASES.

These cases are a great improvement over any cutlery show case ever made, and are both handsome and convenient. The case has a 2½ in. green silk plush covered base running around the inside at bottom, and each case is furnished with individual silk plush top boxes for pocket knives, razors and shears, as specified below. These boxes are made to hold one dozen of each article, with a handsome plush top on which to exhibit the samples. The case is of best material and workmanship, lettered as per illustration. The sliding mirror doors do away with the drawer and swinging doors as used in the old style cases, which proved very inconvenient, especially where the space behind the counter was limited. The price of the show case is not figured or added to cost of goods at all. We place the best price on our cutlery at which we can sell these goods separately, and the case we furnish with the idea of giving our customers a case which will prove a useful ornament to their stores and valuable in assisting them in selling goods and keeping the stock in good order and complete.

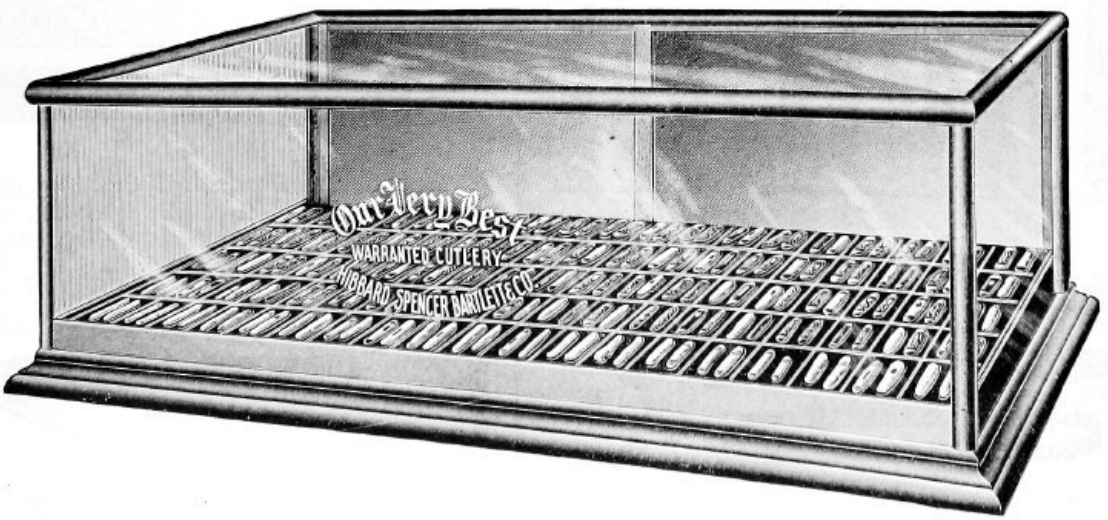


No. 0301—Oak, combination case, 40½ in. long, 27¾ in. wide, 17 in. high, contains boxes for 45 patterns of pocket knives, 6 patterns of scissors and shears and 6 patterns of razors, finished in oak with inside silk plush trimmings, weight crated 110 lbs.

No. 301—Cherry finish, otherwise same as No. 0301.

No. 0351—Oak, medium pocket knife case, 40½ in. long, 27¾ in. wide, 17 in. high, contains boxes for 65 patterns of pocket knives, finished in oak with inside silk plush trimmings, weight crated 110 lbs.

No. 351—Cherry finish, otherwise same as No. 0351.



No. 0401—Oak, large pocket knife case, 54 in. long, 27¾ in. wide, 17 in. high, contains boxes for 95 patterns of pocket knives, finished in oak with inside silk plush trimmings, weight crated 130 lbs.

No. 401—Cherry finish, otherwise same as No. 0401.

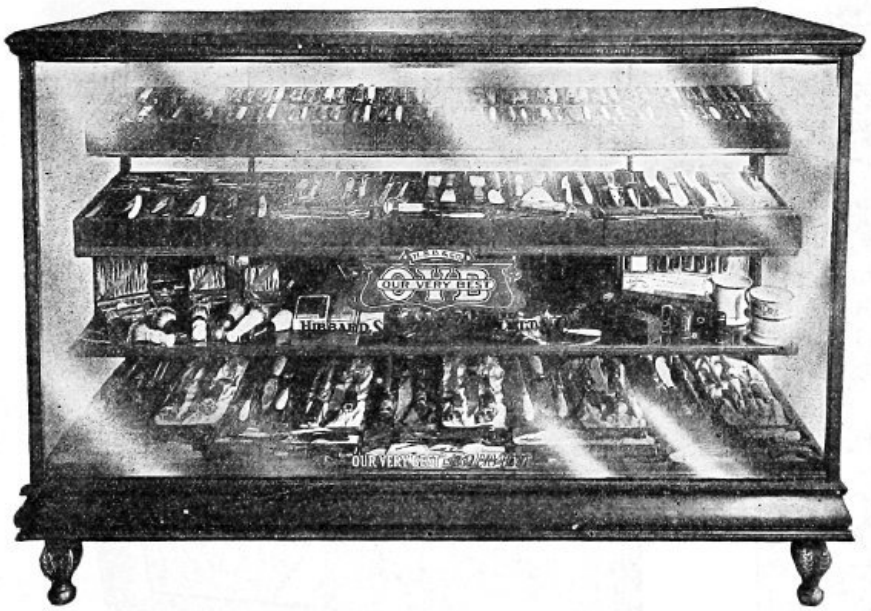
A FULL COMPLEMENT OF SILK PLUSH TOP CUTLERY BOXES GOES WITH EACH CASE GRATIS.



Our No. 900 OVB show cases are made of selected white oak thoroughly HAND MADE and of natural oak finish, highly polished, the top is ½ in. bevel French plate glass laid in flush on green felt cushions, selected double strength glass front and ends and glass sliding dust proof doors in the back that move on ball bearings and steel track.

The inside has 10 in., 14 in. and 16 in. paneled oak shelves the front edges of which are fitted with an oak lip extending ¼ in. above the shelf proper to prevent the goods from being pushed off the shelves, these shelves are supported by adjustable nickel plated brackets, cloth lined paneled bottom.

One of the latest improvements in these cases are the STEEL STRENGTH MITRED JOINTS, which means that the mitred joints in our cases are reinforced with steel, making the weakest part the strongest; this is a most IMPORTANT POINT TO BE CONSIDERED.

Made either knockdown or set up and of standard measurements 42 in. high, and 26 in. wide outside dimensions.

ONE IN A BOX.

OVB TABLE KNIVES AND FORKS.

A careful examination of these goods will prove they have no equal.

OVB Handles.—They are made from first grade, high-priced materials—not cheap imitation wood manipulated to appear like the real article. Black handles are genuine imported ebony; red handles are finest Panama cocobolo; white handles are extra quality hard bone. As a consequence they hold their finish and their attractive, wholesome appearance, instead of becoming discolored and soaked with grease after being used a short time.

The handles are long and more symmetrical than other makes; they are more dainty in appearance, fit the hand better and "hang" as perfectly as highest grade goods should, instead of having a clumsy ill-balanced feeling. The forks are models for shape of bend, workmanship and finish, and their temper is unequalled, as can be shown by jamming the fork tines into wood and twisting them.

OVB Bolster.—The metal used in the bolsters is high grade, absolutely without adulteration by lead or spelter; consequently it holds its original finish and does not become dull and cheapen the appearance of the goods. All metal designs are anchored through the handle; warping and consequent cracking of handles is impossible. The metal work fits the handle with absolute accuracy; there are no cracks or open joints of any kind where dirt or grease can work in and spoil the appearance.

ONE SET IN A BOX. FOUR SETS IN A CARTON.

SOLID HANDLE.

Showing Construction.

The method of securing the blade to the handle, as shown in the above illustration, marks the greatest improvement in solid handle table cutlery. After many years of failure, an absolute tight, everlasting joint has been secured. It is not affected by hot water; does not loosen a particle or crack the wood, and makes a well finished and handsome appearance.

5⅜ Inch Straight Blade.

No. 115—Medium knives and forks, cocobolo solid handle, 4 tine fork, nickel silver ferrule .....per dozen sets $33.15

HALF DOZEN IN A BOX.

No. 9—8½ in. forged steel swaged blade, patent cutting edge, enameled handle, nickel plated cap ferrule..... per dozen $3.00

The blade is forged and not blanked from sheet steel. It is tapered from back to edge and beautifully ground. The cutting edge is the same on either side, and very sharp. This knife will cut hot or cold bread or cake equally well, and cake frosting is not cracked or broken. It makes a perfectly smooth and clean cut. It can be sharpened in the same manner as a common knife.

ONE IN A BOX.

No. 305—Combination bread sets, consisting of one each, bread, cake and paring knife, with black enameled solid hardwood handle, and nickel plated ferrule..... per dozen sets $2.55

FRUIT AND VEGETABLE EYERS.

No. 3—PEERLESS, length 6 in., beech handle, nickel plated steel scoop or spoon with sharp edges, nickel plated ferrule .....per dozen $1.70

Never has anything been made that compares with this for preparing pineapples. Just the thing for preparing apples for baking, as it removes the core without making hole through apple. Has no equal for removing eyes and bad spots from potatoes, with the least possible loss. Also removes cores from pears when cut in half for canning.

ONE DOZEN ON A NEAT DISPLAY STAND.

Extra Blades for above, 5/8, 3/4 or 7/8 in., per dozen..... 3.75

HALF DOZEN IN A BOX.

KNIFE SHARPENERS.

A Combined Sharpener and Knife Rest for Table and Kitchen Use.

No. 6—ELYRIA, nickel plated steel frame, 2 tool steel tempered serrated rollers, length 4 in.....per dozen $4.00

This is an improvement in steel sharpening devices, in that there are seventeen instead of two cutting edges; the result being very rapid work without stripping the edge of the knife to a perceptible degree. It will put a fine cutting edge on a knife by simply drawing the blade across the rollers two or three times. It is particularly adapted for kitchen and table knives.

ONE DOZEN IN A BOX.

FARRIERS' KNIVES.

No. 52—HELLER'S, adjustable iron handle, blade assorted widths 1/2, 5/8, 3/4 and 7/8 in.....per dozen $3.75

HALF DOZEN IN A BOX.

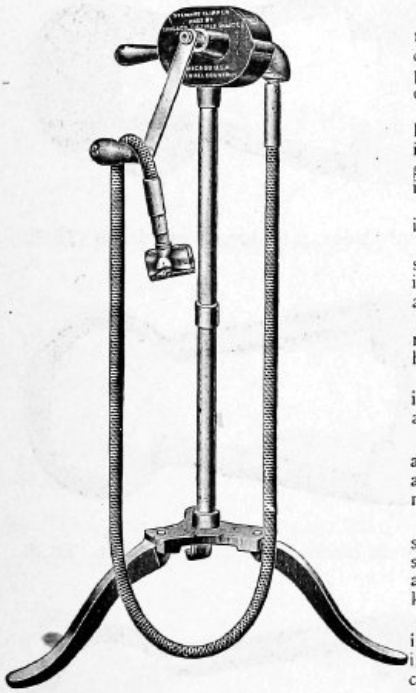
STEWART'S CLIPPING AND SHEARING MACHINES.

CLIPPING MACHINES.



Without exception, the most perfect clipping machine ever made. It runs practically without friction or wear.

A slow turning of the handle is transformed, by the ingenious mechanism of the gears, to a tremendous speed in the knife.

It turns so easily that it is mere play to run it.

The entire machine is sturdy, compact and perfect in every detail of material and workmanship.

The price puts it within reach of every farmer and horse owner.

The gearing is all enclosed in a dust and dirt proof case and runs in oil constantly.

It has a solid tripod base, a strong upright and its gears are all cut from solid steel made file hard.

It has six feet of our latest style, easy running flexible shaft, and the famous Stewart one nut tension clipping knife—highest grade.

The machine is compact in form and can be packed in a very small space, or even carried in a satchel.

No. 1—Ball bearing, complete with six feet of flexible shaft and one clipping knife, shipping w't 36 lbs.....each $ 7.50

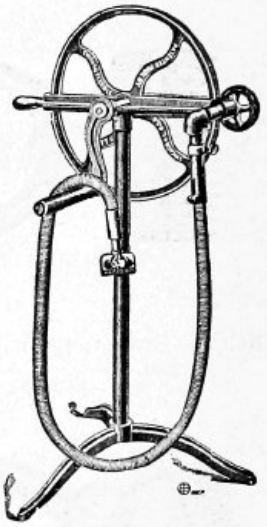
Sheep Shearing Attachment, for No. 1 horse clipping machine complete with solid core shaft and the celebrated No. 5 Stewart shear with 4 sets of knives (same shear as furnished with No. 8 and New Model sheep shearing machines), only a few minutes time required to take off horse clipping shaft and attach sheep shearing shaft, shipping w't 20 lbs.....each $7.75

Combination Horse Clipping and Sheep Shearing Machine, consisting of No. 1 Stewart horse clipping machine with sheep shearing attachment, shipping w't 52 lbs.....each $15.25

Every horse worth keeping is worth clipping. This should be done at the proper season. A clipped horse looks better, feels better and works better. He dries out quickly after the day's work, rests well and his food does him good. He is more easily kept clean and increases in commercial value.

CLIPPING MACHINES.

A big, strong machine and a special favorite with liverymen, blacksmiths, and all who have much clipping to do. 18 in. large gear, is carefully machined all over, the teeth are cut from solid metal and engage with perfect precision in the teeth of the hardened steel pinion; wearing parts are all hardened tool steel, shaft revolves with great speed and completely equalizes the motion. Easily turned with either hand. Light running and noiseless, will clip a horse in 30 minutes. Rigid tripod base and strong tubular upright. Equipped with 6½ ft. highest grade flexible shaft and Stewart one nut balance pressure knife. The knives can be resharpened many times and made equal to new by using the Automatic grinder.



No. 1902—Weight 56 lbs., boxed 75 lbs.....each $10.75

Every sheep owner should shear with a machine. It takes off the wool evenly, leaving no wasted stubble and the wool full length therefore of highest value. The sheep look smooth and are not cut and hacked. The wool grows evenly and next season presents a level top. The machine shears faster and more economically than the hand shear. The extra wool gained on a few sheep pays for a machine.

ENCLOSED GEAR SHEEP SHEARING MACHINES.

Fitted upon a strong firm tripod and requires no bracket or post to attach it to, is ready to use anywhere, any time. The gears are cut from solid hard tough steel, and are enclosed in a dustproof metal case where they run constantly in oil with the least possible friction and wear. A slow easy turn of the knife is transformed, by an ingenious gear arrangement, to a smooth rapid cutting motion of the knife. Fitted with a solid core shaft with universal joints, permitting it to be turned in any direction. Each machine is furnished with the No. 5 Stewart shear and 4 sets of knives. The shear is of simple adjustment and of equal tension throughout. It is perfectly balanced, will shear all grades of wool.

No. 8—Weight boxed 45 lbs.....each $9.75

Horse Clipping Attachment, for Stewart sheep shearing machines, complete with 6½ ft. latest improved flexible shaft eye spindle and Stewart one nut tension clipper knife and handle, only a few minutes time required to take off sheep shearing shaft and attach the horse clipping shaft, w't 6 lbs.....each 5.50

CLIPPING AND SHEARING MACHINES AND PARTS.

NEW MODEL SHEEP SHEARING MACHINES.

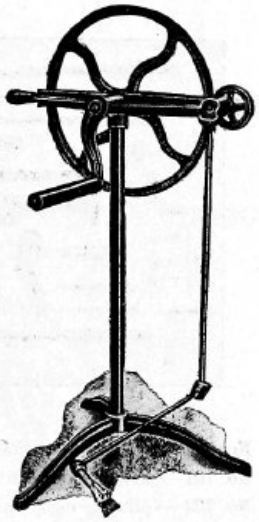
This machine is a marvel of simplicity and strength. It turns easily and cuts fast, saves wool, time and labor and saves the sheep. 18 in. large gear, carefully turned and milled, enclosed in a stationary frame and drives a steel cut pinion to which a solid core jointed shaft is attached. The shaft has universal joints permitting it to be turned in any direction. A small turned balance wheel fitted to the pinion shaft runs at a high speed and steadies the motion of the machine at all times. All parts are interchangeable. Each machine is fitted with the improved No. 5 Stewart shear and 4 sets of knives.

New Model, weight boxed 56 lbs. ..... each $12.75

The knives can be resharpened many times and made equal to new by using the automatic grinder shown on page 1698B.

No. 06—Combination horse clipping and sheep shearing machine, consisting of new model driving gear mounted on tripod standard, solid core shaft with No. 5 Stewart shear and 4 sets of combs and cutters (same as furnished with new model sheep shearing machine) also 6½ ft. latest improved flexible shaft for horse clipping with Stewart one nut tension horse clipping knife and handle, w't boxed 80 lbs., complete ..... each $18.25

SHEEP SHEARING MACHINES.



No. 6—Set upon rigid tripod standard and strong tubular upright, otherwise same as New Model sheep shearing machine as described above, w't boxed 75 lbs., each $15.00

The knives can be resharpened many times and made equal to new by using the automatic grinder shown on page 1698B.

THE IMPROVED STEWART No. 11 GRINDERS.

For use on the No. 1 horse clipping machine and on the No. 8 sheep shearing machine. Constructed of metal throughout, may be attached to the machine in place of the shaft by means of an ingenious mechanism. This attachment makes it possible to put a perfect edge on the knives of No. 1 horse clipper or No. 8 sheep shearer in a few seconds time obviating the time and expense incurred in sending them away to be sharpened.

No. 11—Grinder attachment complete, w't boxed 8 lbs. ..... each $3.50

PARTS FOR STEWART No. 5 SHEAR.

This shear has been supplied on all machines sent out since January 1, 1908, unless otherwise ordered. During the first season it was called the No. 8 shear.

The Stewart No. 5 shear is perfect in construction and operations, at every point where friction could occur the parts are hardened file hard by a scientific process in especially built gas hardening furnaces. All parts fit so perfectly that all wear incident to play is entirely eliminated. This shear will do more and better work and last longer than any other.

ONE IN A BOX.

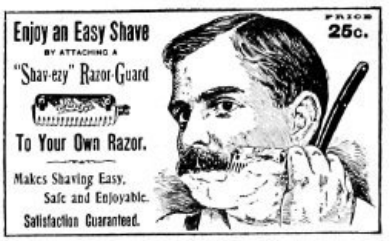
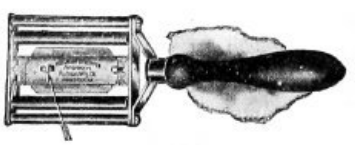
SAFETY RAZOR GUARDS.



No. 5—SHAV-EZY, brass, nickel plated, can be adjusted to fit any razor..per dozen $3.00

ONE DOZEN IN AN EASEL DISPLAY CARTON.

SAFETY RAZOR STROPPERS.

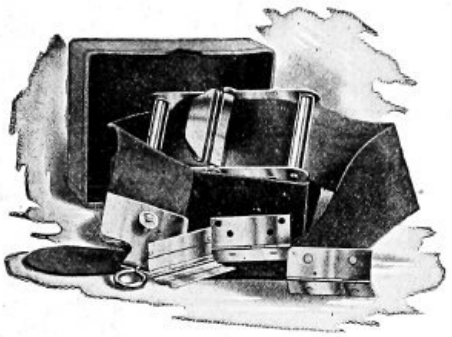


Pullman Automatic, self-adjusting, nickel plated metal frame, black rubberoid handle,.....per dozen $12.00

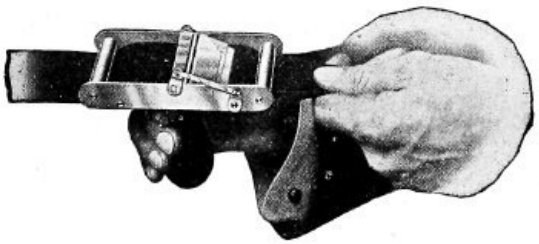
The rollers on each side insure perfect stropping and a keen edge, even in the hands of a beginner. Cannot be used the wrong way. Both edges of blade may be sharpened complete without removing blade from stropper.

Positively will not cut the strop. The same bevel or angle is obtained regardless of the pressure on the strop.

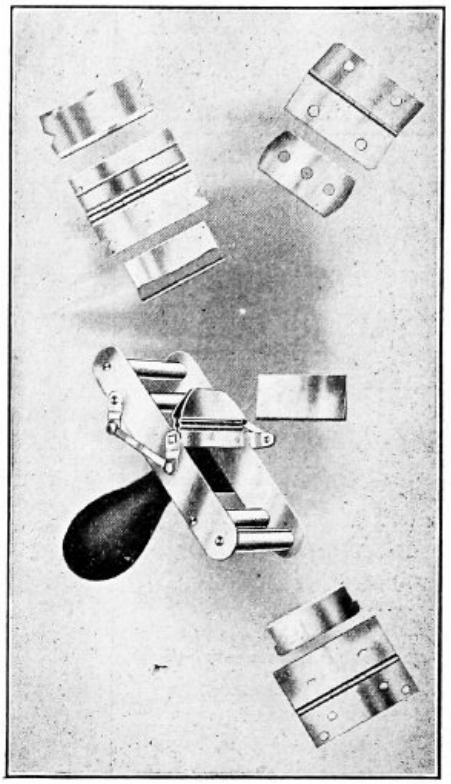
RUNDEL AUTOMATIC STROPPERS.



Showing Box and Stropper.



The Stropper in Use.



Showing Holders to fit any Safety Razor Blade.

For All Kinds of Safety Razor Blades.

Description—Will put a smooth, keen edge on any safety razor blade in five seconds. Besides, all this is accomplished automatically. All that is necessary to do is to move the stropper up and down the strop. The proper position or angle of the blade on the strop has been scientifically determined, and is always controlled perfectly by the simple mechanism within the stropper itself. When motion of stropper is reversed, blade instantly turns over—simply can't do otherwise. All possibility of blade running off or cutting the strop is eliminated.

Principle—As shown in above illustration, the principle of the Rundel Automatic Safety Razor Stropper is extremely simple. It consists of a frame with a pair of rollers at either end and an oscillating blade holder in the middle, joined with one inside roller by small cranks and connecting rods. The slightest movement of the roller is instantly and positively communicated to the movable blade holder. When the motion of the stropper is reversed, the blade, therefore, instantly swings over to present the other side to the strop. The friction on the inside roller presses the blade against the strop with a strong, even tension, which can be regulated at will by the pull of the hand which holds the end of the strop.

Blade Holders—Illustration also shows the three blade holders, with a few of the leading styles of blades they accommodate. These blade holders are adapted to any safety razor blade. If any particular style of blade is not shown, use the blade holder which is shown with a similar style to the one you have. Note that the heavy back, single edge style blade requires no holder but slips directly into the stropper.

Complete Outfit—Consists of a Rundel Automatic safety razor stropper, strongly built of brass and steel, nicely nickel plated, and with a rubberoid finish handle; three blade holders; one of which is adapted to any style safety razor blade and a 24-inch, finest quality horsehide strop, regularly sold at retail for $1.00. All is enclosed in a handsome case.

Rundel Automatic—Nickel plated steel frame, fine horsehide razor strop, ebonized wood handle, 3 blade holders for any style safety razor blades, weight 1 lb.....per dozen $36.00

ONE IN A LEATHERETTE COVERED BOX.

POCKET EDITION GILLETTE SAFETY RAZORS.

The "Pocket Edition" Gillette Safety Razors are without doubt the most beautiful line of razor sets that have ever been placed before the public. The cases and razors are plated and are made in triple silver plate, 14 karat gold and gun metal finish and are 4×2×⅝ in. in size.

GILLETTE SAFETY RAZORS.

The Gillette has twelve keen double-edged blades as thin as paper, tempered and glass-hardened by a process so that it takes diamond dust to grind them. Each blade gives ten to thirty perfect shaves. Cannot fail to give a smooth, delightful shave. A Gillette lasts for years. When you have used each of the edges until dull, new blades can be had at nominal cost.

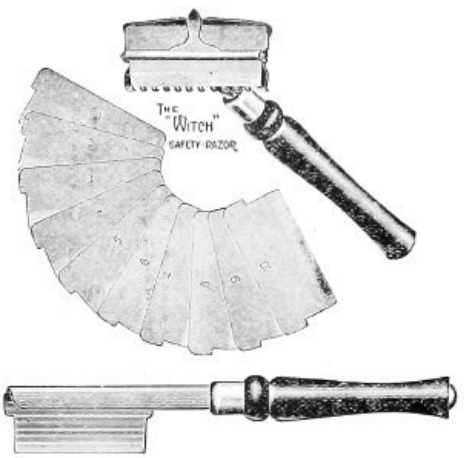
Extra Blades—In packages of 12, per dozen packages..... 9.00

This is a compact handy safety razor. Can be easily and conveniently carried in the pocket, occupying no more space than the ordinary fountain pen, and is a first-class shaver. The blades are a thin wafer steel, similar to the Gillette.

No. 512—GOLD MEDAL, ⅝ in. blade, extra hollow Hamburg ground, rubber handle.....per dozen $30.00
Guard can be changed in an instant, making razor left or right hand.



No. 5—WITCH, nickel plated holder, 10 blades (ready for use) and a nickel plated blade holder to use in stropping, packed in purple lined leatherette case.....per dozen $12.00
Extra Blades—In packages of 10, per dozen packages..... 6.00

This razor is most simple in construction, having only two parts, and anyone can instantly understand it. It is impossible to impair the edge of the blades by removing or inserting them, as is the case with other razors. The blades are tempered by a secret process. They are made from the best English razor steel and are tested three times before they are finished. In addition they are honed and stropped by hand.

SAFETY RAZOR STROPPERS.

No. 6—"One-piece," nickel plated steel, for all safety razor blades....per dozen $3.00
This stropper grips the blades firmly and holds them at the correct angle for stropping. Stropped blades have a keener edge and will prove more satisfactory than the unstropped.

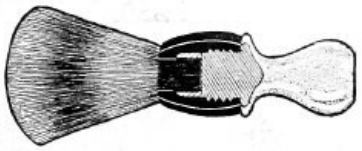
RUBBERSET LATHER BRUSHES.



Sectional view of a "Rubberset" Lather Brush, showing why the bristles wont come out.

The butt-end of the bristles are first embedded in a solid head of soft rubber. This head is then bound with a strong metal belt and then placed in a die and vulcanized (hardened) under heat and pressure. The result is a solid vulcanized head in which the bristles are so thoroughly anchored that every single bristle is retained until the brush wears out. This hard rubber setting is guaranteed to withstand hot water, cold water, soap or hard usage.

No. 400—Full length 4⅝ in., ebonized handle with non-corrosive metal ferrule, 2 in. imported white bristles set in vulcanized rubber.....per dozen $4.00

No. 49 Series—The Barbers' Favorite Lather Brushes.

A regular concert style instrument which can be played on both sides, and is tuned in two different keys. All reeds are perfect in tune and this is the only double harmonica on the market to-day that can be sold for twenty-five cents and give perfect satisfaction.
The celebrated Fr. Hotz Harmonicas have been on the market 80 years.
HALF DOZEN IN A PACKAGE.

HARMONICAS.

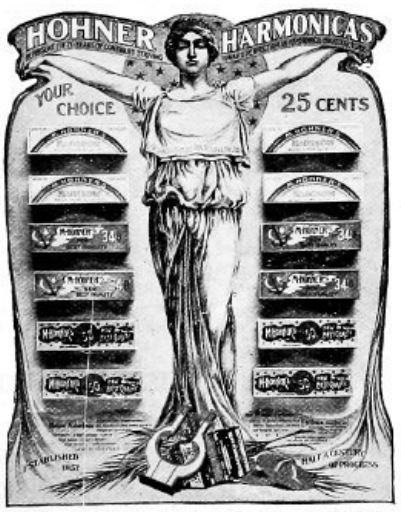
GENUINE HOHNER.

No. 220—THE TRUMPET CALL, 10 double holes, 40 reeds, brass plates, full concert, length 4⅝ in.....per dozen $15.36

The reeds of this instrument are directly connected with a wooden sound box into which the tone passes and finds an outlet through five brass trumpet horns which protrude from the box. No harmonica of this kind has ever been shown to the trade before, nor is there any which increases the tone so wonderfully.

ONE-QUARTER DOZEN IN A BOX.

HARMONICA ASSORTMENTS.



The New Hohner Display Stand, 24½x16¼ in., with Harmonicas Attached.

No. 225—Assortment consists of one new Hohner display card, with one dozen harmonicas, to retail at 25 cents each. The harmonicas are made up in three different styles, with an assortment of keys in each display.....per assortment $4.03

No. 235—Assortment consists of one new Hohner display card, with one dozen harmonicas, to retail at 35 cents each. The harmonicas are made up of the 5 best-selling styles in the Hohner line, and there is an assortment of keys on each card.....per assortment 4.99

No. 250—Assortment consists of 1 new Hohner display card, with one dozen harmonicas to retail at 50 cents each. The harmonicas are made up of 5 different styles, which are selected from the best sellers. In each assortment there will be found all the different keys required.....per assortment 7.68

This latest offer in Hohner goods consists of a beautiful attractive display stand, as shown above, combined with a dozen harmonicas of assorted styles and keys. The stand is a masterpiece of both the artist's hand and originality. It is lithographed in four colors and gold, and supported by a substantial easel. The harmonicas are fastened on new patented clamps, which hold the goods firmly and display them to advantage. The harmonicas sold can at all times be replaced by new goods. The three assortments above are made up with harmonicas to retail at twenty-five cents, thirty-five cents, and fifty cents, respectively. All the different assortments afford the dealer a profit of 50 per cent, and include this excellent display card, which he can use indefinitely.

HARMONICA ASSORTMENTS.

No. 200—LYRE HARMONICA ASSORTMENT, combining a very attractive Harmonica stand, made in the shape of a lyre, size 19x21 in., and an assortment of 12 Hohner Harmonicas consisting of 4 instruments to retail at 25 cents each, 3 to retail at 35 cents each, 3 to retail at 50 cents each, 1 to retail at 75 cents and another to retail at $1.00. The dealer sells the harmonicas for $5.30, making a profit of about 50 % as well as being put in possession of a fine Harmonica stand, which can be used for years.....per assortment $6.91

No. 340—THE MARINE BAND HARMONICA ASSORTMENT, per assortment..... $7.68

This assortment offers a regular single reed harmonica with twelve single holes and twenty-four reeds. This gives the instrument two additional holes and four additional reeds over the regular single reed harmonica. By this addition the Harmonica is given a wider range and comprises two complete octaves with an additional octave which is almost complete. Thus the player is afforded greater possibilities with this improved instrument in as much as he has the use of a greater range of notes. The harmonicas are furnished in new boxes, the main feature of which is the solid construction which makes them the most durable harmonica cases ever introduced. The box opens and closes in the regular telescope fashion. It is constructed with heavy cardboard and covered with an imitation celluloid paper. The glossy appearance which this covering contributes to the box, together with a tasty imprint in silver, lend a very attractive appearance. The boxes are furnished in assorted colors, red, white and blue. Instead of packing the instruments in the usual way of wrapping them up in one-half dozen packages, these goods are furnished in attractive display boxes. The display boxes are made with a hinged cover which shows when opened an attractive show-card lithographed in colors and also shows the price at which the goods are to be retailed. These boxes can conveniently be opened up on a show-case or in a show-window and enable the dealer to display the goods to considerable advantage. Each assortment consists of twelve harmonicas in assorted keys and assorted color boxes.

HARMONICAS.

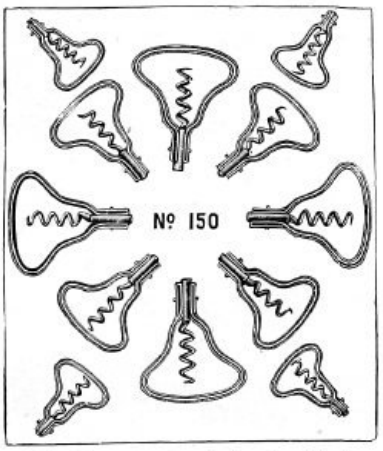
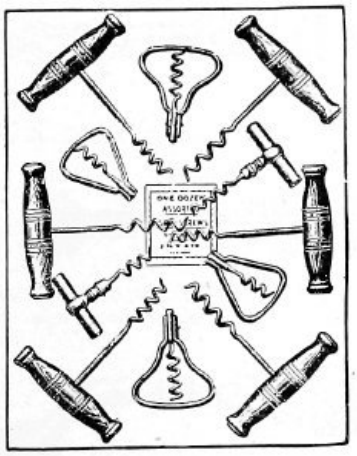
CORK SCREWS, PULLERS, ETC.

CORK SCREWS.

No. 2430—German, spiral coil, assorted, medium sizes, w't per doz. 1⅛ lbs., per dozen $1.75
ONE DOZEN ON A CARD.

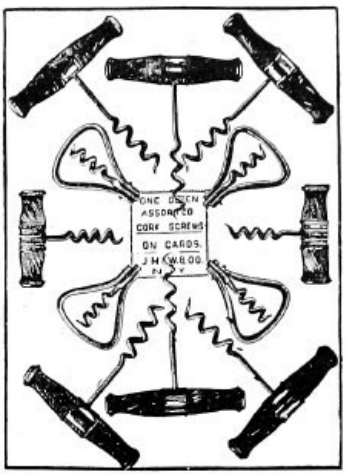


No. 150—DELMONICO, spiral coil, nickel plated, assorted, small, medium and large, w't per doz. ¾ lb.....per dozen $2.50
ONE DOZEN ON A CARD.

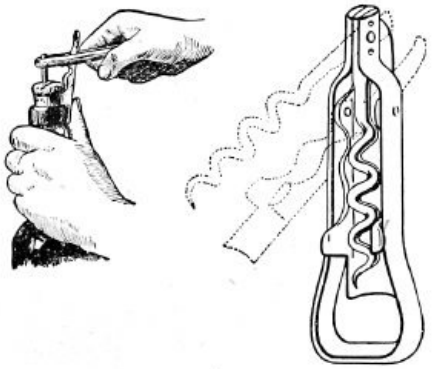


Tempered Steel Wire Spiral Screw.
No. 450—Assorted beech, rosewood and nickel plated handles, assorted sizes, w't per doz. 1 lb.....per dozen $3.50
ONE DOZEN ON A CARD.

CORK SCREWS.

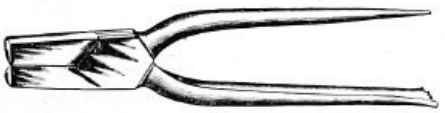


Tempered Steel Wire Spiral Screw.
No. 501—Assorted beech, rosewood and nickel plated handles, assorted sizes, w't per doz. 1 lb.....per dozen $4.00
ONE DOZEN ON A CARD.



No. 200—UNIVERSAL, lever extractor, wrought steel, finely nickel plated with cap remover and wire cutter, w't per doz. 1¼ lbs.....per dozen $4.50
A simple and effective pocket cork screw of great lever power. Besides pulling any cork with the greatest ease this article is indispensable in cap removing and wire cutting.
ONE DOZEN ON A CARD, THREE DOZEN IN A BOX.

CHAMPAGNE NIPPERS.



No. 2000—Forged steel, nickel plated, length 6¼ in., w't per doz. 3½ lbs., per dozen $13.50
HALF DOZEN IN A BOX.

CHAMPAGNE TAPS.

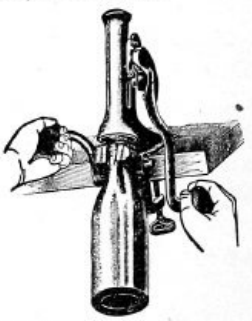
No. 2100—Nickel plated brass, length 4¾ in., w't per doz. 2 lbs.... per dozen $12.00
HALF DOZEN IN A BOX

CORK PULLERS.

Invaluable as a household article, and eliminates all danger of cutting the hands by breaking of bottle. Remarkable for its simplicity and the ease with which it can be worked. Corks are pulled almost without effort.

No. 35—YANKEE, nickel plated, convex tool steel screw, adjustable cone bearing nut, solid metal handle, can be attached to wall, w't per doz. 26 lbs., per dozen $25.00
Extra Cork Screws,.....each .60
ONE IN A BOX, WITH SCREWS.

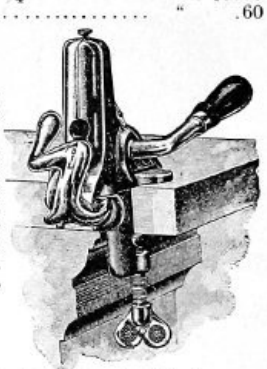
With a slight pressure on the handle of the clasp, the bottle is firmly held in position while cork is being drawn, which prevents all possibility of injury to the operator. Wires are cut when cork is pulled. Cork can be reinserted, if desired, to any depth.



No. 26—WALKER'S "QUICK AND EASY," nickel plated, with rubber cushioned bottle clasp attachment, w't 10 lbs., each $5.50
Extra Cork Screws,..... " .60
ONE IN A WOOD BOX.

No. 30—PHŒNIX, nickel plated and polished, steel cork screw, polished ebonized handle, w't 4¼ lbs.....each $3.50
Extra Cork Screws,..... " .60

With a slight pressure on the handle of the clasp, the bottle is firmly held in position while cork is being drawn, which prevents all possibility of injury to the operator. Cork can be reinserted, if desired, to any depth.



No. 45—DAISY, nickel plated and polished, steel cork screw, polished ebonized handle, with adjustable bottle holder and wire cutter, w't 8 lbs.....each $9.00
Extra Cork Screws,..... " .60
ONE IN A WOOD BOX.

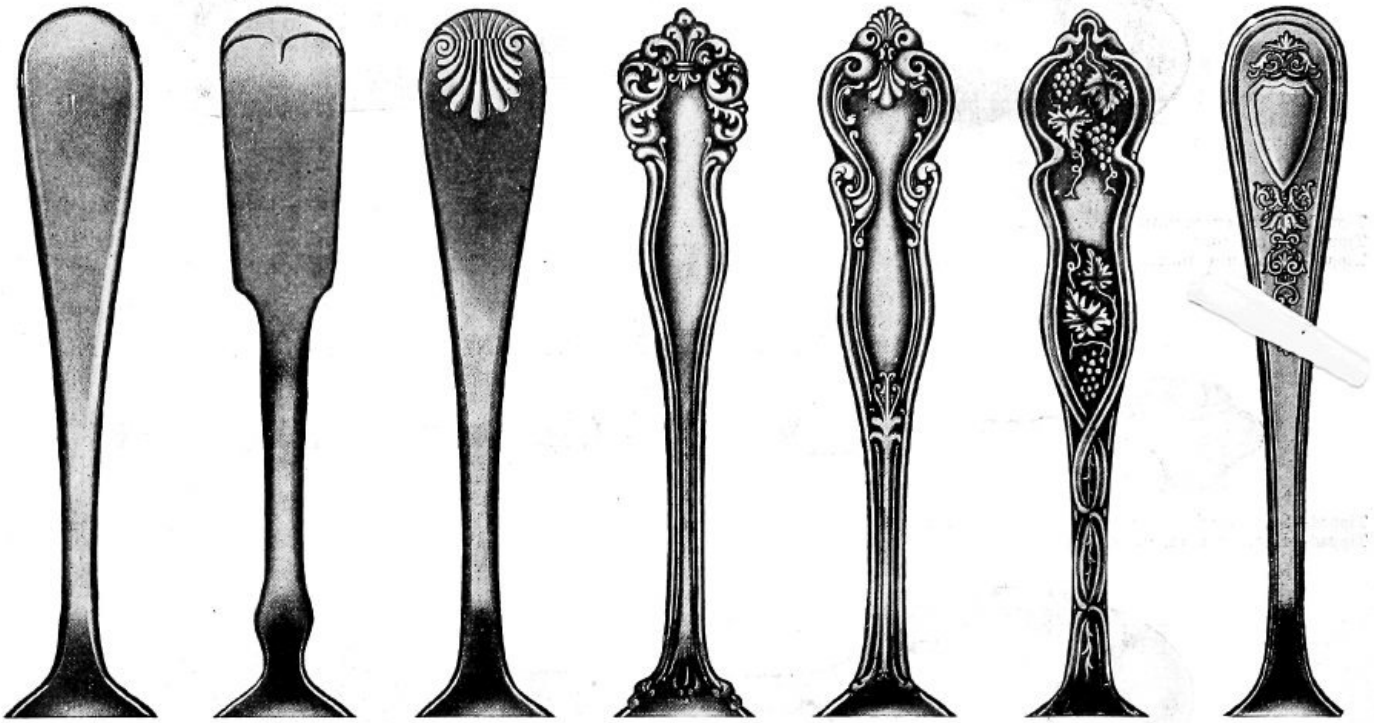
OVB SILVER PLATED WARE.



Windsor. Tipped. Shell. Iros. Antoinette. Vineyard. Pilgrim.

Made in Seven Artistic Patterns and in a Great Variety of Pieces.

The success of OVB silverware has been one of the most conspicuous in the history of the trade. The demand created without advertising, simply upon the merits of the goods, has been tremenduous.

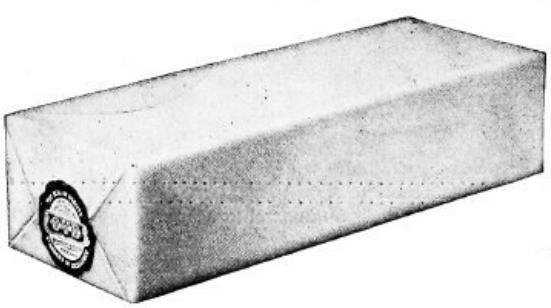
The line consists of seven distinct patterns as shown above and is complete in every respect, embracing a full assortment of fancy pieces, including any article desired.

The quality is the VERY BEST. It has been proven, and we guarantee it.

The patterns are artistic, dainty and attractive as those of any other manufacture.

Blanks of all OVB silverware are made of highest quality nickel silver and plated in three weights as follows:

A1 or Extra Plate—The standard for years—satisfactory goods at a reasonable price.



Hermetically Sealed Package of OVB Silverware absolutely preventing tarnishing.

Triple Plate—Much heavier than standard, a more lasting plate at only a slight increase in cost.

Quintuple Plate—Five times as heavy as standard, plated so heavy as to be practically as serviceable as solid silver, at about one fourth the cost.

The Iros pattern can be furnished in either bright or French gray finish. The Pilgrim, Antoinette and Vineyard in French gray only. These patterns are equal in design, finish and stamping to the best sterling silver and are much more practical.

We call especial attention to the Pilgrim pattern which we have just added to stock. This pattern we designed after inspecting and comparing practically every silverware line on the market. The design is strictly colonial with a modern finish, the handle being a rich French gray with the raised shield in the center, burnished bright. The Pilgrim is without doubt the best designed pattern on the market today.

GUARANTY—OVB Silverware is warranted to strip the amount of silver marked on the packages, and to be equal to that of any other manufacture.
(Signed) Hibbard, Spencer, Bartlett & Co.

These cases do not include the articles they are intended to fit. Printed inside covers in blue ink without extra charge; stamped in gold leaf at 50 cents per dozen extra.

SILVERWARE HAND ENGRAVING.

We are prepared to take orders for engraving of silverware in accordance with the styles presented below for shipment with other goods. These orders can be filled reasonably prompt, the only delay being a matter of about 24 hours in what is known as the Christmas and Holiday season. We cannot accept any orders for engraving after the 15th of December for delivery during that same year.

Style 1.

Style 2.

Style 3.

Style 4.

Style 1—Block,	per letter	$0.10
Style 2—Roman,	"	.10
Style 3—Fancy script,	"	.10
Style 4—Old English,	"	.12

Style 5.

Style 6.

Style 7.

NEW HAVEN CLOCKS.

Mauser.

Tattoo.

Mauser Alarm, 1 day time, 4 in., seamless nickel plated case, - - - - - - - - - - - - each $1.88

Tattoo Alarm, 4½ in. dial, 1 day time, nickel plated, beaded front, - - - - - - - - - - - " 2.34

Has a 4 in. bronze bell-metal gong that sounds like a fire alarm, and upon which it rings its alarm intermittently every half minute through a period of a quarter of an hour. The alarm can be stopped at will by means of our patent switch.

This remarkable clock, though only a trifle larger and heavier than ordinary alarm clocks, condenses within its case noise enough to weigh a ton. There is a 4 in. bronze bell-metal gong on the back of this clock that rings for five minutes. Has a shut-off so that the alarm may be made silent at will; and is much simpler in construction, more reliable and cheaper than electric alarms.

ONE IN A BOX.

Junior Tattoo Alarm.

Back View.
Junior Tattoo Alarm.

Sentry Alarm.

Junior Tattoo Alarm, 2 in. Arabic dial, 2¼ in. case with knurled front, intermittent alarm, - - - - - - - - - - - - each $2.88

Sentry Alarm, Nickel, Red, blue or green enamel, 4½ in. dial, 4 in. metal gong on back, 1 day time, height 10¾ in., width 6¾ in., - - each 4.30

Sentry Alarm, Bronze and Gilt, otherwise same as above, - - - " 4.30

The Sentry Alarm can be used as a mantel clock. The case is made of nicely finished metal in bronze, gilt, nickel, and red, blue or green enamel. The intermittent alarm rings for 15 seconds, stops, repeats, and continues for 20 minutes. By means of a shut-off lever ringing can be stopped at any time.

ONE IN A BOX.

ONE IN A BOX.

Auto Alarm.

PARKER CLOCKS.

No. 100.

Reverse View.

No. 61.

No. 100—Rotary hammer, double roller escapement, 1 day alarm, 3 in. dial, heavy brass case, nickel plated, weight 1 lb., - - - - - - - - - each $1.80

No. 61—Rotary hammer, double roller escapement, 1 day alarm, 3 in. dial, heavy brass case and base, 3½ in. gong, with shut-off, nickel plated, weight 1¾ lbs., - each 2.50

No. 61 has an indicator between the gong and the base, which can be moved so as to allow the alarm to sound at the hour desired, remain silent, or which can be stopped while ringing. No. 100 can be instantly removed from the case by pressing button on side.

ONE IN A BOX.

TIME AND ALARM CLOCKS.

PARKER CLOCK CO'S.

Nos. 106 and 105.

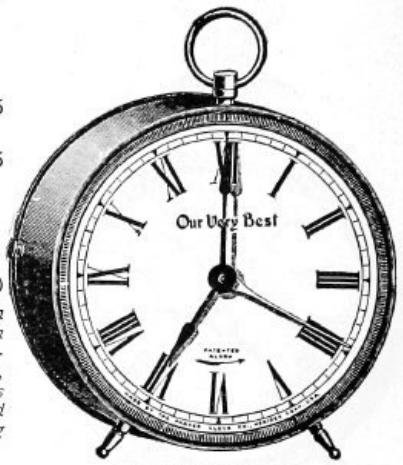
No. 106—Rotary hammer, double roller escapement, 1 day alarm, 4¼ in. dial, heavy brass case, nickel plated, short hand alarm set, w't 1¼ lbs., each $1.25

No. 105—Long hand alarm set, otherwise same as No. 106, - - - - - - - each 1.25

No. 102—"OUR VERY BEST," rotary hammer, double roller escapement, 1 day alarm, 4¼ in. dial, heavy deep brass case, nickel plated, alarm shut-off, press button catch allowing instant removal of works, w't 1½ lbs., - - - - - - - each 1.80

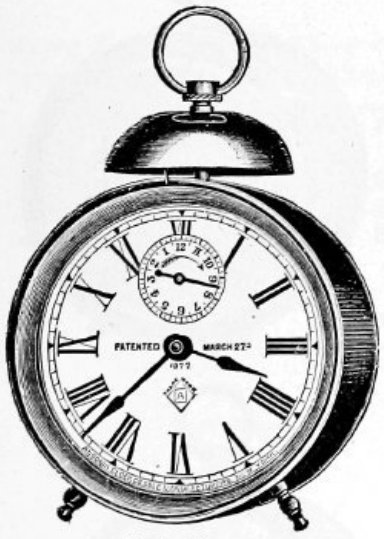
The No. 102 is an exceptionally fine alarm clock. The case is extra deep and shields the gong and keys from view. The rotary hammer gives a clear, pleasant ring. The alarm hand comes clear to the edge making it possible to set the alarm to the minute. The alarm can be stopped when ringing, or prevented from sounding at the time set, by the 'shut-off'—two buttons marked "silent" and "alarm." The alarm and hand set are convenient and easily turned. The works can instantly be removed from the case by pressing a button on each side and as easily returned to place.

ONE IN A BOX.



No. 102.

ANSONIA CLOCK CO'S.



Pirate Alarm.

Repeater Long Alarm.

Racket.

CUCKOO CLOCKS.

No. 62.

TRADE G.K. MARK

Imported Direct from the Black Forest (Schwarzwald), Germany.

The carving of these clocks is done by hand by the natives of the Black Forest, and is especially fine. The figures are accurate and life-like.

The fronts of these clocks are made of three pieces of wood of opposite grain, and are set together to prevent warping and cracking.

The movements are made of the best tempered steel and brass with screw pillars, patent ratchet wheels, new escape wheel, and are well finished and adjusted. The same are guaranteed to be correct timekeepers.

Every clock that leaves the factory has been run and thoroughly tested, and is warranted, if properly used, to be a good timekeeper. Should a case crack or split, it will be exchanged or repaired without charge, if transportation charges are prepaid.

All genuine Black Forest Cuckoo Clocks are stamped with the above Trade Mark.

CONNECTICUT WATCH CO.

No. 18—**Winner**, 18 size, *3-oz. solid nickel case*, screw back and bezel. ..per dozen $36.00

A heavy case of solid nickel, highly finished, will wear indefinitely without changing in either color or appearance and is screw back and bezel, which renders it practically dust and water proof. The Winner is a substantial watch that will appeal to all kinds of people—railroad men, miners, farmers, mechanics—in short anyone requiring a timekeeper to withstand the hardest kind of wear. It is attractive, too, with a finely damaskeened movement plate and a dial with extra heavy figures that make it ornate as well as easily readable. The movement of this watch is specially constructed, and is designed, like the case, to stand hard use. It is fully guaranteed.

GUNS, PISTOLS, AMMUNITION

AND

SHOOTERS' SUNDRIES

HIBBARD, SPENCER, BARTLETT & CO.

CHICAGO

1901

BURSTING GUN BARRELS.

It is a very rare case indeed where the bursting of a gun barrel is due to the poor workmanship or material of the gun. Much more often it is found that the shooter himself is entirely responsible, although ignorant of the cause.

To be sure, guns might be made sufficiently strong and thick to resist any possible strain, but they would not answer the purpose, as one wants a light, neat, wieldy gun, not a cannon.

It is not reasonable or just that we should drop a watch on the floor, because it has been dropped without apparent injury. No more is it right, that, because a gun has been shot with dirt, rags, or other substances in the barrel, without bad results, we should continue such practice.

We are handling a dangerous substance, in confined powder, and should "be careful," as the first law of shooting reads. Any one unfamiliar with powder and the handling and cleaning of guns should be doubly careful and strictly guard against the important points enumerated below:

Do not allow any foreign substances to become lodged in the barrel, either through cleaning or carelessness.

Be sure that the cartridges are clean, if they have been carried in a pocket or with other articles.

Keep the choke free from black powder dirt, especially when nitro powder is to be used afterward.

Shot too coarse or too fine, or wads too hard, might make a thin barrel of the best material bulge until a choke bored gun is turned into a cylinder before being noticeable to the user.

Nitro powder should not be used in low grade shells, as the bursting at the breech is almost without exception due to this combination. Foreign guns of the cheaper makes are only intended for the use of black powder.

POWDER SWELLS OR RINGS.

We frequently receive complaints with reference to gun as well as rifle barrels becoming swollen. All experts in the manufacture of firearms agree that in ninety-nine cases out of one hundred, the cause of this damage is due to some obstruction being in the barrel when the gun or rifle is fired. The following was taken from the catalogue of a well known rifle manufacturer:

"Never shoot a rifle, or a weapon of any kind, while there is an obstruction in the barrel, such as a bullet, piece of cloth, dirt, etc. If fired under these conditions, in almost every instance the air is compressed at the point of obstruction, giving a very high pressure at this point, causing the barrel to swell and forming a bulging ring which destroys the accuracy of the barrel. We have seen a .22 caliber barrel, the metal of which was one inch in diameter, so badly swollen that the ring could be felt by passing the finger along the outside of the barrel, when the cartridge used was only the .22 short with its three grains of black powder and 30 grain lead bullet. Sometimes the ring is perfect, extending entirely around the barrel, but more often the obstruction is only partial and the swelling only a section of a ring. In small bores using high pressure military smokeless powders, the pressure induced is sometimes great enough to cut the barrel entirely in two. This accident is an unfortunate one, as it often happens from no fault of the user. The results are characteristic, and so different from any accident resulting from a flaw or seam in the barrel, however, that the cause is always known to an expert, for in no other way can a ring or powder swell be produced.

"If the barrel is badly pitted or has a 'powder swell,' caused by shooting the rifle when there was an obstruction in the barrel, it is impossible to obtain accurate results, or do good strong shooting with the barrel in this condition. Such a barrel cannot be materially improved; the only thing to bring satisfactory results is a new barrel."

Firearm manufacturers invariably refuse to accept any responsibility for damage of this kind, and we therefore cannot replace the arms. Settlement with a customer should not be made under any circumstances until our experts have had a chance to examine the arm and render an opinion as to cause for damage.

GUN REPAIRS.

Almost from the inception of our gun business, we have maintained a gun shop where we employ a corps of skilled mechanics, and are equipped with all necessary tools and machinery for making repairs of every description, choke boring, reboring, etc., as well as the examination of all arms. As many of our customers do not employ a gunsmith, we have been obliged to do a large amount of this class of work for the trade, charging only for the actual time of the workman and the materials used. It is impossible to quote prices intelligently on this class of work without having the arms for examination, but we give you below a list of prices which are simply approximate estimates, but will cover the expense in the majority of cases:

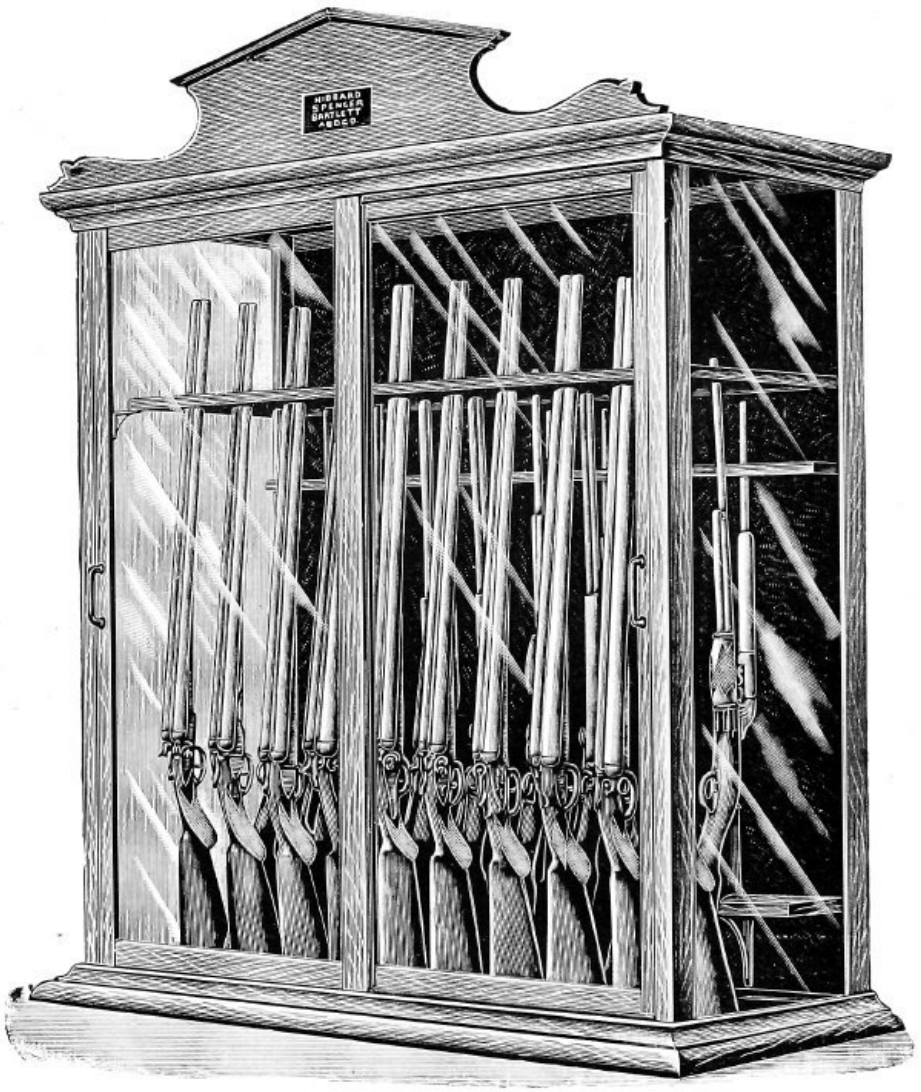
Bending stocks,	each	$ 2.50 to	$ 4.00
Cutting off stocks,	"	1.00 to	2.00
Making new stocks for medium grade imported guns,	each	8.00 to	10.00
Making new stocks for better grade imported, also American guns,	each	10.00 to	12.00
Making new stocks for hammerless guns,	"	10.00 to	20.00
Taking dents out of barrels,	"	2.00 to	4.00
Tightening barrels on action,	"	1.00 to	2.50
Cutting off and reboring barrels,	"	1.50 to	4.00
Reboring barrels to remove pits,	per barrel	1.50 to	3.00
Choke boring barrels, jug choke,	"	1.00 to	1.50
Choke boring barrels, taper choke,	"	1.50 to	2.50
Re-browning barrels,	per pair	3.50 to	5.00
Fore-ends, complete, for medium grade imported guns,	each	4.00 to	5.00
Fore-ends, for guns costing from $20.00 to $40.00,	each	5.00 to	7.50
Hammers made to match samples,	"	1.00 to	2.50
Rubber butt plates,	"	1.00 to	2.00
Extractors,	"	1.50 to	2.50
Top or side levers,	"	1.50 to	2.00
New locks, complete for medium grade imported guns,	per pair	4.00 to	6.00
Plungers made like samples,	each	.35 to	.50
Sears, tumblers, and mainsprings fitted in locks,	"	1.00 to	2.50
Trigger guards,	"	.75 to	1.50
Triggers,	"	.75 to	1.00

It is necessary to have the action of the gun and the old stock when possible, from which to obtain the length and drop when making a new gun stock, and the complete gun in order to fit a new fore-end or extractor. However, in some cases we can get along with the barrels when a new extractor only is required, although it is necessary to guess at the length of the extractor pin in this case.

Parts for Flobert rifles, not being interchangeable, can be supplied from stock only in the rough, and when parts are wanted finished and fitted, it is necessary for us to have the rifle in order to do the work properly. The cost of breech blocks and hammers for Flobert rifles finished and fitted, vary from $1.00 to $1.50 each, the seemingly high price being due to the fact that the parts have to be finished entirely by hand. In sending us guns or parts, do not fail to put your own name and address on the tag, and to write a letter giving full particulars. Failure to do this may be the cause of much unnecessary delay.

RETAIL DEALERS' GUN SHOW CASE.

The Handsomest, Most Convenient and Best Made Show Case Ever Offered.



An Indispensable Fixture for the Sale of Guns.

Made of selected oak, antique oiled finish, sliding doors, lined with black felt.

No. 26—Width at bottom 4 ft. 7 in., width inside 4 ft., depth at bottom 23 in., depth inside 17 in., height without headpiece 4 ft. 8½ in., height inside 4 ft. 5½ in., - - - - - - - - - - - - - - - - - - each $30.00

The finest case ever built for retailing guns and rifles. Spaced for nineteen guns and rifles and seven smaller rifles. Will save its cost in a season, prevent rust, make your store attractive and increase your sales. Adapted for counter, wall, or center of store. We present this as an ideal show case for retailing guns and rifles. It is the result of long experience and suggestions from our customers, and is built for use. You will note from dimensions given above that the case is of convenient size for counter or wall. The depth above the bottom moulding is 20½ in. The extreme height is 5 ft. 7 in. Weight crated 212 lbs.

ALMOST GIVEN AWAY. WRITE US FOR TERMS.

REV-O-NOC HAMMERLESS SHOT GUNS.

AMERICAN MADE.

H.S.B. & CO. REV-O-NOC

H.S.B. & CO. REV-O-NOC

Our Rev-o-noc guns are of the most excellent quality throughout. Very carefully constructed in every detail; accurately hand fitted and adjusted; bored for use of all standard loads of either smokeless or black powder. Frame and action parts are drop-forged from high-grade machinery and tool steel. All are well finished, and are especially designed; thoroughly reliable and fully guaranteed in every respect. They are the best value for the money of any line of guns on the market to-day.

The automatic ejectors are equipped with a new cocking device, and automatic shell ejector, so combined as to reduce parts to the fewest, simplest and strongest possible in an ejector gun. The cocking rods are engaged by hardened steel rollers pivoted in the front circle, and push the hammers back to cock with a short, sharp, easy action with a minimum of friction. The fall of the hammers in firing drives the cocking rod forward against the ejector sear, which dropping into the ejector hammer or kicker retains it until the gun is opened sufficiently for the shell to clear the breech, when it trips by contact with the frame, throwing out the fired shell only.

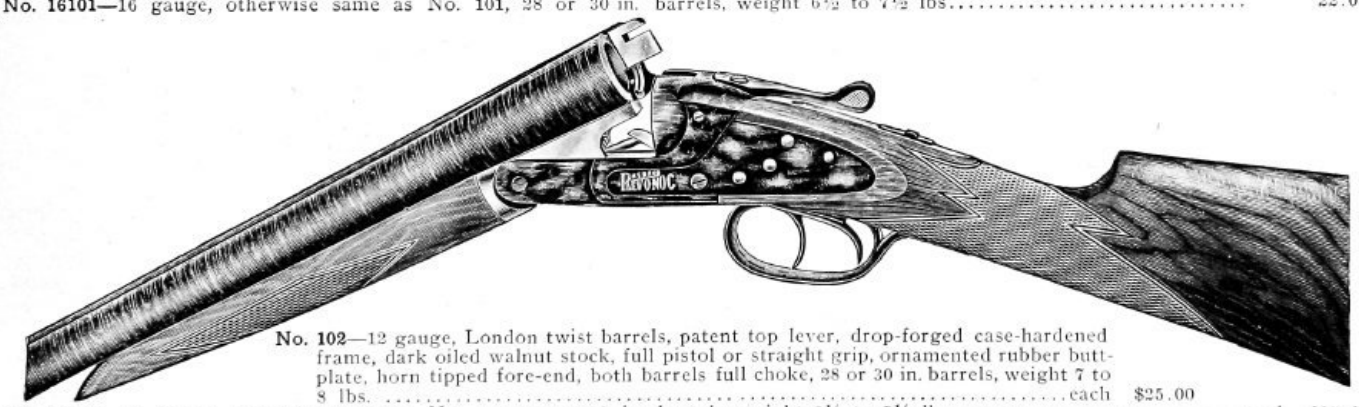
The parts are few and strong, consisting of the hammer, action spring, sear and retaining latch.

A hook in the barrel lug engaging a pin through the frame makes a positive stop when opening, relieving the hinge of practically all strain, affording great rigidity and durability to the action. The stop hook acts also as a positive extractor, pushing the shells well out for the purpose of withdrawing or otherwise, and also in case of defective shell, which may not be ejected automatically.

Sixteen gauge automatic ejector guns can be furnished from the factory direct. Prices same as 12 gauge.

No. 101—12 gauge, fluid steel barrels, patent top lever, drop-forged case-hardened frame, dark oiled walnut stock, full pistol or straight grip, ornamented rubber butt-plate, horn tipped fore-end, both barrels full choke, 28 or 30 in. barrels, weight 7 to 8 lbs.....each $22.00

No. 16101—16 gauge, otherwise same as No. 101, 28 or 30 in. barrels, weight 6½ to 7½ lbs..... " 22.00

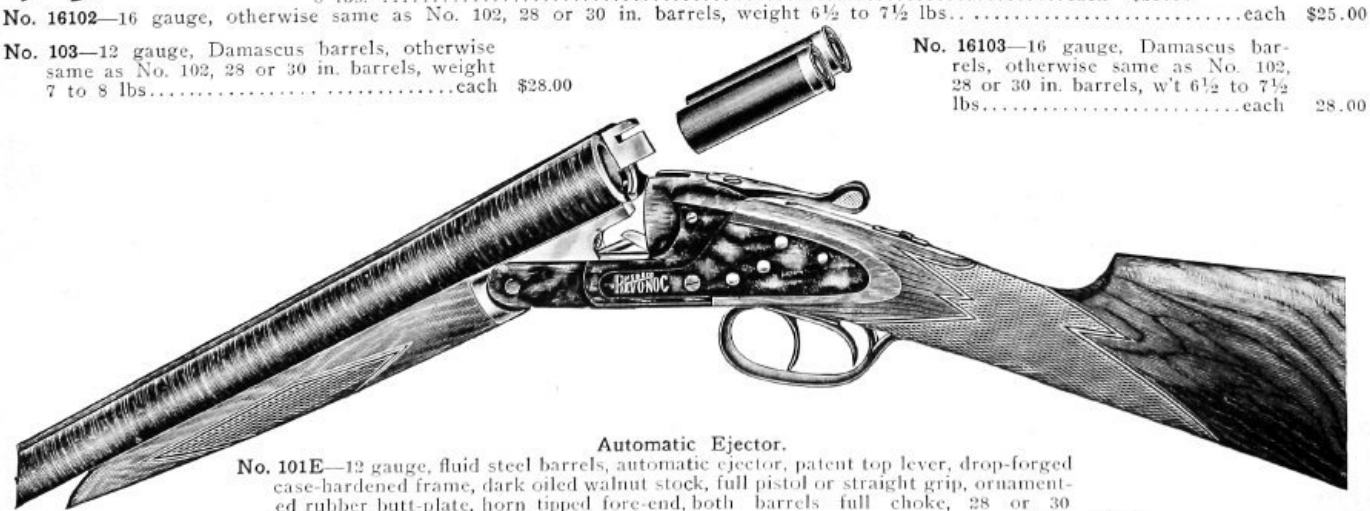


No. 102—12 gauge, London twist barrels, patent top lever, drop-forged case-hardened frame, dark oiled walnut stock, full pistol or straight grip, ornamented rubber butt-plate, horn tipped fore-end, both barrels full choke, 28 or 30 in. barrels, weight 7 to 8 lbs. .....each $25.00

No. 16102—16 gauge, otherwise same as No. 102, 28 or 30 in. barrels, weight 6½ to 7½ lbs.....each $25.00

No. 103—12 gauge, Damascus barrels, otherwise same as No. 102, 28 or 30 in. barrels, weight 7 to 8 lbs.....each $28.00

No. 16103—16 gauge, Damascus barrels, otherwise same as No. 102, 28 or 30 in. barrels, w't 6½ to 7½ lbs.....each 28.00



Automatic Ejector.

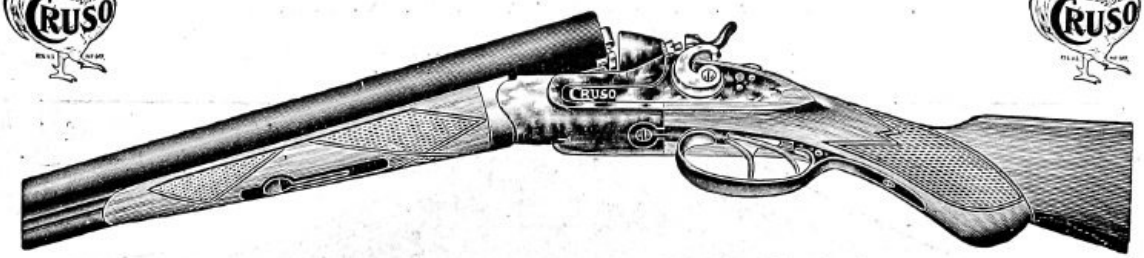
No. 101E—12 gauge, fluid steel barrels, automatic ejector, patent top lever, drop-forged case-hardened frame, dark oiled walnut stock, full pistol or straight grip, ornamented rubber butt-plate, horn tipped fore-end, both barrels full choke, 28 or 30 in. barrels, weight 7 to 8 lbs.....each $32.00

No. 102E—12 gauge, London twist steel barrels, otherwise same as No. 101E, 28 or 30 in. barrels, weight 7 to 8 lbs.....each $35.00

No. 103E—12 gauge, Damascus barrels, otherwise same as No. 101E, 28 or 30 in. barrels, weight 7 to 8 lbs..... " 38.00

Single triggers can be fitted to any of the above guns at $15.00 extra. We do not carry single triggers in stock; they will have to be shipped direct from factory.

CRUSO HAMMER GUNS.



American Machine Made, Choke Bored, for Hard Shooting.

No. 138—12 gauge, genuine armory steel barrels, top snap, rebounding bar locks, concave circular hammers, action and mountings case-hardened, nitro firing pins, flat matted extension rib, half pistol grip, nicely checkered walnut stock, Deeley & Edge fore-end, checkered rubber butt-plate, left barrel full taper choke bored, right barrel modified choke, 30 or 32 in. barrels, weight 7½ to 8½ lbs.	each		$12.50

CRUSO HAMMERLESS GUNS.

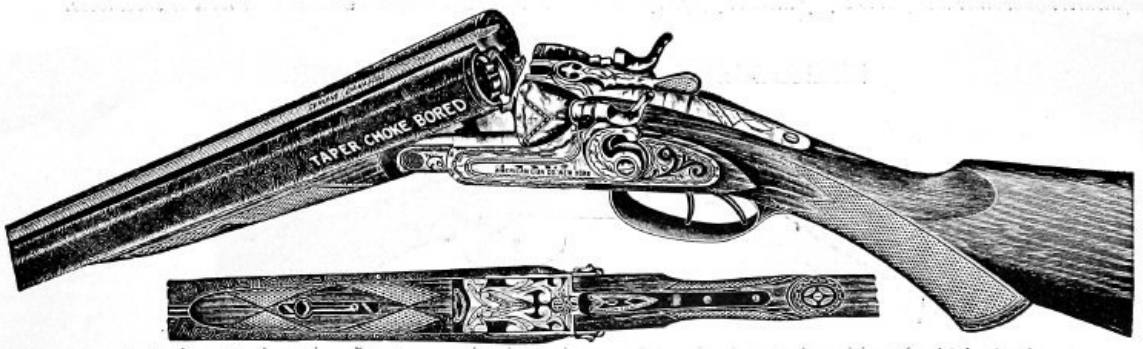
American Machine Made, Bored for Nitro Powders.

No. 48—12 gauge, genuine armory blued steel barrels, patent top lever, drop-forged, case-hardened frame, with nickel plated indicators showing when each barrel has been fired, dark figured walnut stock, full pistol grip, rubber butt-plate, Deeley & Edge patent fore-end, 30 in. barrels, both barrels full choke, weight 7 to 8 lbs.	each		$17.00
No. 1648—16 gauge, otherwise same as No. 48, 28 or 30 in. barrels.	"		17.00
No. 49—12 gauge, genuine twist barrels, otherwise same as No. 48, 30 in. barrels	"		20.00

The manufacturers of this line of hammer and hammerless guns have spared no expense to obtain a gun equal to any on the American market. The symmetrical lines, balance and beautiful finish of this gun are so much superior to other guns of about the same price, that it is necessary to see the gun to appreciate these points. Every part is drop-forged, highly polished and case-hardened. The cocking-mechanism is simple and strong, permitting the cocking of the hammers with no more exertion than is used to open an ordinary hammer gun. The locking-mechanism consists of two bolts so connected with the top lever that a very short throw of the top-lever effects a very long throw of the bolts, and by this patent device we have been able to obtain a deeper bite of the bolts on the barrel lugs than is obtained on any other gun. The two deep seated bolts coupled with the "L" shaped extension rib, are features of strength, and make it impossible for the gun to shoot loose. The automatic safety and Deeley & Edge patent fore-end are fitted to each gun. This gun can be closed with hammer cocked or otherwise as may be desired.

These are the first machine guns made in this country to successfully compete in price with the much inferior imported goods. They are superior in every way and embrace all the features which distinguish American machine products. They have drop-forged steel frames and hardened steel locks and parts, are beautifully case-hardened and bored for nitro or black powder. The lock parts are hardened. The screws, and top lever parts, also the lock parts and hammers, being made by machinery, are interchangeable.

HAMMER GUNS.

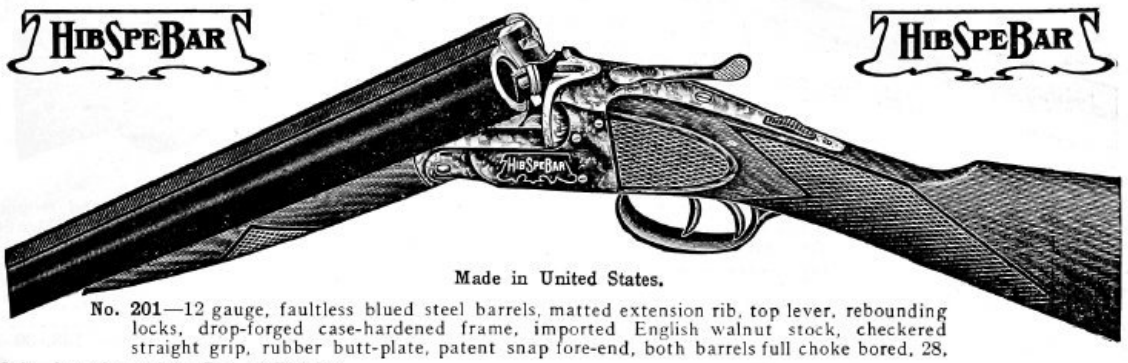


American Machine Made, Choke Bored, for Nitro Powders.

No. 439—12 gauge, genuine Damascus steel barrels, double bolt, top snap, rebounding bar locks, concave circular hammers, nitro firing pins, flat matted extension rib, heavily engraved frame, lock plates and mountings, capped full pistol grip, nicely checked walnut stock and fore-end, ornamented rubber butt-plate, Deeley & Edge patent fore-end, left barrel full taper choke bored, right barrel modified choke bored, 30 in. barrels, weight 7½ to 8¼ lbs. ..... each $15.00

DOUBLE BARREL SHOT GUNS.

HIB-SPE-BAR HAMMERLESS.



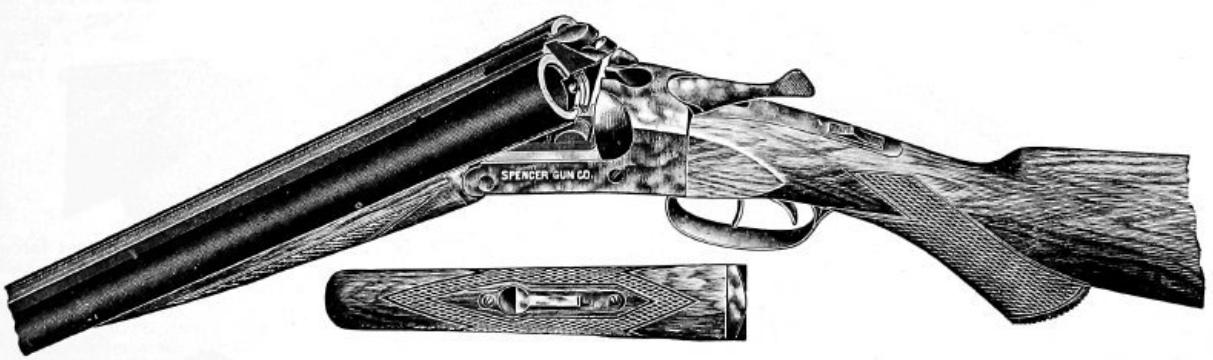
Made in United States.

No. 201—12 gauge, faultless blued steel barrels, matted extension rib, top lever, rebounding locks, drop-forged case-hardened frame, imported English walnut stock, checkered straight grip, rubber butt-plate, patent snap fore-end, both barrels full choke bored, 28, 30 and 32 in. barrels, weight 7¼ to 7¾ lbs. ..... each $20.00

The Hib-Spe-Bar hammerless is made for us by one of the best known high grade gun makers in this country and is made on the same lines and by the same workmen as their highest grade guns. It is first class, substantial, strong and will stand the severe test to which all guns are subjected in these days of heavy loads of nitro powder.

THE HIB-SPE-BAR GUN IS FULLY GUARANTEED.

SPENCER GUN CO.'S HAMMERLESS.



No. 01S—12 gauge, decarbonized steel barrels, matted extension rib, top lever, automatic safety, case-hardened frame, attractive selected walnut stock, full pistol grip finely hand checkered, hard rubber butt-plate, Deely and Edge fore-end hand checkered, left barrel, full choke, right barrel modified choke bored 30 in. barrel, w't 7 to 8 lbs. ..... each $18.00

No. 016S—16 gauge, otherwise same as No. 01S, 28 in. barrels, w't 6 to 7 lbs. ..... " 18.00

No. 0120S—20 gauge, otherwise same as No. 01S, 28 in. barrels, w't 6 to 7 lbs. ..... " 18.00

No. 1S—12 gauge, twist barrels, otherwise same as No. 01S, 30 in. barrels, w't 7 to 8 lbs. ..... " 20.00

These are exceptionally high grade guns for the price we ask for them. The barrels are the best decarbonized steel, finely finished, extremely durable and fine shooting. They have top snap action with locking lever adjusted to take up wear automatically. The stock has a pistol grip and is made of selected walnut with attractive, beautiful grain, with heavy hard rubber butt-plate. The safety is automatic, it sets when barrels are closed, a push of the thumb opens it and cocks the hammers. The frame is fine quality case-hardened steel with a plain sensible finish that wears best and looks best after years of service.

The manufacturers guarantee this gun to safely shoot any factory-loaded nitro shell, and the joint will not wear loose or shoot loose.

HARRINGTON & RICHARDSON HAMMER.

No. 328—28 gauge, decarbonized blued steel barrels, case-hardened frame, rebounding hammers, coil main and sear springs, cross bolted through extension rib, with fine checkered imported walnut stock and fore-end, left barrel full choke, right barrel modified choke, 28 in. barrels, w't 5¾ lbs ..... each $16.00

No. 341—44 cal., adapted for either 44 cal. W. C. F. shot cartridges or 44 cal. XL shot cartridges, 26 in. barrel, weight about 5¼ lbs., otherwise the same as No. 328 ..... each $16.00

DOUBLE BARREL SHOT GUNS.

STEVENS' HAMMER.

No. 235—12 gauge, high pressure steel barrels, double bolted matted extension rib, top snap, rebounding bar lock, low circular hammers, solid plungers, reinforced breech, oiled American walnut stock and fore-end, checkered pistol grip, checkered patent snap fore-end, 30 or 32 in. barrels, w't 7¼ to 8½ lbs.....each $15.00

No. 16235—16 gauge, otherwise same as No. 235, 28 or 30 in. barrels, w't 7¼ to 8 lbs.....each 15.00

No. 255—12 gauge, high pressure steel barrels, top lever, patent rotary compensating cross bolt through extension rib, check-hook, low circular hammers, rebounding bar locks, solid plungers, parts drop-forged, varnished walnut stock, finely finished, with pistol grip checked and capped, checked patent snap fore-end, rubber butt-plate, 30 in. barrel, w't 7¼ to 8½ lbs.....each $20.00

STEVENS' HAMMERLESS.

Choke Bored for Nitro Powders.

No. 335—12 gauge, high pressure steel barrels, double bolted matted extension rib, top snap, reinforced breech, oiled American walnut stock and fore-end, checkered half pistol grip stock, 30 in. barrels, w't 7¼ to 8½ lbs., stock 14 in. with 2¾ in. drop....each $20.00

No. 16335—16 gauge, otherwise same as No. 335, 28 or 30 in. barrels, w't 7¼ to 8 lbs.....each 20.00

Constructed on lines similar to our No. 235 double barrel hammer gun, inasmuch as it also embodies in principle, our celebrated check-hook, which has proven a positive success during the past season. The action is of the Anson & Deeley type and made in as simple a way as possible, with an independent, automatic safety and case-hardened frame. The gun has a double bolt—one in the through-lump and one in the extension rib—and these two fastenings, together with our check-hook, make this model one of the best of its kind on the market at the price.

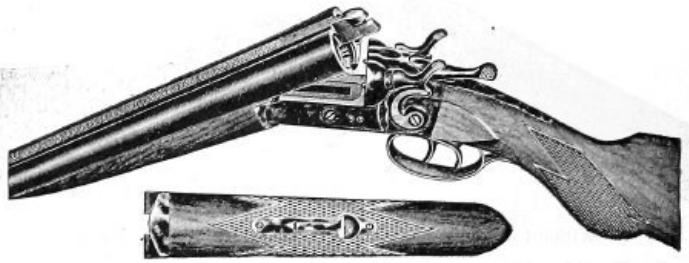
Bored for Nitro Powders.

No. 355—12 gauge, smokeless blued steel barrels, matted extension rib, top lever, reinforced breech, rebounding locks, mountings drop-forged and case-hardened frame, English walnut stock, checkered full pistol grip with rubber cap, rubber butt-plate, Anson & Deeley fore-end, both barrels choke bored, adapted for any standard make of shells loaded with black or smokeless powder, regular length of stock 14 in., drop from 2½ to 3 in., 30 in. barrel, w't 7¼ to 8 lbs.....each $25.00

No. 16355—16 gauge, otherwise same as No. 355, 30 in. barrels, w't 7¼ to 7¾ lbs.....each 25.00

Any deviation from above specifications on Stevens' Hammerless guns subject to advance of $4.00 list, and entail the shipping of such guns from the factory.

HOPKINS & ALLEN'S HAMMER.



No. 0312—12 gauge, decarbonized blued steel barrels, flatted breech, matted extension rib, rebounding bar locks, low circular hammers, case-hardened frame and hammers, blued guard, nitro plungers, Italian walnut stock, half pistol grip, Deeley & Edge fore-end, checkered grip and fore-end, rubber butt-plate, left barrel full choke, right barrel modified choke, 30 or 32 in. barrels, w't 7¼ to 8 lbs.....each $15.00

No. 0316—16 gauge, otherwise same as No. 0312, 28 or 30 in. barrels, w't 6¾ to 7 lbs.....each 15.00

No. 312—12 gauge, imported English twist steel barrels, otherwise same as No. 0312, 30 or 32 in. barrels, w't 7 to 8 lbs..each 16.50

No. 316—16 gauge, otherwise same as No. 312, 28 or 30 in. barrels, w't 6 to 7 lbs.....each 16.50

No. 320—20 gauge, imported English twist steel barrels, otherwise same as No. 312, 24 in. barrels, w't 6 to 7 lbs.....each 16.50

BATAVIA SPECIAL, HAMMERLESS.

Baker Gun Co.'s Full Choke Bored.

No. 18—12 gauge, homo-tensil blued steel barrels, matted extension rib, drop-forged frame and action, full pistol grip stock, full choke bored, 30 in. barrels, w't 7 to 8 lbs...each $21.75

BATAVIA LEADER, HAMMERLESS.

Baker Gun Co.'s Full Choke Bored.

No. 19—12 gauge, twist steel barrels, matted extension rib, drop-forged frame and action, pistol grip stock, full choke bored, 30 in. barrels, w't 7 to 8 lbs.....each $25.00

The Batavia Special and Batavia Leader are manufactured by the Baker Gun Co. and are constructed on the most simple mechanical principles and highly improved lines. Nothing but the best quality of material enters into their construction. The actions are carefully hand fitted to insure perfect joints and wearing surfaces. They are built by skilled workmen each specially adapted to the particular operation.

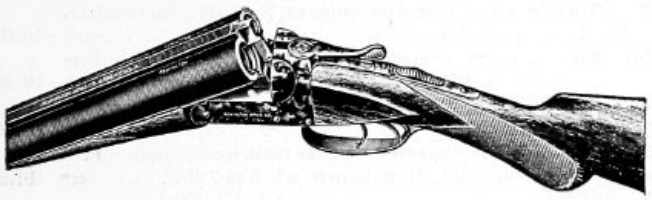
DOUBLE BARREL SHOT GUNS.

REMINGTON, HAMMERLESS.

Without Automatic Ejector, Guaranteed for Nitro Powders.

No. K —12 or 16 gauge, decarbonized steel barrels, choke bored, half pistol grip, checkered grip and fore-end, rubber butt-plate, case-hardened frame and mountings, snap fore-end, flat matted rib, 12 gauge with 30 or 32 in. barrels, 16 gauge with 28 and 30 in. barrels, w't 7 to 8½ lbs.....each $25.00

REMINGTON TRAP GUN.



Hammerless, With Automatic Ejector, Guaranteed for Nitro Powders.

No. KE —12 gauge, with automatic ejector, decarbonized steel barrels, choke bored, straight checkered grip and fore-end, rubber butt-plate, case-hardened frame and mountings, snap fore-end, flat matted rib, 30 in. barrels, w't 7 to 8 lbs.....each $27.50

No. KED—12 gauge, Damascus barrels, choke bored, plain finish walnut stock, pistol grip, 30 in. barrels, w't 7 to 8 lbs.....each 33.00

Regular length of stock 14 in., with drop from 2¾ to 3⅛ in. Any deviation requiring special labor will add $4.00 to list and entail shipment of gun from factory.

TEN IN A CASE.

Remington guns are made from selected materials which, after exhaustive tests, have proved best adapted for the purpose. These guns are carefully tested and all parts subjected to a close detail inspection while in process.

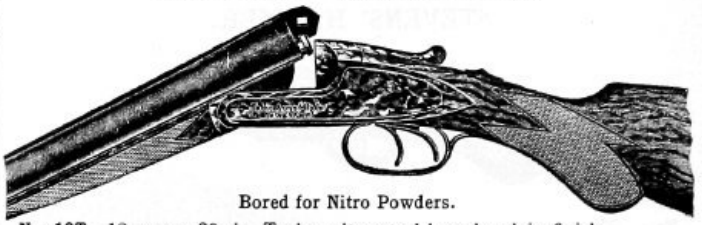
After shooting for accuracy, the arm is then required to pass a final inspection, which is very rigid and practically obviates the possibility of any guns not being up to the standard.

T. BARKER.

Top Lever, Extension Rib, Low Hammers.

No. 115—12 gauge, black steel barrels, extension rib, top lever, circular hammers, nickel-plated rebounding bar locks, mountings heavily engraved, snap fore-end, checkered stock and fore-end, black finish stock, full pistol grip, nickel plated iron butt-plate, left barrel choke bored, 30 or 32 in. barrels, w't 7 to 8¼ lbs.....each $13.00

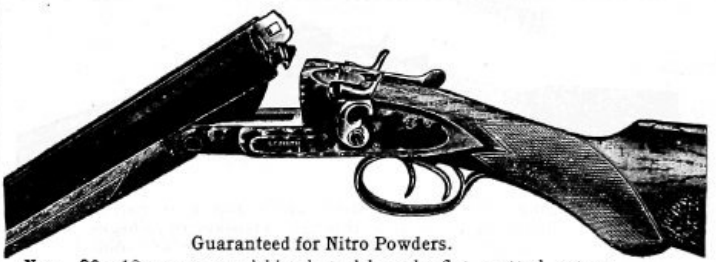
1909 TOBIN HAMMERLESS.



Bored for Nitro Powders.

No. 10T—12 gauge, 30 in. Trojan nitro steel barrels, plain finish, case-hardened frame, blued trimmings, checkered full or straight pistol grip, imported walnut stock, rubber butt-plate, left barrel full choke bore, right barrel modified, length of stock 14 in., drop 2¾ to 3 in., weight 7 to 7¾ lbs.....each $25.00

L. C. SMITH NEW MODEL HAMMER.



Guaranteed for Nitro Powders.

No. 90—12 gauge, royal blued steel barrels, flat matted extension rib, full bar action rebounding locks, rubber butt-plate, new style low circular hammers, case-hardened frame and blued guard, imported English walnut stock, checkered half pistol grip, checkered patent snap fore-end, both barrels full choke bored, 30 or 32 in. barrels, weight 7½ to 8½ lbs.....each $20.00

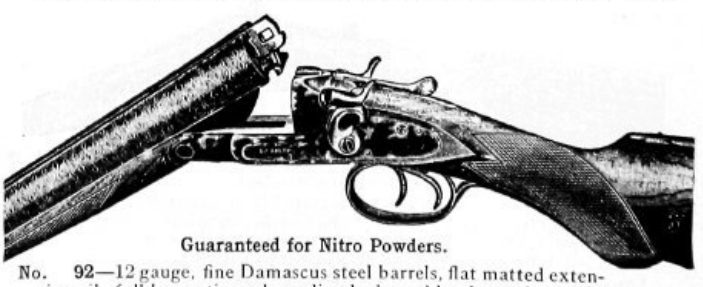
No. 1690—16 gauge, royal blued steel barrels, otherwise same as No. 90, 28 or 30 in. barrels, weight 7 to 7½ lbs.....each 20.00

The barrels are made from carefully selected steel toughened and hardened, and are similar in construction to Whiteworth Fluid, Crown and Siemens' steel barrels.

Guaranteed for Nitro Powders.

No. 91—12 gauge, fine English stub twist barrels, flat matted extension rib, full bar action rebounding locks, rubber butt-plate, new style low circular hammers, case-hardened frame and blued guard, imported English walnut stock, checkered half pistol grip, checkered patent snap fore-end, both barrels full choke bored, 30 or 32 in. barrels, weight 7½ to 8½ lbs.....each $23.00

No. 1691—16 gauge, fine English stub twist barrels, otherwise same as No. 91, 28 or 30 in. barrels, weight 7 to 7½ lbs....each 23.00



Guaranteed for Nitro Powders.

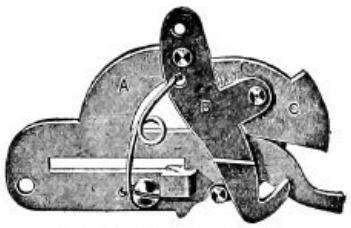
No. 92—12 gauge, fine Damascus steel barrels, flat matted extension rib, full bar action rebounding locks, rubber butt-plate, new style low circular hammers, case-hardened frame and blued guard, imported English walnut stock, checkered half pistol grip, checkered patent snap fore-end, both barrels full choke bored, 30 or 32 in. barrels, weight 7½ to 8 lbs.....each $25.00

No. 1692—16 gauge, fine Damascus steel barrels, otherwise same as No. 92, 28 or 30 in. barrels, weight 7 to 7½ lbs.....each 25.00

TWELVE IN A CASE.

DOUBLE BARREL SHOT GUNS.

L. C. SMITH HAMMERLESS.



Single Trigger Mechanism.

Single Trigger Mechanism, Complete.

No. 00 —12 or 16 gauge, embodies all the simplicity of the other grades, combined with the new Armour steel barrels, English walnut stock, half pistol grip, checkered and well finished, without embellishments, 12 gauge 30 or 32 in. barrels, 16 gauge 28 or 30 in. barrels.....each $37.00

No. 00A—12 or 16 gauge, with automatic ejector, 30 in. barrels, otherwise same as No. 00.....each 47.00

No. 0 —10, 12, 16 or 20 gauge, a well made gun with all improvements to meet the demands of sportsmen for a reliable gun at low price, No. 0 Damascus barrels, choke bored, English walnut stock, half or full pistol grip, checkered and well finished, 10 and 12 gauge, 30 or 32 in. barrels, 16 gauge 28 or 30 in. barrels, 20 gauge 26 in. barrels.....each 50.00

No. 0A—12 gauge, with automatic ejector, 30 in. barrels, otherwise same as No. 0.....each 65.00

No. 1 —12 gauge, a thoroughly well-made gun with all latest improvements, No. 1 Damascus barrels, choke bored, line engraving, English walnut stock, full pistol grip, checkered and finished in the best style, 30 in. barrels.....each 67.50

No. 1A—12 gauge, with automatic ejector, otherwise same as No. 1.....each 80.00

No. 2 —12 gauge, good Damascus steel barrels, or the famous Crown steel in 12 or 16 gauge to order, good imported English walnut stock, checkered and engraved, half or full pistol grip, 30 in. barrels.....each 87.50

No. 2A—12 gauge, with automatic ejector, 30 in. barrels, otherwise same as No. 2.....each 102.50

No. 3 —12 gauge, fine Damascus steel barrels, or the new nitro steel in 12 or 16 gauge to order, fine imported English walnut stock, very nicely checkered and engraved, half or full pistol grip, 30 or 32 in. barrels★.....each 107.50

No. 3A—12 gauge, with automatic ejector, 30 in. barrels, otherwise same as No. 3★.....each 122.50

No. P—PIGEON, 12 or 16 gauge, Crown steel barrels, thick both at breech and muzzle, especially adapted to stand the tremendous strain of many excessive charges of nitro powder, finest imported French or English walnut stock, very finest checkering, engraved, fine finish, straight, half, three-quarters or full pistol grip, 28, 30 or 32 in. barrels★.....each $135.00

No. PA—PIGEON, 12 or 16 gauge, with automatic ejector, otherwise same as No. P★.....each 147.00

No. 4 —10, 12 or 16 gauge, very fine Damascus steel barrels, or new nitro steel in 12 or 16 gauge to order, very fine imported English walnut stock, beautifully checkered, very finely engraved, half or full pistol grip, 28, 30 or 32 in. barrels★....each 165.00

No. 4A—10, 12 or 16 gauge, with automatic ejector, otherwise same as No. 4★.....each 175.00

No. 5 —10, 12 or 16 gauge, very fine Damascus or new nitro steel barrels in 12 or 16 gauge to order, choice imported English or French walnut stock, elaborate checkering, very fine engraving, half or full pistol grip, 28, 30 or 32 in. barrels★..each 215.00

No. 5A—8, 10, 12 or 16 gauge, with automatic ejector, otherwise same as No. 5★.....each 225.00

No. MA—MONOGRAM, 8, 10, 12 or 16 gauge, with automatic ejector, otherwise same as No. M★.....each 375.00

No. A2—10, 12 or 16 gauge, finest Damascus or Whitworth fluid compressed steel barrels, automatic ejector, choice English or French imported walnut stock, very fine checkering and elaborate engraving, very finest finish in every detail, 28, 30 or 32 in. barrels, 12 and 16 gauge to order★.....each 400.00

No. A3—10, 12 or 16 gauge, finest Whitworth fluid compressed steel barrels, automatic ejector, regular or Monte Carlo imported figured stock, elegantly damaskeened works, finely engraved and elaborately ornamented with oak leaf bas-relief, the lightning in the sides of barrels inlaid with gold, pistol or straight grip, 26, 28, 30 or 32 in. barrels★.....each 750.00

★*The following guns are made only to special order and are not carried in stock: Nos. 3, 3A, P, PA, 4, 4A, 5, 5A, MA, A2, A3 and one-trigger of all grades.*

Any of above guns can be furnished in 20 gauge from factory only, except No. 0 which we carry in stock.

Hunter One-Trigger Mechanism—Can be fitted to any new or old Smith hammerless gun.....extra, $25.00

The Hunter One-Trigger is the latest scientific addition to a double barrel gun. It has been thoroughly tested, and works perfectly. The one-trigger does away with flinching, and enables a shooter to use both barrels without changing his grip.

The pull is short, clean and quick; both barrels can be discharged just as fast as the trigger is pulled and *cannot* be discharged unless trigger *is* pulled.

The selective button controlling the order of firing is conveniently located at the side of trigger. Pushing the button backwards exposes the letter L indicating left first, moving it forward concealing L and exposing R, indicates right first. The sportsman can fire right and left, left and right; all rights, all lefts, as the button is never moved unless the order of firing is to be reversed; there is exactly the same control over the firing as in a two-trigger gun.

Old guns will have to be sent direct to factory, Hunter Arms Co., Fulton, N. Y., charges prepaid, to have the one-trigger fitted.

All Smith guns fitted with one-trigger will have to come from factory to order. We do not carry them in stock.

DOUBLE BARREL SHOT GUNS.

PARKER HAMMERLESS.

Choke Bored, for Hard Shooting.

All the working parts of these guns are attached to the solid iron work (instead of portions being attached to the wood), thus rendering the action of this gun in all climates positive, and not liable to be thrown out of adjustment by the action of the atmosphere on the wood. For safety, the guns are so constructed that the hammers can never be lightly let down to rest on loaded shells—an operation that is very dangerous—and they are guarded against the possibility of its being done. The safety for locking triggers is automatic, also positive and absolutely safe. The cocking is easy and smooth from start to full cock. The action frame is long, insuring much greater strength and durability than is possible to get with the short action used in most foreign-made hammerless guns. The barrels can be detached and attached at all times, same as in hammer guns, without reference to their being cocked or not, thus avoiding the necessity of cocking before replacing the barrels. Particular attention has been paid to the proper shape and distribution of materials, and the greatest strength will be found where the strain is most severe, and where the wear and tear is greatest. In these guns will be found that symmetry of proportion, beauty of outline and perfection of balance for which the Parker guns are so justly celebrated. Stocks (measured from center of front trigger to center of butt-plate), 14 to 14½ in. Shorter or longer barrels and different stocks to special orders and prices, according to extra amount of labor.

No. VH—12 gauge, Vulcan blued steel barrels, American walnut stock, checkered pistol grip and fore-end, hard rubber butt-plate, 30 or 32 in. barrels, drop 2¼ to 3 in., length of stock 14 in., weight 7½ to 8 lbs. ..... each $ 50.00

No. VH—16 gauge, otherwise same as above, 28 or 30 in. barrels, weight 6½ to 7½ lbs. ..... " 50.00

No. VH—20 gauge, otherwise same as above, 28 in. barrels, weight 6 to 6¾ lbs. ..... " 50.00

No. PH—12 gauge, fine twist barrels, American walnut stock, engraved and checkered pistol grip, hard rubber butt-plate, 30 in. barrels, drop 2½ to 3⅛ in., weight 7 to 8 lbs. ..... each 65.00

No. GH—12 gauge, fine Damascus steel barrels, fine figured American or imported stock, checkered and engraved pistol grip, hard rubber butt-plate, 30 or 32 in. barrels, drop 2½ to 3⅛ in., weight 7 to 8 lbs. ..... each 80.00

No. GH—16 gauge, otherwise same as above, 28 and 30 in. barrels, drop 2½ to 3⅛ in., weight 6¼ to 7½ lbs. ..... " 80.00

No. DH—12 gauge, fine Damascus steel barrels, fine imported walnut stock, silver shield, fine checkering and engraving, skeleton butt-plate, pistol grip, 30 in. barrels, drop 2½ to 3⅛ in., weight 7 to 8 lbs. ..... each 100.00

No. DHT—12 gauge, Titanic blued steel barrels, otherwise same as No. DH. ..... " 100.00

Automatic Ejector.

No. EVH—12 gauge, Vulcan blued steel barrels, 30 in. barrels, otherwise same as No. VH ..... each $ 75.00

No. EGH—12 gauge, fine Damascus steel barrels, otherwise same as No. GH ..... " 105.00

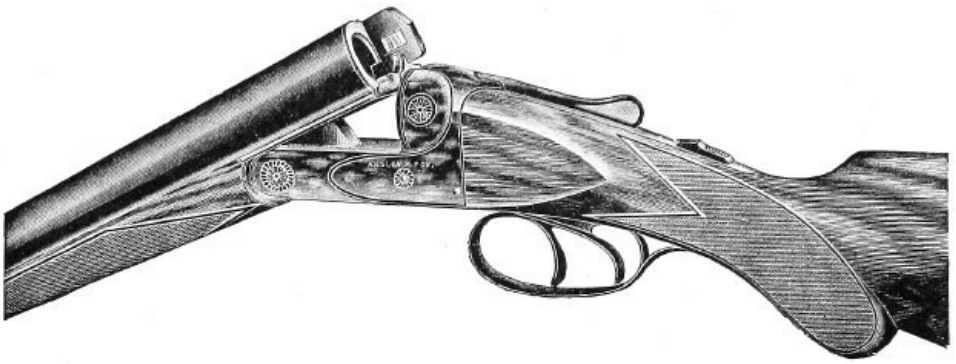
DOUBLE BARREL SHOT GUNS.

FOX HAMMERLESS.



THE ANSLEY H. FOX HAMMERLESS SHOT GUN embodies many points of superiority.

The barrels are genuine Krupp or Whitworth Fluid Steel. They are tested at the European Government proof houses before they are exported, and are again subjected to severe tests after the gun is completed. These barrels are recognized as standards of excellence, and their strength and shooting qualities cannot be excelled.

The gun stocks are made of imported English or Circassian walnut, and besides being thoroughly seasoned, they are carefully selected for quality of wood, direction of grain and fineness of figure.

The mechanism is the acme of simplicity and strength. All of the working parts are made of tool steel forgings, and they are finely finished and polished. The parts are all interchangeable, being made accurately to gauges.

The barrels are locked securely to the frame by a rotary bolt through the extension-rib, the bolt being tapered so as to take up wear in all directions and keep the gun tight for all time. Our guns are absolutely guaranteed to shoot any smokeless powder and never shoot loose.

Spiral springs operate the hammers and top lever, and we guarantee both mainsprings and top lever spring against breakage at any time.

All friction is done away with, which causes the gun to cock so easily that the mere weight of the barrels is practically sufficient to cock the locks, and the gun opens as easily as a hammer gun.

Because of the small number of parts in the mechanism, the frame can be made very compact and light, yet remain perfectly strong, which permits the manufacture of 12-gauge guns as light as 6¼ pounds, and also allows beautiful lines of proportion and that much sought after balance which is simply impossible in guns having complicated mechanism and the large heavy frames thereby necessitated.

No. AF—12 Gauge, genuine Krupp Fluid steel barrels, concave matted rib with rotary bolted extension, handsome dark English walnut stock, pistol grip, Deeley & Edge pattern fore-end, hard rubber butt-plate, automatic safety, perfectly balanced, engraved and finished in every detail; 30 and 32 in. barrels, weight 7 to 8 lbs.....each $50.00

No. CFE—12 Gauge, automatic ejector, otherwise same as No. CF★..... " 115.00

★*Nos. BFE and CFE we can furnish from factory only.*

LEFEVER DOUBLE BARREL SHOT GUNS.

HAMMERLESS.

Lefever guns have for about half a century maintained an enviable reputation among sportsmen for accuracy, simplicity of mechanism, and correct balance. In the manufacture of these guns, considerable attention has been paid to the compensating features. At such points where the tendency to wear and strain is greatest, will be found materials of the greatest resistance, all properly distributed so as to overcome such action.

All of these guns are fitted with an improved compensating bolt. With this improvement, it is impossible for the gun to open when discharged with heavy loads, which often break off the heads of shells, or through defective primers allow gas to escape into the action, sufficient to throw open any gun having a bolt or bolts with lateral movement.

The locks are attached to the solid gun frame, and not to the lock plates. This gives them a solid and rigid bearing. The lock plates are easily unscrewed and removed without disturbing any other parts, permitting the oiling, examining and testing of the mechanism.

A failure to cock these guns can be instantly detected by means of the indicator projecting from each lock plate when the gun is at full cock. The indicators are independent of each other and are exposed only when gun is at full cock. They are supplied on all of these guns.

Durston Special.

No. DS—12 or 16 gauge, "Dura-Nitro steel" (black) barrels, imported walnut stock, checkered half pistol grip, 30 in. barrels, bored for trap, field and brush shooting, 12 gauge weight 7 to 8 lbs., 16 gauge weight 6¼ to 7 lbs. ..... each $35.00

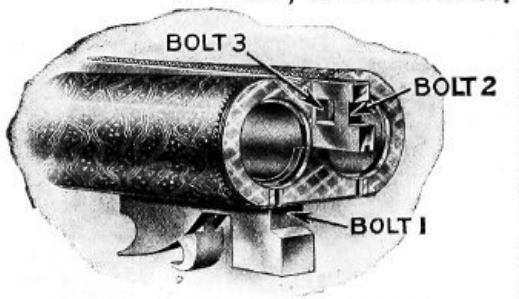
TEN IN A CASE.

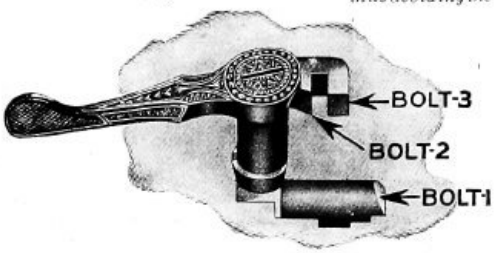
DOUBLE BARREL SHOT GUNS.

ITHACA, HAMMERLESS.



Showing Three Bolts of Locking Mechanism.

The shooting qualities of every Ithaca gun are fully warranted by the manufacturers, and the bolt fastenings guaranteed never to shoot loose with black or nitro powders. They have rebounding locks and independent gas and dirt-proof plungers, thus avoiding the danger of exploding primers when strikers are down, and keeping all gas and burnt powder out of locks. They are fitted with three solid bolt fastenings as shown in illustrations which are built on a bevel to take up their own wear and are guaranteed never to shoot loose or allow gun to fly open in discharging.



No. 59—12 gauge, blued smokeless steel barrels, locking bolt through rib, both barrels choked, matted hollow ground rib, checkered walnut stock and fore-end, pistol grip, automatic safety catch, blued guard, ornamented rubber butt-plate, case-hardened frame, 30 or 32 in. barrels, w't 7 to 8¼ lbs.....each $20.00

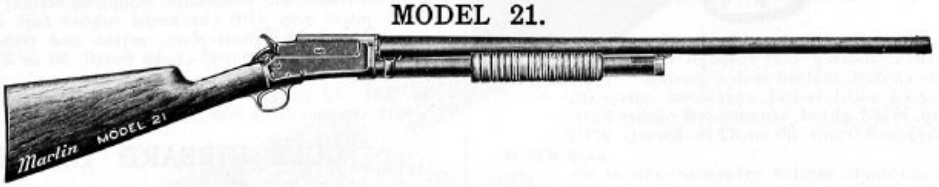
No. 16113CB—16 gauge, otherwise same as No. 113CB, 28 or 30 in. barrels, w't 6½ to 7½ lbs.....“ 16.00

MARLIN REPEATING SHOT GUNS.

MODEL 21.



Take Down, Straight Grip, Six Shots.

No. 21 A—12 gauge, special rolled steel barrel, for smokeless or black powders, blued frame, rubber butt-plate, regular stock 13½ in., drop at comb 1⅝ in., drop at heel 2½ in., length of barrel 26, 28, 30 or 32 in., full choked, modified choke, or cylinder bore, weight 6¾ to 7¼ lbs. each..... $25.60

The barrel has a tensile strength of about 66,000 lbs. to the square inch, and is guaranteed to target more than 325 pellets in a 30 in. circle at 40 yds., using 1¼ oz. No. 8 chilled shot. Fully proved with excessive loads.

The solid top frame and side ejector insure safety, comfort and convenience, the peculiar Marlin breech bolt keeps out bad weather—rain, snow and sleet—also dirt, leaves, twigs and sand.

With one-third less parts than any other repeating shot gun, the working parts engage directly with one another, the mechanism is extremely simple, quick and easy of operation, without a single weak point. The double extractors, two-piece automatic hang fire safety recoil block and the many improvements in the working parts put this model far ahead of any similar gun.

The barrel is a clean, perfect tube with a uniform distribution of metal on all sides, allowing uniform expansion when fired and producing the full, round, evenly distributed pattern for which Marlin guns are famous. The barrel is made extra heavy at the breech, resulting in increased range and penetration.

For trap shooters, duck shooters and others requiring a close shooting, hard hitting, long range gun, this model, 12 gauge full choke repeater, is an ideal gun.

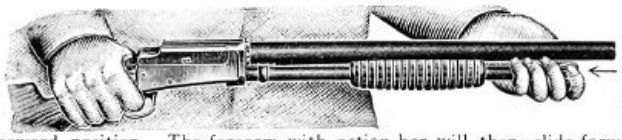
The take-down feature allows the gun to be taken down in a moment's time and packed in a space the length of the barrel. It also allows the shooter to have an extra interchangeable barrel portion complete; trap or duck gun can be quickly changed into a brush gun and still have the stock and action the shooter is accustomed to.

MARLIN REPEATING SHOT GUNS.

MODEL 24 TAKE DOWN.

The Model 24 has the Marlin solid top, side ejector and closed-in breech. It can't freeze up with rain, snow or sleet; rain can't run into the action and swell the shells in magazine; dirt, leaves, twigs and sand are also excluded from the action. The mechanism is simple and strong; it has one-third less parts than any other make of repeater; and the double extractors pull any shell. The automatic recoil safety device makes it the safest breechloading gun built.

The steel-lined, metal-capped forearm and the simplest, strongest and quickest take-down construction are special features of the Model No. 24.

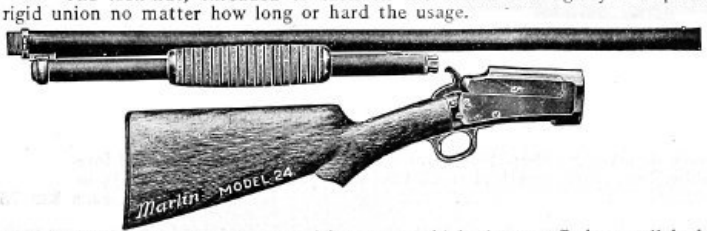


To take down the gun for cleaning or packing: Press the latch at front end of magazine and draw tube forward; the catch on left side holds the tube in this forward position. The forearm with action bar will then slide forward, and it is only necessary to unscrew the barrel.

This improved take-down construction does away with the forearm screws and other small parts; there are no sharp edges or corners; the gun can be taken apart in ten seconds anywhere, yet the union of barrel and frame is always as strong and rigid as in a solid frame gun.

The barrel turns into the frame with a large, square, left-hand thread that leaves exactly the same amount of metal at this point of greatest strain, with exactly the same distribution as in a solid frame, non-take-down gun.

The lock-nut, threaded to turn on the barrel and tightly clamped abutting the front end of frame, takes up all wear and insures a firm and rigid union no matter how long or hard the usage.

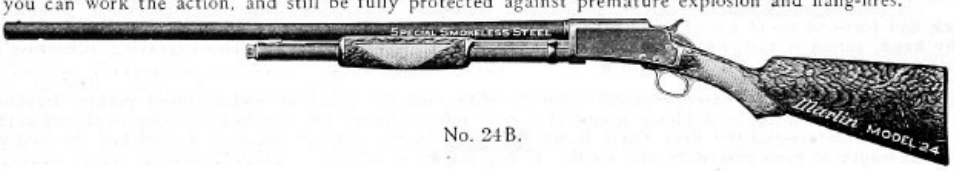


The improved automatic recoil block hooks onto the locking bolt when closing the action and holds the gun firmly locked until after the explosion of the cartridge, when it is instantly and automatically released by the recoil.

It prevents the possibility of opening the action just as the cartridge is exploding and removes all danger from hang-fires, for no matter how long it may take the cartridge to explode after the primer is struck by the firing pin, the gun remains tightly locked until after the explosion.

To operate the gun when empty or to eject a defective cartridge, first press the push-pin at right of hammer (which throws off the recoil lock), then operate in the regular manner.

This recoil block and the safety construction make the Model 24 the safest breechloading gun built, for you can hold back the trigger and shoot the gun just as fast as you can work the action, and still be fully protected against premature explosion and hang-fires.



No. 24B.

No. 24A—12 gauge, 6 shots, special rolled steel barrel, frame cut from solid drop forging, blued finish frame, fine straight grained American walnut stock, hard rubber butt plate, chambered for 2¾ or 2⅝ in. shells, specially bored for both black and smokeless powders, full choke, modified choke or cylinder bored, length of barrel 26, 28, 30 or 32 in., length of stock 13½ in., 1⅝ in. drop at comb, 2½ in. drop at heel, w't 7½ to 7¾ lbs.....each $23.25

The barrel has a tensile strength of 66,000 lbs. to the square inch. All full choked barrels are guaranteed to pattern more than 325 pellets of No. 8 chilled shot in a 30 in. circle at 40 yds.

The forearm is of a new shape that fills the hand and feels better than the old style. It is also of black walnut, scored for quick handling, finely finished, reinforced inside with a steel core and on the ends by metal ferrules, taking all strain off the wood. The end pieces both extend over the wood and hold it in place even if it should split.

No. 24B—12 gauge, special smokeless steel barrel, grip and fore-end handsomely checked by hand, otherwise the same as No. 24A, length of barrel 26, 28 or 30 in. w't 7½ to 7¾ lbs.....each $30.75

The grip and the fore-end are both handsomely checked by hand which aids in holding and sighting, as well as in the rapid manipulation of the action. It is intended for the man who wants every advantage of material and workmanship without expensive ornamentation.

The barrel of this gun is made from the finest quality of steel obtainable and made especially for this use. It has a very high elastic limit and a tensile strength of about 100,000 lbs. to the square inch. Special care is given to the boring of this grade.

No. 24C—12 gauge, special smokeless steel barrel, stock and fore-end are of selected fancy figured walnut, extra fine finish on the wood, stock and fore-end are neatly checkered by hand, action is tastily ornamented with a good quality of hand engraving, otherwise the same as No. 24A, length of barrel 26, 28 or 30 in., w't 7½ to 7¾ lbs.....each $40.80

The imported Circassian walnut stock is specially selected for figure and color and oil finished by the London process which gives a rich dull surface and brings out all the beauty of the grain and does not show scratches like highly polished wood.

The elaborate engraving and checking are the highest type of hand work by experts of long experience, and combine with the beautiful stock and the imported Damascus barrel to make this the finest repeating gun that can be bought.

No. 24D—12 gauge, imported Damascus barrel, imported Circassian walnut stock specially selected for figure, triggers and all screws in the action are of tool steel and heavily gold plated, elaborately engraved and checked by hand, otherwise the same as No. 24A, length of barrel 26, 28 or 30 in., w't 7½ to 7¾ lbs.....each $90.00

GUARANTEED FREE FROM IMPERFECTIONS IN MATERIAL AND WORKMANSHIP.

MARLIN REPEATING SHOT GUNS.

MODEL 16, "TAKE DOWN."

The Model 16 is not a 12-gauge gun with a 16-gauge barrel fitted, but is properly proportioned in every part, finely balanced, very quick and easy in operation, and it is the only light-weight repeating shot gun in the world. It is fully as effective in all ordinary forms of bird and small game shooting as any 12-gauge gun, and, by reducing the weight of gun and shells carried, it adds greatly to the enjoyment of the day's sport.

No. 16A—16 gauge, 6 shots, special rolled steel barrel, bored for black or nitro powders, blued frame, pistol grip, walnut stock, hard rubber butt plate, length of stock 13½ in., 1⅝ in. drop at comb, 2½ in. drop at heel, length of barrel 26 or 28 in., w't 6⅛ to 6¼ lbs....each $25.00

This is a light quick-handling, finely balanced gun, built similar to the well known 12-gauge Marlin repeater, but smaller, neater and trimmer in every part, to handle the smaller shells. Uses black and smokeless loads in 2¾ or 2⅝ inch shells, has all the range and penetration of a 12-gauge gun and is the only lightweight repeating shotgun in the world. A superior gun for birds, rabbits, squirrels, for ladies' use, for the boy, and for the man who appreciates the reduced weight of gun and shells to be carried.

No. 16B—16 gauge, 6 shots, special smokeless steel barrel, bored for black or nitro powders, blued frame, walnut pistol grip stock and fore-end, grip and fore-end both handsomely checked by hand hard rubber butt plate, length of stock 13½ in., 1⅝ in. drop at comb, 2½ in. drop at heel, length of barrel 26 or 28 in. w't 6⅛ or 6¼ lbs.★.....each $32.75

This gun has a "Special Smokeless Steel" barrel, which has a very high elastic limit, and a tensile strength of about 100,000 pounds to the square inch. Special attention is given to the boring and finishing of this grade. The action is reliable, simple and easy to operate. The grip of the stock and fore-end are both handsomely checked by hand, which not only aids in holding and sighting, but assists in the rapid manipulation of the action.

No. 16C—16 gauge, stock and fore-end are of a selected quality of fancy figured walnut, extra fine finish given to wood, stock and fore-end are neatly checked by hand, action is tastily relieved and ornamented with a good quality of hand engraving, otherwise the same as No. 16B, length of barrel 26 or 28 in., w't 6⅛ to 6¼ lbs.★.....each $44.50

No. 16D—16 gauge, high quality Damascus barrel, specially bored and finished, stock and fore-end are finest quality Circassian walnut, which is finely finished by the London process of filling, giving it a rich dull finish that does not show scratches as plainly as the highly polished wood, checking on stock and fore-end the very finest hand work, screws and triggers are of tool steel heavily gold plated, otherwise the same as No. 16B, length of barrel 26 or 28 in., w't 6⅛ to 6¼ lbs.★.....each 90.00

We do not carry Nos. 16B, 16C and 16D in stock, and will ship all orders from factory.

MODEL 26.

No. 26A—12 gauge, 6 shots, special rolled steel barrel, bored especially for black or smokeless powders, chambered for 2¾ to 2⅝ in. shells, solid frame, straight grip stock, length of barrel, 26, 30 or 32 in., full choke bored, w't 7 to 7⅛ lbs.....each $21.00

This gun is extremely clean, simple and light, has the double extractor and improved safety construction and is made of the best material in every part.

No. 26AR—Riot Gun, 12 gauge, 6 shots, for buckshot loads, cylinder bored, length of barrel 20 in., w't 6⅞ lbs.....each $21.00

***This is an extra** short and light gun, open bored, for buckshot especially. It is a most deadly arm for guards of all kinds, watchmen and express messengers, and is kept handy in many banks and households as a protection against burglars, thieves and robbers.*

REPEATING SHOT GUNS.

MARLIN MODEL 1240 TRAP, "TAKE DOWN."

No. 1240—12 gauge, 6 shots, special smokeless steel barrel, full choke bored, frame finest quality gun frame steel cut from the solid drop forging, frame and breech bolt have blued finish, size ejection, closed top, stock and fore-end are Circassian walnut with oil finish and fine hand checking, straight grip, hard rubber butt-plate, stock 14 in. long, 1¾ in. drop at comb, 1 13/16 in. drop at heel, 30 in. barrel, weight about 7¾ lbs.....each $38.00

The barrel is special smokeless steel—nearly twice as hard and strong as the rolled steel barrel used in other trap guns—specially built and bored for trap loads. It is guaranteed to make the extremely close, hard hitting, ideal trap gun pattern—more than 325 pellets of No. 8 chilled shot in a 30-inch circle at 40 yards.

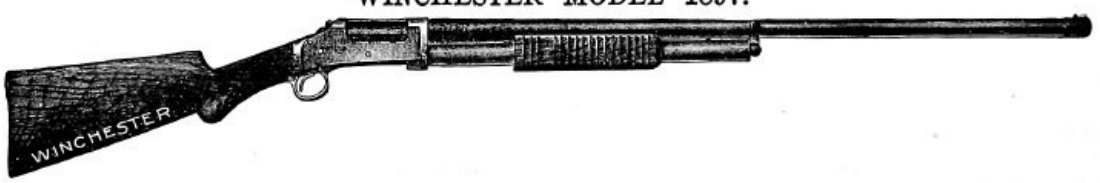
Like every other Marlin repeater, the trap gun has the Marlin solid top, side ejector and closed-in breech. It can't freeze up with rain, snow or sleet; rain can't run into the action and swell the shells in magazine. Dirt, leaves, twigs and sand are also excluded from the action. The closed-in breechbolt not only protects the gun and the shooter but also gives a symmetrical breech that aids in sighting and helps good shooting.

EXTRA BARRELS FOR MARLIN GUNS.

26 or 28 in., blued steel, cylinder, modified or full choke bored.....each $13.75
30 in., blued steel, full choke bored..... " 13.75

It is often desirable to have two or more barrel parts complete, to interchange on the same action and butt-stock. So superior are the design and workmanship on Marlin repeaters, that this can be done without sending the action to the factory to have the extra parts specially fitted. Any Marlin barrel part of any grade will fit any Marlin action of any grade. A useful combination is the regular 30 or 32 in. full choked gun, suitable for ducks, live birds, targets, etc., and an extra barrel part, complete, for brush work.

WINCHESTER MODEL 1897.



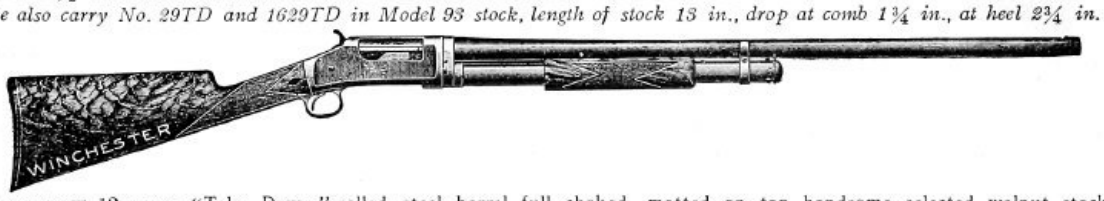
No. 29—12 gauge, 6 shots, rolled steel blued barrel, full choked, rubber butt-plate, plain half pistol grip stock, length 13¾ in., drop at comb 1¾ in., at heel 2½ in., 30 or 32 in. barrel, 30 in. only in modified choke, weight 7¾ lbs.....each $25.00

We also carry No. 29 guns 30 in. barrel full choke in Model 93 stock, length of stock 13 in., drop at comb 1¾ in., at heel 2¾ in.

WINCHESTER MODEL 1897 "TAKE DOWN."

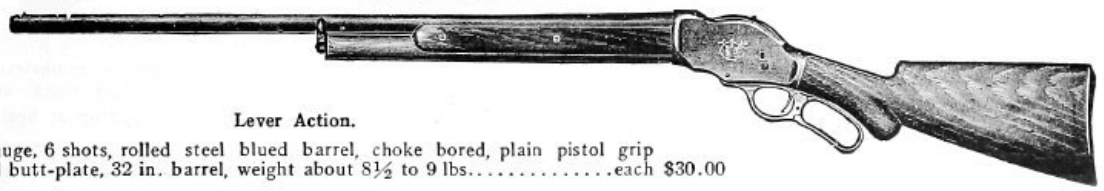
No. 29TD—12 gauge, "Take Down," 6 shots, rolled steel barrel, either full choked, modified or cylinder rubber butt-plate, plain pistol grip stock, length 13¾ in., drop at comb 1¾ in., at heel 2½ in., 28, 30 or 32 in. barrel, weight 7½ to 8 lbs.....each $27.00
No. A29TD—30 in. full choke barrel, with *extra* 26 in. cylinder bored barrel, rubber butt-plate, in both Model 97 and Model 93 stocks, otherwise same as No. 29 T. D.....each 42.00
No. B29TD—30 in. full choke barrel, with *extra* 28 in. modified choke barrel, otherwise same as No. 29TD..... " 42.00
No. 29TD—Rubber butt-plate, 26 in. barrel, either full choked, modified choked, or cylinder bored, otherwise same as No. 29TD ..... " 27.00
No. 1629TD—16 gauge, "Take Down," 28 in. barrel, either full choked or modified, otherwise same as No. 29TD, length 13½ in., drop at comb 1¾ in., at heel 2½ in.....each 27.00

We also carry No. 29TD and 1629TD in Model 93 stock, length of stock 13 in., drop at comb 1¾ in., at heel 2¾ in.



No. 139TD—TOURNAMENT, 12 gauge, "Take Down," rolled steel barrel, full choked, matted on top, handsome selected walnut stock, well shaped straight grip, checked rubber butt plate, 14 in. stock, drop at comb 1¾ in., drop at heel 1 13/16 in., 30 in barrel, w't 7¾ lbs....each $42.00
No. 129TD—12 gauge, "Take Down," "Trap," rolled steel barrel, full choked, fancy walnut hand made oil finished stock, with checked straight grip, checked rubber butt-plate, 30 in. barrel, w't about 7¾ lbs.....each 52.00

WINCHESTER MODEL 1901.



Lever Action.

No. 030—10 gauge, 6 shots, rolled steel blued barrel, choke bored, plain pistol grip stock, steel butt-plate, 32 in. barrel, weight about 8½ to 9 lbs.....each $30.00

REMINGTON AUTOMATIC SHOT GUNS.

Browning's Patent.

No. 1P —"STANDARD," 12 gauge, "Take Down," Remington highest quality steel barrel, full choke modified or cylinder bored, blued frame and mountings, 5 shots, side ejection, matted receiver, walnut stock, pistol grip, rubber butt-plate, length of barrel 28 in., length of stock 14⅜ in., drop at comb 1⅞ in., drop at heel 2½ in., weight 7¾ lbs. ..... each $40.00

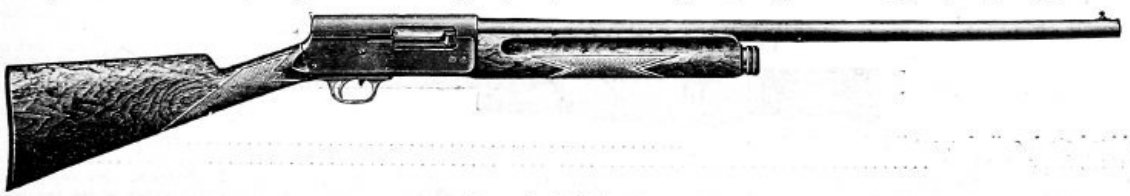
No. 1PB—28 in. full choke, with *extra* 26 in. cylinder bored barrel, otherwise same as No. 1 ..... " 56.00

No. 2P —"SPECIAL," 12 gauge, "Take Down," Remington highest quality steel barrel, full choke or cylinder bored, blued frame and mountings, 5 shots, side ejection, matted receiver, selected English walnut stock, pistol grip, *checkered grip and fore-end*, rubber butt-plate, length of barrel 28 in., length of stock 14⅜ in., drop at comb 1⅞ in., drop at heel 2½ in., weight 7¾ lbs. ..... each 50.00



Browning's Patent.

No. 3P —"TRAP," 12 gauge, "Take Down," Remington highest quality steel barrel, choke bored, blued frame and mountings, 5 shots, side ejection, matted receiver, selected English walnut stock, *checkered straight grip and fore-end*, rubber butt-plate, length of barrel 28 in., length of stock 14 in., drop at comb 1½ in., drop at heel 2¼ in., weight 7¾ lbs. ..... each $50.00

No. 3AP—28 in. full choke barrel, with *extra* 28 in. cylinder bored barrel, otherwise same as No. 3 ..... " 66.00

No. 4P —TOURNAMENT, 12 gauge, "Take Down," Remington highest quality steel barrel, choke bored, blued frame and mountings, 5 shots, side ejection, matted receiver, fine English walnut stock, checkered pistol grip and fore-end, rubber butt-plate, extra scroll engraving, fine checkering, length of stock 14⅜ in., drop at comb 1⅞ in., drop at heel 2½ in., weight 7¾ lbs. On this gun any length or drop of stock desired will be made to order without additional charge ..... each 70.00

In loading gun, draw operating slide back, drop a shell in the receiver and press button with finger of left hand. This allows the carrier to be pressed down and the shells to be inserted in the usual manner, from the bottom. Shells can be put in the magazine at any time when breech is closed, whether the magazine is empty or partly full. The breech will remain open after the last shot is fired. To take down, unscrew the magazine cap while holding the fore-end down so the cap will unscrew freely and slide the barrel and fore-arm forward and off.

REMINGTON SOLID BREECH REPEATING SHOT GUNS.

MODEL 1908, HAMMERLESS.

No. 150—"STANDARD," 12 gauge, "Take Down," Remington steel barrel, 6 shots, choke or modified bored, blued finish, matted rib on receiver, walnut stock and fore-end, pistol grip, length of stock 13¾ in., 2½ in. drop at heel, drop at comb 1½ in., length of barrel 30 in., weight 7½ lbs. ..... each $27.00

No. 160—"FIELD," 12 gauge, "Take Down," Remington steel barrel, 6 shots, cylinder bored, blued finish, matted rib on receiver, walnut stock and fore-end, pistol grip, length of stock 13¾ in., drop at heel 2½ in., drop at comb 1½ in., length of barrel 26 in., weight 7¼ lbs. ..... each 27.00

IVER JOHNSON SEMI-HAMMERLESS.

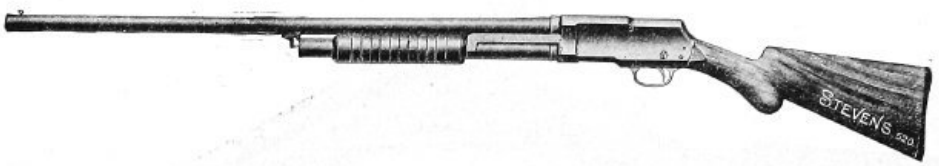
Ring Action, Automatic Ejector.

No. 298—12 gauge, hammer-forged, high carbon steel barrel, rebounding lock, case-hardened steel frame, blued steel guard, highly polished black walnut stock, full pistol grip with rubber cap, steel tipped snap fore-end, rubber butt-plate, 30 or 32 in. barrel, w't about 6¼ lbs., - - - - - - each $8.00

These guns have what is termed a ring action; the ring for breaking the gun being situated just in front of the trigger. Every requisite of a high-class gun is embodied in their construction.

STEVENS' REPEATING SHOT GUNS.

BROWNING PATENT.



No. 520—12 gauge, Stevens' compressed forged steel barrel, cylinder bored, black oxide finish, drop forged receiver, six shots, side ejection, walnut pistol grip stock, 30 in. barrel, w't about 7¾ lbs.....each $27.00

This is a practical and up-to-date gun in every detail of its construction and design. The barrel used in the manufacture of this gun is first compressed and is then forged into shape, thus making it as strong as it is possible to make a shot gun barrel. It is finished in black oxide which gives it a beautiful and lasting appearance.

The receiver is a solid drop forging, and, in the manipulation of the gun, none of the interior parts protrude that usually interfere with the pleasure and safety of shooting a repeating shotgun. This is one of its most valuable features. It has the same black oxide finish as the barrel. The tangs to which the stock is fitted are extra long and add strength to a stock at its weakest point. Shells are ejected from the side which is the most popular method in use as the shells are ejected away from the shooter.

The slide handle is unlocked by the recoil immediately after the discharge of shell, and by the backward motion of the slide handle, the discharged shell is drawn out of chamber and at the same time the loaded shell starts out of the magazine onto the lifter. By this method, the gun can be fired, without clogging, as fast as it is possible for a shooter to work the slide-handle. This is a feature contained in no other repeating shot gun. The slide handle is metal lined and capped at both ends making it absolutely indestructible.

The locking block is visible and is made of half-inch square tempered steel, and, when gun is locked, can be plainly seen level with top of the receiver. It is a great satisfaction for a shooter to know that his gun is absolutely LOCKED and cannot be discharged until it is LOCKED and slide handle is locked forward.

In opening gun, the firing pin is drawn back and locked and STAYS LOCKED until the gun is closed and the locking block is in its proper position.

The locking nut is so constructed that it takes up all wear at the take down. It can be readily seen when putting the gun together that by turning the magazine tube the lock nut is forced against the receiver and takes up the wear, if any, every time the gun is put together.

The top of the receiver has been designed with a view of making an easy and accurate sighting gun. It can be readily seen that the short matted surface milled in the top of receiver just the proper distance from the eye prevents blurring.

SINGLE BARREL SHOT GUNS.

VICTOR.

No. 211 —12 gauge blued rolled steel barrel, choke bored for nitro powders, low rebounding hammer, top lever, case hardened frame, walnut stock, pistol grip, snap fore-end, fancy rubber butt-plate, 28, 30 or 32 in. barrel, w't 7 to 7½ lbs.....each $6.50

ONE DOZEN IN A CASE.

500 SHOT KING REPEATER.

Shoots 500 Times Without Reloading.

No. 5015—Polished nickel steel, black walnut stock, Rocky Mountain front sight, rear peep sight, hammerless, shoots BB shot, all parts interchangeable, length 34 in., weight 1½ lbs. .....per dozen $18.00

The King 500 Shot is a hammerless magazine gun, that for accuracy, for penetration and for simplicity of construction is a marvel. Loads automatically each time the gun is broken down to compress the spring. The magazine holds 500 air rifle shot and each shot is swaged to a size as it enters the barrel, thus giving it greater force and accuracy. Every gun is carefully sighted and tested before leaving the factory, and every one is guaranteed.

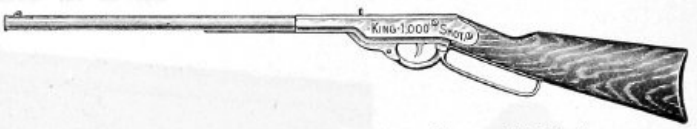
ONE DOZEN IN A CASE.

Shoots 500 Times Without Reloading.

No. 5016—Lever action, polished nickel steel, black walnut stock, Rocky Mountain front sight, rear peep sight, hammerless, shoots BB shot, all parts interchangeable, length 33 in., weight 2¼ lbs. .....per dozen $21.00

HALF DOZEN IN A CASE.

1000 SHOT KING.



Shoots 1,000 Times Without Reloading, Shoots BB Shot.

No. 5017—Lever action, frame and barrel are of one piece nickel plated steel, no joints between barrel and frame to work loose, black walnut stock, excellent sights, all parts interchangeable, length 35 in., weight 2½ lbs., per dozen $24.00

This is a hammerless magazine repeater which loads automatically and shoots with accuracy and great penetration.

HALF DOZEN IN A CASE.

KING THREE-IN-ONE.

Shoots BB Shot, Cork or Rubber Ball.

No. 11—Nickel plated steel barrel, ebony finish stock, neat sights and easy action, shoots cork or hollow rubber ball for indoor or outdoor shooting, or may be used as a pop gun, length 29 in., w't 1⅛ lbs.....each $9.00

This rifle shoots BB shot with accuracy. A large cork on end of a string makes a big noise but does no damage. A hollow rubber ball is also furnished for indoor shooting, which does not injure walls.

ONE DOZEN IN A CASE.

KING POP GUNS.

No. 12—Nickel plated steel barrel, walnut stock, shoots a cork at end of string and makes a big noise, length 15 in., w't 6½ oz., per dozen..... $3.00

SIX DOZEN IN A CASE.

No. 5001—All steel, nickel plated and polished, length 15 in. .....per dozen $3.00

THREE DOZEN IN A CASE.

BENJAMIN.

No. 5025—Nickel plated barrels, walnut stock, lower and larger barrel consists of the pump and air chamber, smaller and upper is the shooting barrel; length 37 in., w't 2 lbs.....per dozen $30.00

This is a pneumatic gun and is operated entirely by air. It is not a spring gun. Air is compressed in an air chamber by a stroke or two of the pump rod and when released by a pressure upon the trigger throws a shot which will easily pass through a one-half inch white pine board. With more pressure greater penetration is secured. It is an ideal gun for target practice and small game. It is simple, strong, efficient, and will last a long time.

AIR AND TARGET RIFLES.

STERLING.

ONE DOZEN IN A CASE.

CHICAGO.

Shoots BB Shot and Darts.

No. 5003—Cherry stained, a perfect device for holding shot tight in place, impossible to get a shot lodged in the barrel, length 32 in., weight 1¾ lbs.....per dozen $12.00

ONE DOZEN IN A CASE.

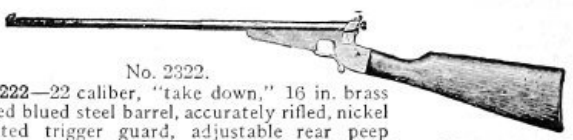
HAMILTON.

No. 27—22 caliber, long or short, rim fire, 16 in. tapered bronze barrel, fitted with front knife and open rear adjustable sights, automatic ejector, w't 3 lbs. each $1.50

No. 027—22 caliber, long or short, round walnut stock and fore end, otherwise same as No. 27, w't 3 lbs.....each $1.75

This model 27 has a hammer action exceedingly simple and of few parts. A solid breech-block makes action absolutely safe from rear explosion. The barrel is rifled with great care and has a built-up steel jacket which gives it great strength, durability and accuracy.

TEN IN A CASE.



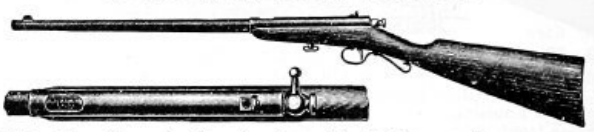
No. 2322.

No. 2222—22 caliber, "take down," 16 in. brass lined blued steel barrel, accurately rifled, nickel plated trigger guard, adjustable rear peep sight, automatic extractor, walnut stock, blued steel butt-plate, length 28½ in., w't 1¾ lbs.....each $2.00

No. 2322—22 caliber, take down, 20 in. brass lined blued steel barrel, accurately rifled, adjustable rear peep sight, improved loading mechanism, automatic extractor, lever action, extra quality walnut stock, length 33 in., w't 2 lbs.....each 2.50

TEN IN A CASE.

HAMILTON BOLT ACTION.



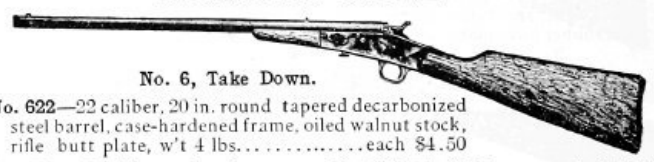
No. 2422—22 caliber, rim fire, chambered for 22 long or short cartridges, 21¾ in. round blued steel barrel, genuine walnut stock, blued steel trigger guard and butt-plate, w't 3½ lbs.....each $3.00

Bolt action type is deservedly popular for combining simplicity of action, the quality of rifling unsurpassed, with accuracy, safety and strength of shooting. The barrel is finely tapered and beautifully finished in blue-black gun finish. The action is automatic, both in putting cartridges into the chamber and ejecting the exploded shell. To open action, throw up the thumb-lever and pull back the bolt, thus opening aperture on top of barrel.

To load, simply drop cartridge into aperture thus opened, push bolt forward, automatically putting cartridge into chamber, and throw thumb-lever to the right, which securely locks it, thus making the entire action of rifle absolutely safe under all conditions.

TEN IN A CASE.

REMINGTON SINGLE.



No. 6, Take Down.

No. 622—22 caliber, 20 in. round tapered decarbonized steel barrel, case-hardened frame, oiled walnut stock, rifle butt plate, w't 4 lbs.....each $4.50

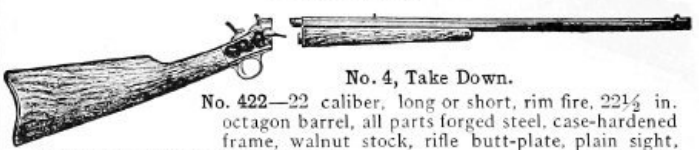
No. 632—32 caliber, otherwise same as No. 622, w't 4½ lbs....each $4.50

Please note that Nos. 622 and 632 are fitted with rear peep sight on the tange of rifle. This adds quite a feature to these rifles.

This rifle is especially designed to meet the demand for a light weight and reliable "take down" rifle at a moderate price.

The action is a modified type of the Remington system. Material and workmanship the best. Accurately bored and rifled. Genuine walnut stock and fore-end. Barrel detached from stock by loosening thumb screw. Adapted to 22 short, 22 long rim fire cartridges, conical ball, bullet breech caps, 32 short and 32 long.

TEN IN A CASE.



No. 4, Take Down.

No. 422—22 caliber, long or short, rim fire, 22½ in. octagon barrel, all parts forged steel, case-hardened frame, walnut stock, rifle butt-plate, plain sight, automatic shell ejector, w't 4¼ lbs.....each $6.00

No. 432—32 caliber, long or short, rim fire, 24 in. octagon barrel, all parts forged steel, case-hardened frame, walnut stock, rifle butt-plate, plain sight, automatic shell ejector, w't 4¼ lbs...each 6.00

TEN IN A CASE.

RIFLES.

Marble's "Game Getter" Gun. Two Barrels, Shoots 22 Short, 22 Long and 22 Long Rifle, 44 Shot and 44 Ball Cartridges.

No. B—GAME GETTER, upper barrel 22 caliber, lower barrel 44 caliber, round blued barrels, single trigger, drop-forged blued frame, rubber grips, nickel plated tubing stock, finest case leather holster, length of barrels 12 in., equipped with lock leaf sight, ivory bead sight, w't 35 oz. ..... each $15.00

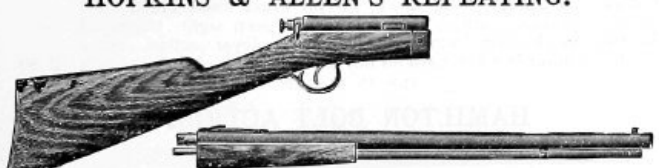
No. A—GAME GETTER, with Marble's flexible rear sight, otherwise the same as No. B. ..... " 18.00

Slot Blank. ..... extra " .25

Rear Sight Blank. ..... extra " .50

This is an all around gun. It is a target rifle or pistol, a big game gun or shot gun. It has two barrels, one 22 caliber, the other 44 caliber. The 22 and 44 bullets shoot to the point blank range of 50 feet with sights set the same. There is very little recoil on account of 44 barrel being smooth bored and not choked. A 44 ball penetrates six inches of pine at 15 feet and will kill a deer or black bear at 40 to 50 yds.

HOPKINS & ALLEN'S REPEATING.

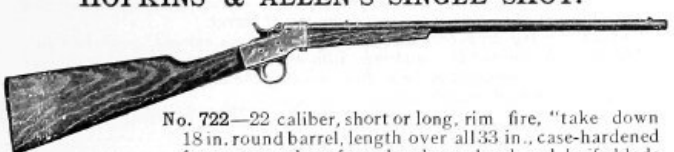


No. 79—22 caliber, "take down," bolt action, takes 16 short, 12 long or long rifle, 20 in. round blued barrel, length over all 38½ in., all parts are drop-forged, stock is machine turned and made from hard Louisiana swamp walnut, Rocky Mountain rear sight, sporting front sight, w't about 6¼ lbs. ..... each $10.00

The rifle is taken down or put firmly together in a few seconds by loosening or tightening the screw. From the tip of the muzzle to the end of the butt there isn't a screw or a joint or an inch of metal or wood but will give the most exacting sportsman pleasure and satisfaction. The gun balances well, hangs well, fits nicely to the hand and shoulder, works fast and shoots hard and true.

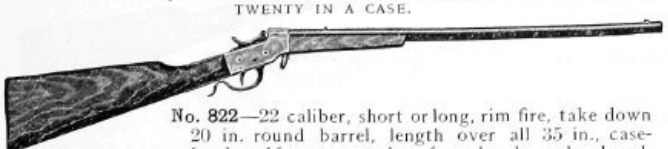
TEN IN A CASE.

HOPKINS & ALLEN'S SINGLE SHOT.



No. 722—22 caliber, short or long, rim fire, "take down 18 in. round barrel, length over all 33 in., case-hardened frame, parts drop-forged and case-hardened, knife blade front sight, sporting rear sight, walnut stock and fore-end, fitted with rubber butt-plate, w't about 3½ lbs. ..... each $3.50

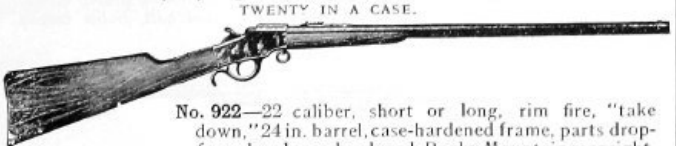
TWENTY IN A CASE.



No. 822—22 caliber, short or long, rim fire, take down 20 in. round barrel, length over all 35 in., case-hardened frame, parts drop-forged and case-hardened, sporting front and rear sights, beautifully grained American walnut stock, hard rubber butt-plate, w't 4 lbs ..... each $4.50

This rifle has a positive safety arrangement. The hammer cannot strike the firing pin either in loading or carrying the gun except by intention. The hammer rebounds after firing and always rests on the safety notch.

TWENTY IN A CASE.



No. 922—22 caliber, short or long, rim fire, "take down," 24 in. barrel, case-hardened frame, parts drop-forged and case-hardened, Rocky Mountain rear sight, sporting front sight, walnut stock and fore-end, thick military butt-plate, w't 5 lbs. ..... each $5.50

No. 932—32 caliber, short or long, otherwise same as No. 922 w't 5 lbs. ..... each 5.50

No. 1922—22 caliber, 24 in. octagon barrel, otherwise the same as No. 922, w't 5 lbs. ..... each 6.00

No. 2932—32 caliber, 24 in. octagon barrel, otherwise the same as No. 922, w't 5 lbs. ..... each 6.00

SAVAGE SINGLE SHOT.

Model C.

No. 817—22 caliber "take down," chambered for 22 short, 22 long and 22 long rifle cartridges, 22 in. round blued finish steel barrel, English model, shot gun butt, walnut stock, length of stock 14 in., equipped with adjustable rear sight and metal bead front sight, w't 4¾ lbs. ..... each $6.50

1905 "Target" Model.

No. 819—22 caliber, "take down," 22 in. round blued steel barrel, chambered for 22 short, 22 long and 22 long rifle cartridges, Swiss butt-plate, walnut stock, single shot, set trigger, w't 4¾ lbs. ..... each $7.50

This rifle will appeal strongly to the target shooter who desires to use the inexpensive 22 caliber ammunition. The special rifling gives the greatest accuracy with these loads, and is beautifully balanced, especially for off-hand shooting. The Swiss butt-plate and heavy barrel, 22 inches in length, are two of its special features. Longer or heavier barrels cannot be supplied. More important, however, is the adjustable screw, which regulates the pull. No matter what your idea of the trigger pull may be, it may be obtained almost instantly with this new Savage device. The adjusting screw is located on the under side of trigger and may be instantly reached by taking off the stock.

As the front sight seat is standard, a variety of sights may be used.

SAVAGE JUNIOR.

Model 1904.

No. 818—22 caliber, "take-down," rim fire, chambered for 22 short, 22 long and 22 long rifle cartridges, 18 in. round blued finish steel barrel, shot gun butt, walnut stock, single shot, w't 3 lbs. ..... each $4.00

It is quickly and easily loaded, simply drop a cartridge into the receiver and close the knob, which lies near the stock and out of the way. The closing knob automatically cocks the arm, and after the cartridge has been fired, the opening movement automatically ejects the empty shell. The barrel is nicely tapered, carefully constructed and tested, a safe and accurate shooter.

TEN IN A CASE.

STEVENS' LITTLE KRAG.

No. 65—22 caliber, 20 in. round blued steel barrel, oiled walnut stock, rubber butt-plate, blued trigger guard, bead front and open rear sights, w't 3¼ lbs. ..... each $4.00

It is not only a take-down, but a model in simplicity, having but few parts, and can easily be taken apart to clean or replace injured parts. The bolt head which contains the firing pin unscrews, and a new one can be inserted at a very small expense. It is bored to take the celebrated 22 long rifle cartridges and has new style peep sights.

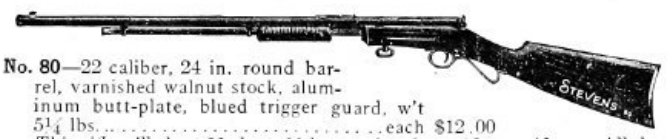
TARGET AND SPORTING RIFLES.

STEVENS' "VISIBLE LOADING" REPEATER,

No. **70**—22 caliber, chambered for 22 shorts and C B caps, holds 15 cartridges, 20 in. round barrel, length over all 35 in., varnished stock and slide handle, fitted with bead front sight, w't 5 lbs..... each $7.00

The Stevens "Visible Loading" Repeating Rifle is strictly up to date in every particular, and embodies many novel and meritorious features. The "Visible Loading" feature is entirely new and so simple that it will appeal instantly to the shooter for the reason that cartridge is always in sight while being fed into chamber. The magazine tube and breech block are in one piece. Has extra strong double extractors, making the extraction of the empty shell absolutely positive. The breech block has a positive lock and is operated by the slide handle after the breech block is closed. The hammer also has a positive lock and is always locked, while the breech block is unlocked.

STEVENS' REPEATER.



No. **80**—22 caliber, 24 in. round barrel, varnished walnut stock, aluminum butt-plate, blued trigger guard, w't 5¼ lbs.....each $12.00

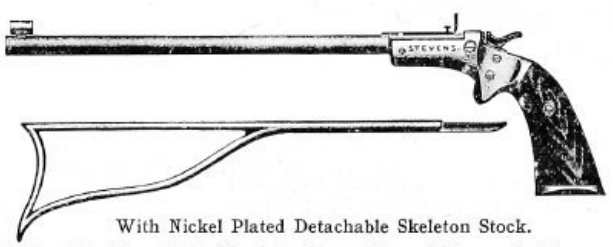
This rifle will shoot 22 short, 22 long and 22 long rifle cartridges. All that is necessary is to adjust the stop in the carrier and any of the above three cartridges will work properly.

No. **85**—25 caliber, rim fire, otherwise same as No. 80, w't 5¼ lbs..each $12.00

The 22 caliber Stevens' repeater is an up-to-date repeating rifle, containing many new and novel features never before embodied in a rifle of this class. The action and parts are self-contained. The mechanism is attached to the receiver in connection with the sliding fore-arm.

The action, in principle, is of the bolt type. The breech bolt in action works the block lever, first upwards, then back, extracting and ejecting the empty shell, its forward motion forcing a fresh cartridge in barrel. The construction of the breech bolt is such that when the action is closed it presents a solid top, preventing dirt or any obstruction entering to clog it. The manipulation of this bolt makes it an impossibility to discharge a cartridge until the action is locked.

STEVENS' RELIABLE POCKET.

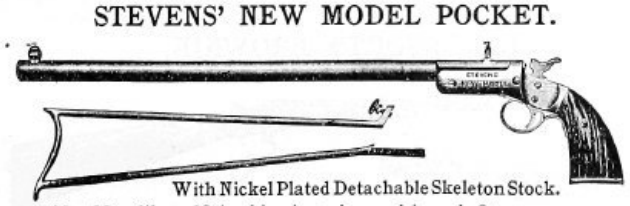


With Nickel Plated Detachable Skeleton Stock.

No. **8510**—22 caliber, 10 in. blued steel round barrel, Stevens' globe and peep sights, nickel plated frame, walnut stock, w't 1 lb., each..... $8.25

The rifle is admirably adapted for all light work. It has the Stevens tip-up action. The rest is secured in the butt-plate by a groove, making a firm connection.

STEVENS' NEW MODEL POCKET.



With Nickel Plated Detachable Skeleton Stock.

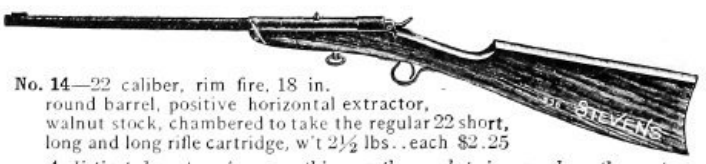
No. **8102**—22 caliber, 12 in. blued steel round barrel, Stevens combination sights, nickel plated frame, walnut stock, w't 2¼ lbs., each..... $10.00

No. **8105**—22 caliber, 15 in. barrel, otherwise same as No. 8102, w't 2½ lbs.....each 11.25

The front sight is a combination globe and top; the rear sight is folding and adjustable. The rifle has the tip-up action peculiar to other rifles of this make, and is adapted to shoot 22 caliber short, long and long rifle cartridges.

ONE IN A BOX.

STEVENS' LITTLE SCOUT.



No. **14**—22 caliber, rim fire, 18 in. round barrel, positive horizontal extractor, walnut stock, chambered to take the regular 22 short, long and long rifle cartridge, w't 2½ lbs..each $2.25

A distinct departure from anything on the market, inasmuch as the parts are self-contained; that is, there is no frame, but the parts are attached to the action itself, making it very simple.

All of the working parts of this rifle can be easily taken out by simply removing the stock from the barrel, which is attached with a thumb screw. The action is attached to the barrel and the breech-block drops down when a cartridge is to be inserted or an empty shell extracted. Open rear and German-silver knife-edge front sights.

STEVENS – MAYNARD, JR.

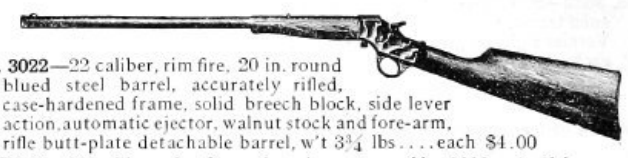
No. **3222**—22 caliber, 18 in. half octagon blued steel barrel, Maynard action, walnut stock, length over all 33 in., w't 2¾ lbs..... each $3.00

No. **3222SB**—22 caliber, smooth bore for shot cartridges, otherwise same as No. 3222, w't 2¾ lbs.....each 3.00

Owing to the increased demand for a low-priced rifle and at the same time a thoroughly accurate one, the J. Stevens Arms and Tool Co. have brought out a novel and strictly up-to-date rifle, which they call the Stevens-Maynard Jr. The barrel and stock, also fore-arm, are nicely finished, similar to rifles costing twice as much. This rifle is bored to shoot 22 short, 22 long and 22 long rifle cartridges and C. B. caps.

FIFTY IN A CASE.

STEVENS'.



No. **3022**—22 caliber, rim fire, 20 in. round blued steel barrel, accurately rifled, case-hardened frame, solid breech block, side lever action, automatic ejector, walnut stock and fore-arm, rifle butt-plate detachable barrel, w't 3¾ lbs....each $4.00

No. **3032**—32 caliber, rim fire, otherwise same as No. 3022, w't 4¼ lbs.....each $4.00

No. 9206—25 STEVENS caliber, rim fire, 26 in. barrel, w't 7¾ lbs., each..... 12.00

No. 9304—32 long caliber, rim fire, 24 in. barrel, w't 7¼ lbs...each 10.00

No. 9506—25-20 caliber, center fire, 26 in. barrel, w't 7¾ lbs.. " 10.00

No. 9508—25-20 caliber, center fire, 28 in. barrel, w't 8 lbs.. " 12.00

This rifle is manufactured to meet the demand for a reliable and accurate rifle at a moderate price. No better or stronger shooting arm can be made for the same cartridges. It is recommended without qualification and fully guaranteed by the makers.

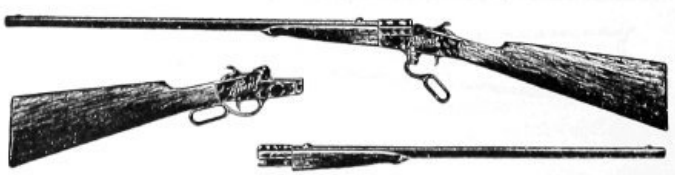
TEN IN A CASE.

FLOBERT.

No. 5104½—22 caliber, Warnant action, 24 in. octagon barrel, shoots 22 caliber short cartridges or bullet caps, rifled, case-hardened mountings, walnut oiled and checked pistol grip stock, scroll and screwed guard, w't 4 to 4½ lbs.....each $3.50

FIFTY IN A CASE.

DAVENPORT'S BROWNIE.



No. G22—22 caliber, rim fire, shoots 22 short and long cartridges, 22 in. round blued steel barrel, take down, automatic ejector, case hardened frame, drop-forged steel parts, underlever drop breech block, steel butt plate, finely finished domestic black walnut stock and fore-end, w't 4¼ to 4½ lbs.....each $6.00

REMINGTON REPEATING RIFLES.

MODEL NO. 12.

The Remington solid breech hammerless take-down 22 caliber repeating rifle is the latest addition to the modern Remington idea. It is modeled after the lines of the Remington pump gun. The positive extraction and feeding of cartridges and the absolute locking of the action when cocked, together with other excellent features, combine to make this a popular selling rifle.

Solid Breech—The top and rear of the receiver are positively closed, protecting the shooter's face from blow-backs, gases, etc., and preventing rain, dirt or foreign substances of any kind from entering the action.

Hammerless—The elimination of the projecting hammer insures safety from accidental discharge, which is possible in repeating rifles of the hammer type, and permits the grip to be raised more nearly in line with the barrel, giving pleasing lines and the correct balance long desired.

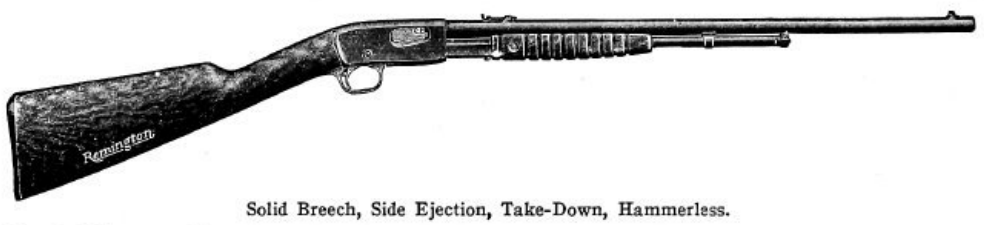
Safety—The safety which is absolutely positive, is conveniently located just back of the trigger, and when set securely locks the trigger, thus preventing accidental discharge.

Side Ejector—The ejected shell is thrown out the side, away from shooter and in no way interferes with the aim in rapid shooting. The ejector slot is of sufficient size to readily admit of single loading.

Accuracy—The Remington system of boring and rifling is an ample guarantee of the shooting qualities of this rifle. Each rifle is thoroughly targeted and the sight carefully aligned before leaving the factory.

Cleaning—The simplicity of the action permits the breech block to be removed readily, when the arm is taken down, without the use of tools. The barrel may then be cleaned and inspected from the breech. This is very important, as in calibers as small as the 22 too much care cannot be taken in keeping the bore perfectly clean. The breech block and other parts can also be readily cleaned.

Action Lock—The breech block is rigidly locked to the recoil shoulder in receiver by the action bar, which in turn is locked in its forward position by the carrier. The double lock, together with the broad locking surfaces, guard against looseness from wear so common in other rifles of similar type.



Solid Breech, Side Ejection, Take-Down, Hammerless.

No. 1021—STANDARD, 22 cal., 22 in. round barrel, chambered to take without adjustment 22 short, 22 long and 22 long rifle cartridges, straight grip, walnut stock, rubber butt-plate, w't 4½ lbs.....each $12.65

MAGAZINE HOLDS FOURTEEN 22 SHORT, ELEVEN 22 LONG OR 10 LONG RIFLE CARTRIGES.

Solid Breech, Side Ejection, Take-Down Hammerless.

No. 1022—GALLERY SPECIAL, 22 cal., 24 in. octagon steel barrel, chambered for 22 shorts only, pistol grip, walnut stock, steel rifle butt-plate, w't 5½ lbs .....each $16.00

MAGAZINE HOLDS 15 SHORT CARTRIDGES.

Solid Breech, Side Ejection, Take-Down, Hammerless.

No. 1023—TARGET, 22 cal., 24 in. octagon steel barrel, chambered to take without adjustment 22 short, 22 long and 22 long rifle cartridges, straight grip, walnut stock, steel rifle, butt-plate, w't 5½ lbs.....each $16.00

MAGAZINE HOLDS FIFTEEN 22 SHORT, TWELVE 22 LONG OR ELEVEN LONG RIFLE CARTRIDGES.

DIRECTIONS FOR OPERATING.

To Load Magazine—Press in magazine lever at front end of magazine and withdraw inner tube until loading slot is open, the cartridges can then be dropped into the magazine.

The magazine of the "Standard" grade rifle will hold 14 short, 11 long and 10 long rifle cartridges. The magazine of the "Gallery" grade rifle will hold 15 short cartridges only. Magazine of the "Target" grade will hold 15 short cartridges, 12 long and 12 long rifle cartridges. When the magazine is full, press down the inner tube until locked in place.

The magazine can be emptied without passing the loaded cartridges through the action by drawing the inner tube entirely out, when the cartridges will drop out the mouth of the magazine.

To Load the Gun—When the action is locked, press up on the front end of carrier exposed just in front of the trigger guard while starting the backward movement of the slide handle, move the slide handle smartly backward and forward, which will carry a cartridge into the chamber and lock the action ready for firing. The act of firing releases the action lock, permitting the operator to reload by working the slide handle.

To Take Down the Gun—Unscrew the assembling screw on the left hand side of receiver (a stop pin prevents its dropping out); holding the barrel and fore-end in one hand and the stock in the other hand, pull the gun apart. Cock the hammer before putting gun together.

MARLIN REPEATING RIFLES.

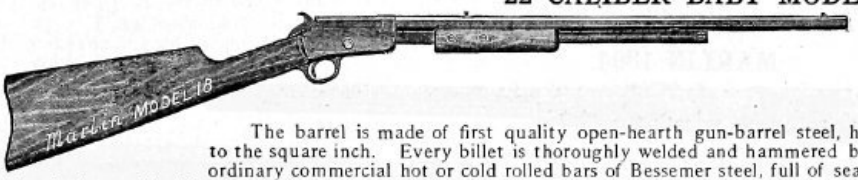
MODEL 25.

No. 1924—22 caliber, 23 in. round barrel, trombone action, chambered for 22 shorts and 22 C. B. caps, regular 22 caliber front and rear sights, frame of best quality gun frame steel, blued finish, black walnut stock, steel butt-plate, length over all 39½ in., weight 4 lbs. 2 oz.....each **$10.00**

This rifle has side ejection, throwing shells away from the shooter and not into the face and eyes, never interfering with the next shot, which construction promotes rapid and accurate firing.

The magazine holds fifteen 22 short cartridges or eighteen 22 C. B. caps.

22 CALIBER BABY MODEL.



The barrel is made of first quality open-hearth gun-barrel steel, having a tensile strength of from 60,000 to 80,000 pounds to the square inch. Every billet is thoroughly welded and hammered before rolling, and each bar is finished by planishing. The ordinary commercial hot or cold rolled bars of Bessemer steel, full of seams and hard spots, we do not use. The boring, rifling, chambering and inside barrel finish are all up to the old Ballard standard as made by the Marlin Co. for over thirty years.

The frames are drop-forged from best quality open-hearth gun-frame steel. No cheap commercial Bessemer stock, cast or malleable pieces used in any of these guns. Each piece in the action of the Marlin is made from the best quality steel suitable for the work the part is required to do, and as high carbon as possible is used, thereby getting hard contact points and avoiding trouble from the working parts wearing and getting out of adjustment.

The buttstocks and fore-arms are all made of black walnut, air seasoned and dried two to four years, then kiln dried.

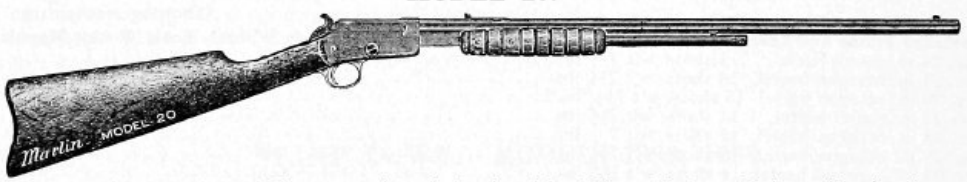
This rifle is made with a visible and not a concealed hammer, because we think it is a better and safer construction. A so-called hammerless is literally a concealed hammer gun. It requires extra complications, such as indicators, to show when it is cocked, and safety devices to prevent accidental discharge. The visible hammer indicates its position for itself. You can see it and feel it day or night beyond mistake; it can be cocked or uncocked at will, and the half-cock notch is simplest and absolutely safe.

No. 1820—20 in. octagon barrel, carbine butt, capacity of magazine 14, 22 short cartridges, blued finish frame, straight grip, black walnut stock and fore-end nicely finished, length of stock 13 in., weight about 3 lbs. 10 oz.....each **$10.00**

No. 1920—20 in. round barrel, otherwise same as No. 1820..... " **9.50**

Extra carriers can be supplied so that 22 caliber long rifle cartridges can be used if desired.

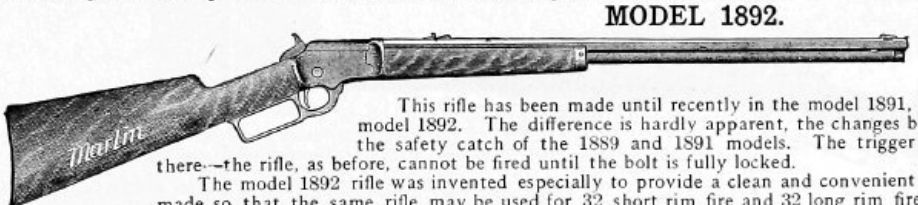
MODEL 20.



No. 2024—22 caliber, trombone action, take down, 23 in. octagon barrel, chambered for 22 long, 22 short, 22 long rifle rim fire cartridges, black or smokeless powder, including hunting cartridges with mushroom bullets, ivory bead front sight, special adjustable flat top rear sight, blued frame, metal rifle butt-plate, black walnut stock, weight about 4 lbs. 2 oz.....each **$13.50**

It is a well made, accurate and reliable arm for target work and all small game shooting up to 200 yards. Big game hunters find that practice with this arm guarantees rapid and accurate work with their high power lever action rifles.

MODEL 1892.



This rifle has been made until recently in the model 1891, but it has now been brought out in what is called the model 1892. The difference is hardly apparent, the changes being merely in the safety which is now effected with the safety catch of the 1889 and 1891 models. The trigger and sear are made one, doing away with all "play" there—the rifle, as before, cannot be fired until the bolt is fully locked.

The model 1892 rifle was invented especially to provide a clean and convenient repeater for rim fire cartridges. The 32 caliber is made so that the same rifle may be used for 32 short rim fire and 32 long rim fire cartridges, and by changing the firing pin 32 short center fire and 32 long rifle center fire cartridges. The rifle as sent out from the factory is adapted to use rim fire ammunition, but a center fire firing pin is furnished with rifle without extra charge. The firing pins can be interchanged by any one without using tools.

Models 1892 and 1897 offer the most complete line of repeating rifles manufactured for rim fire ammunition of various sizes, covering as they do five distinct cartridges together with the additional choice of center fire ammunition in the 32 caliber.

Each rifle further offers, in one rifle, advantages and conveniences that cannot be obtained in other rifles except by the use of two or more rifles.

In one and the same rifle, without adjusting, may be used any or all of the following rim fire cartridges: 22 short, 22 long, 22 long rifle, and 22 shot, as accurately as any rifle made.

Blued frame, black walnut stock, rubber butt-plate, removable sideplate, Rocky Mountain front and rear sights.

No. 2124—22 caliber, 24 in. round barrel, rubber shot gun butt, weight 5½ lbs.....each **$13.75**

No. 2224—22 caliber, 24 in. octagon barrel, rubber shot gun butt, weight 5½ lbs..... " **14.75**

No. 2226—22 caliber, 26 in. octagon barrel, rubber shot gun butt, weight 5⅞ lbs..... " **16.25**

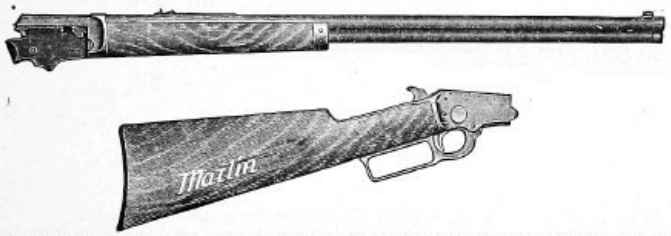
Capacity of magazines 25 short cartridges, 20 long cartridges, 18 long rifle cartridges.

Blued Frame, Blued Metal Rifle Butt-plate, Black Walnut Stock, Rocky Mountain Sights.

No. 2324—32 caliber, 24 in. round barrel, magazine will hold 17 short or 14 long cartridges, rim or center fire weight 5½ lbs.....each **$13.75**

No. 2424—32 caliber, 24 in. octagon barrel, magazine will hold 17 short or 14 long cartridges, rim or center fire, weight 5½ lbs..... " **14.75**

MARLIN RIFLES.



MODEL 1897.

This rifle is similar in construction to the model of 1892 in take down form, with many important improvements.

In external appearance the following differences may be noted. The larger thumb screws and the finely tapered barrel, which, with the neat rubber butt-plate, give the arm a light and graceful appearance.

The receiver is made of the special steel used in the high power smokeless rifles, which insures a solid rifle, and is finely case-hardened, adding greatly to the appearance and durability of the same.

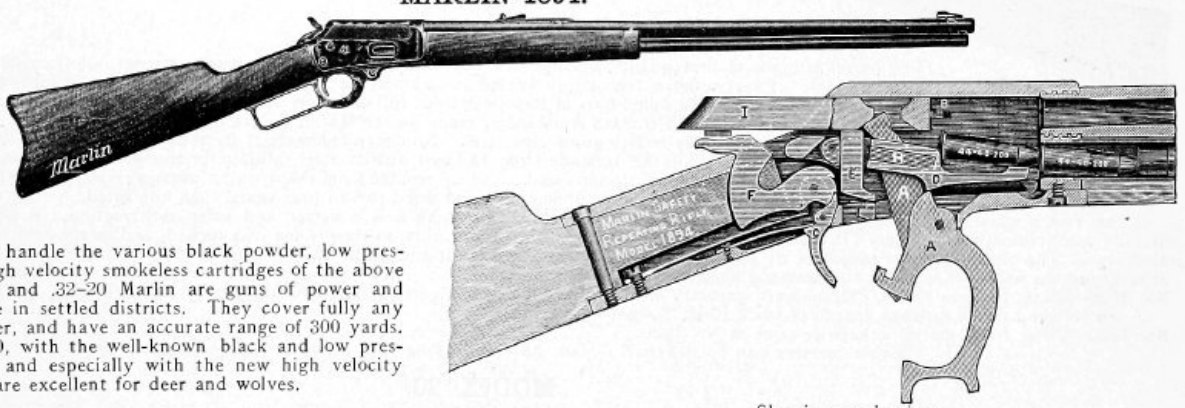
Case-Hardened Frame, Black Walnut Stock, Rocky Mountain Rear and Ivory Bead Front Sights.

No. 1124 —22 caliber, 24 in. round tapered barrel, rubber shot gun butt, w't 5¾ lbs ..... each $15.35
No. 1224 —22 caliber, 24 in. octagon tapered barrel, rubber shot gun butt, w't 5¾ lbs ..... " 17.00
No. 1226 —22 caliber, 26 in. octagon tapered barrel, rubber shot gun butt, w't 5¾ lbs. ..... " 18.60
No. 1284½—22 caliber, 24 in. half octagon tapered barrel, rubber shot gun butt, checkered pistol grip stock and fore-end, w't 5¾ lbs. ..... " 24.60

Capacity of magazines 25 short cartridges, 20 long cartridges, 18 long rifle cartridges.

TEN IN A CASE.

MARLIN 1894.



Showing mechanism.

Model 1894 rifles handle the various black powder, low pressure smokeless and high velocity smokeless cartridges of the above calibers. The .25–20 and .32–20 Marlin are guns of power and range, yet safe to use in settled districts. They cover fully any game smaller than deer, and have an accurate range of 300 yards. The .38–40 and .44-40, with the well-known black and low pressure smokeless loads, and especially with the new high velocity smokeless cartridges, are excellent for deer and wolves.

Case-Hardened Frame and Lever, Blued Breech Bolt, Blued Rifle Butt-Plate, Black Walnut Stock, Rocky Mountain Sights.

MARLIN SAFETY REPEATING RIFLES.

MODEL 1893.

Model 1893 Rifle with "Smokeless Steel" Barrels. Special Features.

The special smokeless steel used in the manufacture of the barrel, receiver and breech bolt is guaranteed to be made according to the regulation specifications of the United States government for the new 30 caliber army rifle. Elastic limit 70,000 lbs., tensile strength 100,000 lbs., to 120,000 lbs. to the square inch. The Marlin Co. is the only one making the 32-40 and 38-55 rifle of the special smokeless steel, making these calibers just as strong and durable as the 30-30.

These Model 1893 rifles are quick handling, powerful, accurate guns, built in perfect proportion throughout, with the simplest and strongest mechanism used in any high power repeater. They are made especially to stand the continued use of high power smokeless loads with jacketed bullets, and are ideal guns for shooting bear, moose, deer and all American big game.

RIFLES.

STANDARD REPEATING.

No. 1H—30-30 caliber, 25 in. barrel, six shots, take-down, round tapered ordnance steel barrel, positive safety fitted with ivory tip front and sporting rear sights, designed for 30-30 caliber rimless high power smokeless cartridges, bronze metal butt-plate and action slide, fine Circassian walnut stock, shot gun butt, length of stock 13¼ in., drop 2½ in., w't 7 lbs.....each $30.00

This is a new hand operated repeating rifle which is particularly adapted for high power ammunition. It has a strong action, is simple in construction and is a superior arm in every respect. All rifles are thoroughly tested before leaving the factory and a guarantee for accuracy of fire and perfection of material and workmanship go with each rifle.

STANDARD AUTOMATIC.

No. 1A—30-30 caliber, 25 in. barrel six shots, round tapered ordance steel barrel, positive safety, fitted with ivory tip front and sporting rear sight, designed for 30-30 caliber rimless high power smokeless cartridges, bronze metal butt-plate and action slide, fine Circassian walnut stock, shot gun butt, length of stock 13¼ in., drop 2½ in., w't 7¾ lbs.....each $35.00
No. 2A—32 caliber, otherwise the same as No. 1A, w't 7¾ lbs. " 35.00

This is a hammerless automatic rifle with great velocity, long range and flat trajectory. The solid breech-loading mechanism conserves all the energy of the explosion to impart the greatest possible velocity to the projectile, and the barrel being rigid with the frame and receiver, insures accuracy at both long and short range.

The rifle is operated by gas pressure in the following manner: the bullet, moving through the barrel, driven by power of the explosive gas, passes over a small port near the muzzle. This port admits about six pounds of gas pressure which acts upon a piston, causing a rearward motion which is transmitted through connecting rods to the bolt cams. This rearward motion unlocks the bolt, withdraws and ejects the empty shell, and compresses the main spring. The bullet passing out at the muzzle instantly relieves the gas pressure on the piston and permits the main spring to impart a forward motion to the bolt, placing the next cartridge in the chamber, and locking and cocking the rifle. The operator has only to maintain his aim and press the trigger until the magazine is empty.

The mechanism is strong and simple, with few parts, and is not easily broken or rendered inoperative. Barrels heretofore used have a record of many more shots than the life of the average rifle. The barrels are practically indestructible for sporting purposes if factory loaded ammunition of any standard make be used.

SAVAGE MAGAZINE.

No. 7422—22-caliber, hammerless, chambered for 22 short, 22 long and 22 long rifle cartridges, rim fire, 24 in. octagon barrel, steel rifle butt-plate, pistol grip, 7 shots, w't 5⅜ lbs., with extra magazine.....each $14.00
Extra Magazines, for No. 7422 rifle..... " .40

This rifle has many improvements over the ordinary 22 calibers, including box magazine, safety catch, hammerless action, weight and construction.

No. 7606 —30-30 caliber, center fire, 26 in. octagon barrel, rifle or shot gun butt, 6 shots, w't 7¾ lbs.....each 21.50

Savage rifles are accurately made, finely fitted, and beautifully finished. The barrel is blued, frame blued and polished, lever and butt-plate case-hardened. Fine walnut stock, sporting front and rear sights.

CARBINES.

Model 1899.

No. 7320—.303 caliber, center fire, 20 in. round barrel, 6 shots, w't 7¼ lbs.....each $20.00
No. 7520—30-30 caliber, center fire, 20 in. round barrel, 6 shots, w't 7¼ lbs.....each 20.00

The rifle can be alternately and automatically used as a single loading and as a magazine rifle.

A numerical indicator exposed through an opening in the frame always shows the number of cartridges contained in the magazine, and also shows when the magazine is empty.

Magazine cartridges can be safely removed from the rifle without cocking the firing mechanism. Cartridges are loaded into the magazine through the breech opening, thereby obviating any necessity for hinged trap doors, fillers or any coverings. Dangers arising from the use of high explosive powders in shells having defective heads or primers are wholly overcome by providing a solid steel breeching shoulder between the eyes and head of the operator and the chamber, making it impossible for the powder gas to escape to the rear.

SAVAGE MAGAZINE TAKE-DOWN.

In a rifle equipped with this device, the bullet passes through the silencer without the slightest loss in velocity, accuracy or penetration.

The interior construction of the silencer is such that the powder gases are caught the moment they leave the muzzle of the barrel and are whirled very rapidly, gradually losing their force and escaping without the sharp report one is accustomed to hear.

There is no delicate mechanism to get out of order.

It is only necessary to cut a short screw thread on the muzzle to fasten the silencer.

As the bore of the silencer is much larger than the bullet the velocity, accuracy or penetration is not effected.

There is no interference with sighting and the balance is not impaired. In fact, experience shows that the small increase in weight at the muzzle helps in target shooting, as does the reduction in the recoil, due to the presence of the silencer.

To obtain the best results we recommend the use of Peters' SMOKELESS ammunition. The silencer should not be used with black powder cartridges.

Our repair department is equipped with the necessary tools for fastening the silencer, saving the customer the expense in sending the rifle to the factory

WINCHESTER BREECH LOADING CANNON.

For Saluting and Celebrating.

No. 100—10 gauge, 12 in., rolled steel, blued barrel, cylinder bored, japanned cast iron frame, 35⅝ in. wheels, entire length 17 in., 7¼ in. wide, w't 14 lbs. ..... each $7.00

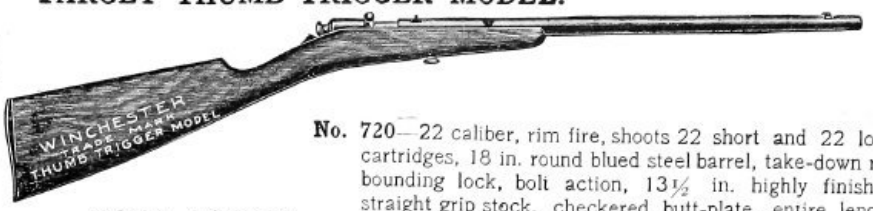
It is simple in construction and easy to handle. Either brass or paper shells can be used. A proper extractor is provided for taking out the fired shell. The barrel can be raised or lowered by elevating a screw placed underneath it. The load is 9 drams of black powder with two black edge wads and one cardboard wad to produce the loudest report.

10 Gauge Shells, loaded with 8½ drs. black powder, for above.. per 100 $2.50

WINCHESTER RIFLES.

TARGET THUMB TRIGGER MODEL.

When the gun is cocked, the action is locked against opening until firing pin falls. The gun is cocked by pulling rearward on the firing pin, which is made with a knurled head to afford a good grip. It is furnished with an open rear sight, and with a Winchester front sight having a bright alloyed tip, which will not tarnish. The sights are accurately set by shooting at a target.



No. 720—22 caliber, rim fire, shoots 22 short and 22 long cartridges, 18 in. round blued steel barrel, take-down rebounding lock, bolt action, 13½ in. highly finished straight grip stock, checkered butt-plate, entire length 33¼ in., w't about 3 lbs., - - - - - each $3.50

BOLT ACTION.

No. 718, Model 1902.

AUTOMATIC.

No. 724—22 caliber, hammerless, rim fire, 20 in. round barrel, 10 shots, weight 5¾ lbs., - - - - - - - each $25.00

The Winchester Model 1903, is a ten-shot, automatic, hammerless, take-down rifle, adapted to a new 22 caliber rimfire cartridge loaded with smokeless powder and greaseless bullet. It is simple in construction and operation. The rifle has grace of outline, light weight, certainty of operation, ease of manipulation and novelty of action, making it a most desirable and up-to-date gun. There are innumerable uses for which this rifle will be found particularly well adapted, among them being wing shooting or fancy shooting. In ordering ammunition specify 22 Winchester Automatic.

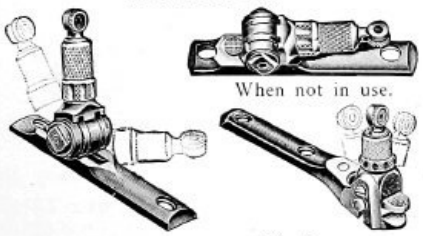
It is simple in construction and easy to handle. Either brass or paper shells can be used. A proper extractor is provided for taking out the fired shell. The barrel can be raised or lowered by elevating a screw placed underneath it. The load is 9 drams of black powder with two black edge wads and one cardboard wad to produce the loudest report.

10 Gauge Shells, loaded with black powder, for No. 100 cannon, - - - - - - per 100 $2 50

RIFLE AND SHOT GUN SIGHTS.

MARBLE'S.

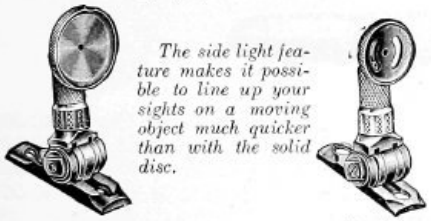


When not in use.

For Savage.

No. 51—Automatic flexible joint, rear, for Winchester, Marlin and Savage rifles each..... $3.00

When not locked down, a simple spring in the hinge joint instantly brings it into proper position, should it be struck on front or back. It can be used on all rifles with long firing bolts. The lower sleeve is a jamb nut which prevents the elevating sleeve from turning and holds the disc stem rigid at any elevation. Interchangeable disc allows change of aperture at will.



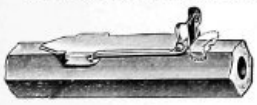
The side light feature makes it possible to line up your sights on a moving object much quicker than with the solid disc.

No. 52. No. 53.

No. 52—Rear, with cup disc, otherwise same as No. 51.....each $3.50

No. 53—Rear, with side light..... " 3.50

No. 54—Rear, with long base, particularly adapted to the Winchester box magazine rifles, otherwise same as No. 51, each..... $3.00



No. 60. No. 41.

No. 60—Rear, folding leaf sight....each $1.00

No. 41—Improved, front, for any rifle of any caliber, $\frac{1}{16}$, $\frac{3}{32}$ or $\frac{1}{8}$ in. bead, of ivory, German silver, gold alloy or aluminum.....each 1.00

It is possible with this improved front sight to see under as well as over, on long range where haste is necessary to adjust the rear sight; accuracy is insured by the fact that the object aimed at can be seen under the sight.

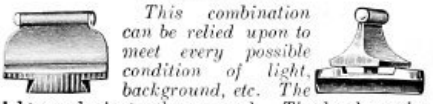
No. 42 No. 71. No. 71.

No. 42—Standard front bead, for any rifle of any caliber, $\frac{1}{16}$ $\frac{3}{32}$ or $\frac{1}{8}$ in. bead, of ivory.....each $1.00

No. 71—Triple bead front, blued steel, with black, ivory and gold beads, sight revolves in either direction by slight pressure of thumb, for all guns having slot for front sight.....each 1.50

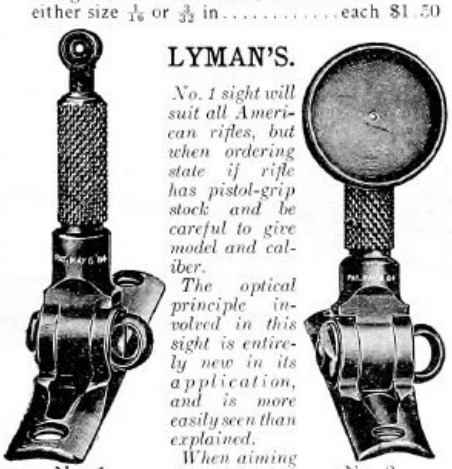
No. 71 sight combines into a revolving sight the three best front sights which have been made allowing the use of either an ivory, black or gold bead, as desired. Can be instantly changed to suit conditions of light or background. In ordering, mention make and caliber of rifle.

MARBLE'S.



This combination can be relied upon to meet every possible condition of light, background, etc. The sight can be instantly reversed. The bead carrier can be pulled up against the pressure of the spring until it clears the base slot—then turn it around.

No. 61—Reversible front, one ivory and one gold, both same size, furnished in either size $\frac{1}{16}$ or $\frac{3}{32}$ in.....each $1.50



No. 1. No. 2.

LYMAN'S.

No. 1 sight will suit all American rifles, but when ordering state if rifle has pistol-grip stock and be careful to give model and caliber.

The optical principle involved in this sight is entirely new in its application, and is more easily seen than explained.

When aiming this sight has the appearance of a ring or hoop, which shows the front sight and the object aimed at, without intercepting any part of the view.

No. 1—Combination rear, for Marlin models '94, '92, '97, '93, in .38-55 calibers, and '93, in 30-30 and 25-36 calibers. Winchester S.S., '86, '90, '94, in 25-36 and 30-30 and '94, in .38-55 and .38-56; 22 automatic 32 and 35 self-loading Savage; 22, 303 and 30-30, Stevens' Ideal and Favorite.....each $3.00

No. 2—Combination with cup disc, for Marlin models '20, '92, '93, Winchester '90, '94 and Savage .303 and 30-30 calibers.....each 3.50

The No. 2 sight has a large detachable disc and is intended for match rifles and gallery rifles. It is not as good for "all around" shooting as the $3.00 combination sight. Many target shooters like it, as it is much better than the Vernier peep sight.

The disc is easily removed, and for most work, is not needed.

For gallery practice the aperture in the disc can be enlarged to advantage.

No. 21—Receiver for Winchester models '94, '95 and Savage.....each $3.50

These sights can be seen distinctly against any object in the woods or in the sunlight.

No. 3. No. 4.

No. 3—Ivory front bead, Standard, 22 caliber, Marlin, Winchester and Colt's, 30-30 Marlin, Savage and Winchester, .303 Savage and Stevens' Favorite rifles.....each $1.00

No. 4—Ivory hunting front, for same calibers as above.....each .50

LYMAN'S.

No. 24. No. 26.

No. 24—Jack, for Winchester model '95 rifles and carbines.....each $0.50

No. 26—Ivory bead, for Winchester model '95 rifles and carbines.....each .50

"Standard" Lyman front sights will fit Marlin models '81, '94, '95, '93 in 32-40 and 38-55 calibers, Winchester '73, '76, '86, '92, and all Winchester single shots, excepting 30-40 U. S. A., also Remington Nos. 4, 2 and 6.

In ordering sights, particular attention should be paid in regard to make, caliber, model and size of arm.

No. 5—Combination ivory front, Standard, model 20 Marlin, 22 caliber Marlin and Winchester, 32 and 35 Winchester self-loading, 30-30 Marlin, Savage and Winchester, .303 Savage, Stevens' Favorite and Ideal.....each $1.00

No. 6. No. 6. No. 11, 10 and 9.

No. 6—Leaf, Standard, Marlin model '92, '97 and '93, Winchester model '94 in 30-30 and 25-35 calibers only, also Savage and Stevens' Favorite.....each $1.00

One leaf is a bar with triangular ivory cener, the other is a wide open V crotch.

No. 12.

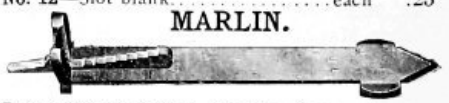
No. 11—Ivory shot gun, rear.....each $0.50

No. 10—Ivory shot gun, front.....each .50

No. 9—Sets of ivory front and rear shot gun sights with reamer.....per set 1.00

No. 12—Slot blank.....each .25

MARLIN.



Rocky Mountain Rear, Buckhorn low and high.....each $0.80

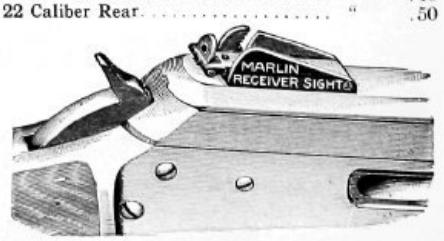
Extra Steps, for above..... " .25

Rocky Mountain Front. Front. Rear.

Rocky Mountain Front, knife edge...each $0.50

22 Caliber Front..... " .40

22 Caliber Rear..... " .50



No. 30—Receiver, for Marlin rifles made after Aug. '03, graduated peep or open sight.....each $3.25

This sight gives greatest possible distance between front and rear sights, without in any way interfering with grip of right hand. No danger of injuring the shooter's eye by recoil or hasty throwing of rifle to the shoulder. With one movement it can be run up to the highest or lowest point. Rifles made before above date require two holes to be drilled and tapped in rifle receiver.

Stevens pistols were among the earliest if not the earliest breech loading pistols made in the United Stated. The accuracy of Stevens pistols is proved in the great record scores made by American marksmen who have used them. They have been for many years the chosen arm of amateur and expert shots at home and abroad.

No. 8145M—45 cal., 5½ in. bbl., w't 37 oz.	16.00

Use 32-20, 38-40, 41 short, 41 long Colt, 44-40 and 45 Colt cartridges.

These revolvers should be carried with the hammer resting in the safety notch. For over half a century this arm has seen more actual service and more of them have been produced than any revolver ever manufactured. The "Single Action" is still in demand by users of firearms who require a combination of reliability, durability and simplicity in mechanism.

COLT'S BISLEY MODEL, SINGLE ACTION REVOLVERS.

Center Fire, Six Shots, Rubber Stock, Blued Finish.

	EACH.
No. 8232SB —32-20 cal., 4¾ in. bbl., w't 44 oz.	$16.00
No. 8232MB—32-20 cal., 5½ in. bbl., w't 45 oz.	16.00
No. 8232LB —32-20 cal., 7½ in. bbl., w't 47 oz.	16.00

No. 8245SB —45 Colt's, 4¾ in. bbl., w't 38 oz.	16.00

Use 32-20, 38-40, 41 short, 41 long Colt, 44-40 and 45 Colt Cartridges.

These revolvers should be carried with the hammer resting in the safety notch. This revolver is of the Single Action Army type, with low hammer, longer and firmer grip, very light and smooth in pull.

COLT'S AUTOMATIC PISTOLS.

This model on account of its very short barrel and light weight make it particularly desirable as a pocket pistol.

No. C1—Pocket, 25 cal., rimless cartridges, 6 shots, 2 in. bbl., length over all 4½ in., blued finish, w't 13 oz. each $14.00

Browning's Patent.

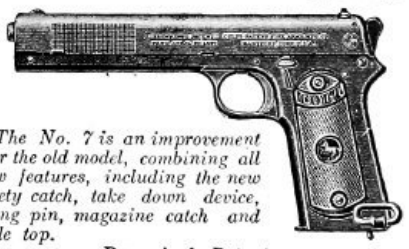
No. 6—Pocket, 32 cal., center fire, 8 shots, 4 in. blued barrel, length over all 7 in., w't 23 oz. ..... each $18.00

No. 6.

No. 380—Pocket, 380 cal., center fire rimless smokeless cartridges, 7 shots, 3¾ in. barrel, blued finish, rubber stock, length over all 6¾ in., w't 23 oz. ..... each $20.00

No. C5—Pocket, 38 cal., center fire, 7 shots, 4½ in. blued barrel, length over all 7½ in., w't 31 oz. ..... each 24.00

No. 45—Military, 45 cal., center fire, 7 shots, blued, 5 in. barrel, length over all 8 in., w't 32½ oz. ..... each $26.00



The No. 7 is an improvement over the old model, combining all new features, including the new safety catch, take down device, firing pin, magazine catch and slide top.

Browning's Patent.

No. 7—Military, 38 cal., center fire, 8 shots, blued, 6 in. barrel, length over all 9 in, w't 37 oz. ..... each $25.50

Extra Magazines.

380 cal., for Colt's pistols	"	1.50
38 cal., for Colt's pistols	"	1.75
45 cal., for Colt's pistols	"	1.75

The action of these pistols is automatic except that the trigger must be pulled to fire each shot, the cartridges being supplied from a detachable magazine inserted in the handle of the pistol. After the pistol is charged with a filled magazine, one opening movement is made by hand, bringing the first cartridge into the chamber. On pulling the trigger the cartridge is fired, the empty shell extracted, and a new cartridge loaded into the chamber, all these operations taking place automatically without any manipulation of the arm. This automatic operation of the pistol is effected by the recoil of the moving parts, and as a consequence the recoil is so absorbed in being utilized that it has no disturbing effect. The first shot can be discharged more quickly than from any arm made, as this pistol can be carried with perfect safety while the hammer is at full cock.

SAVAGE AUTOMATIC PISTOLS.

The magazine holds ten cartridges, which with one in the chamber, places eleven at the command of the operator.

The action of this pistol is automatic except that the trigger must be pulled to fire each shot, the cartridge being supplied from a detachable magazine inserted in the handle of the pistol.

Pocket Model.

No. 15—32 cal., rimless smokeless cartridges, 10 shots, length over all 6½ in., w't 19 oz. ..... each $15.00

Extra Magazines, for Nos. 9 and 18. " .75

Its chief points are its fine appearance, balance, simplicity of action, combined with its rapidity of fire and wonderful accuracy. It operates on the link system. The recoil caused by the discharge of the cartridge forces the barrel and breech block backward; extracting and ejecting the empty shell. The magazine spring then brings a new cartridge up into place to be forced into the breech automatically by the return of the breech block and the pistol is again loaded and ready to be discharged. It has a magazine containing 8 cartridges, which is held in the stock of the pistol. This magazine can be thrown out when empty and replaced in a moment.

The cartridges are made with steel jacket bullets, loaded with Walsrode powder, and have greater killing power than the 44 caliber bullet. In the recent test at Springfield Armory, 116 shots were fired in a minute, and a score 24 bull's-eyes out of 30 shots was made by one man firing rapidly.

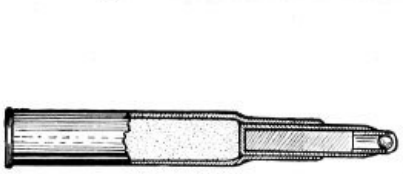
Peters' cartridges are unsurpassed for uniformity and accuracy. In their manufacture the most careful scientific tests are employed that are possible with the knowledge of modern explosives. No pains or cost are spared in order to secure perfection.

Scores have repeatedly been made which are not only phenomenal but excel the world's record. Such a reputation have these goods gained for themselves that the best experts will not risk their positions by using others.

METALLIC CARTRIDGES.

EQUIPPED WITH HOXIE BULLETS.



Showing Sectional View of Hoxie.

Hoxie Bullet expanded.

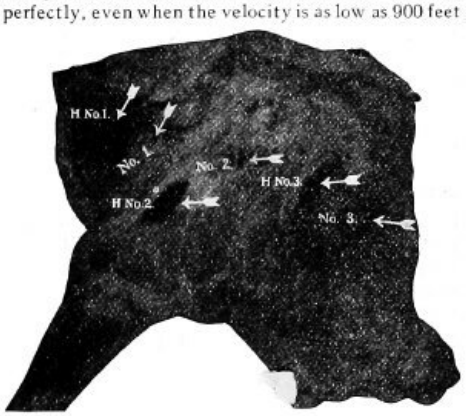
The Hoxie bullet is enthusiastically recommended by the leading sportsmen of the country.

These bullets have an impact ball and small air chamber inserted in the point, making the expansion positive and scientific.

When the bullet strikes an object the ball is forced into the chamber expanding the bullet and forcing it wide open.

The expansion is perfect and the wound produced is fatal.

The construction of the bullet does not interfere in the least with its accuracy or penetration. When it strikes bone, it goes through easily. Just as soon as it strikes flesh or tissue, it expands. It will bore through many inches of bone and afterwards will expand perfectly on flesh. In every test it expands better on flesh than any other substance and will mushroom perfectly, even when the velocity is as low as 900 feet per second.



Above cut shows a quarter of beef into which were fired Hoxie Expanding and Regular Soft Nose Cartridges. Note the comparative results.

Explanation of Cut.

Shot No. 1, 303 Savage regular soft nose. Shot No. H1, 303 Savage Hoxie Bullet. Shot No. 2, 30-30 Winchester regular soft nose. Shot No. H2, 30-30 Winchester Hoxie Bullet. Shot No. 3, 33 Winchester regular soft nose. Shot No. H3, 33 Winchester Hoxie Bullet. Cut shows where bullets entered.

25 IN A BOX. 500 IN A CASE.

These lists have been carefully compiled and will meet every reasonable requirement. The various combinations of powder and shot will be furnished in any size shot; the final figure of load number may be changed according to size of shot wanted. SPECIAL LOADS WILL NOT BE SUPPLIED EXCEPT AT AN ADVANCE IN PRICE.

KING'S SEMI-SMOKELESS POWDER.

This is a new and wonderful powder. While it is neither a black nor a nitro powder, nor a mixture of the two, it has the best qualities of both without their faults. It has the high velocity of a nitro powder with the low breech pressure of black. It is just as safe as black powder and may be used in the same way, bulk for bulk, though the same results may be obtained with less charge. It is free from smoke and very clean, permitting of hundreds of shots being fired without cleaning and without injury to the gun or loss of accuracy. It will not deteriorate nor is it affected by climatic influences, as are most of the nitro powders. While its superiority as a shot gun powder is recognized by all, as a rifle powder it is far ahead of anything yet discovered. Since 1897, the year it first came into competition, it has won the chief prizes in the National and International shoots and in many military shoots where it has been tried, making records which have been a marvel to marksmen the world over. Its long range, regularity and accuracy are simply phenomenal.

Many experts prefer it to any nitro powder, while the beauty of it is, it costs so much less and requires nothing better than the ordinary gun, shell, primer and loading, such as would be required for a good quality of black powder.

PETERS' "TARGET" LOADED SHELLS.

A Medium Price Shell, with Battery Cup Primer, for Bulk Smokeless Powders.

12 Gauge, Loaded with New Schultze Smokeless Powder.

The "Target" shells are of a rich red, and are very handsome in appearance. They are intended for the bulk nitro powders. They also have the No. 3 primer, which gives the proper flash and prompt action required, and imparts the highest initial velocity. No smokeless loads can excel them. They have medium height of brass and are ornamented. They are loaded in the best possible manner, and have no superiors at the trap. They are preferred by many of the best shooters in the country, and cannot be too highly recommended.

PETERS' LOADED SHELLS.

"HIGH GUN."

12 Gauge, Loaded with Laflin & Rand's Infallible Smokeless Powder.

25 IN A BOX. 500 IN A CASE.

While the loaded shells made by the Peters' Cartridge Co. have for years been the equal of the best makes, they are to-day unequaled in quality and appearance. The brass is especially prepared and free from tarnish, the paper is richer and more even in color, the top wads are a lighter shade of the same color as the body of the shell, presenting a handsome finish, while the crimp is smoother and of better form. Never has so much attention been paid to the quality of paper and brass, to the material and method of loading and to every detail of manufacture.

The "High Gun" and "Premier" shells are of a deep blue, and are intended for dense nitro powders, having for this purpose the customary high base and a strong No. 3½ primer, calculated to give quick and thorough ignition. The paper and brass are of extra quality. The "High Gun" is intended as a medium grade and has medium high brass. The "Premier" is the highest grade and has extra high brass. In both instances the brass is ornamented by indentations, and the inner open end beveled to avoid cutting off of paper. These shells are used by the very best experts, and have given great satisfaction. They develop the greatest velocity of which dense powders are capable. The felt wads are very thick and elastic, the pressure is carefully regulated, and everything is done to secure a perfect load and the best results.

The above list has been carefully compiled and will meet every reasonable requirement. The various combinations of powder and shot will be furnished in any size shot; the final figure of load number may be changed according to size of shot wanted. Special loads will not be supplied except at an advance in price.

25 IN A BOX. 500 IN A CASE.

The Ideal Shells are a rich red color and are very handsome in appearance. They have the No. 3½ primer which gives the proper flash and prompt action required, and imparts the highest initial velocity. No smokeless loads can excel them. The Ideal shells have an extra height of brass and are ornamented. They are loaded in the best possible manner and have no superiors at the trap. They are preferred by many of the best shooters in the country and can not be too highly recommended.

The above list has been carefully compiled and will meet every reasonable requirement. The various combinations of powder and shot will be furnished in any size shot; the final figure of load number may be changed according to size of shot wanted. Special loads will not be supplied except at advance in price.

GUARANTY—These shells are made by the latest improved machinery and are loaded with extreme care. We warrant every Peters' loaded shell we send out.

(Signed)
HIBBARD, SPENCER, BARTLETT & Co.

PETERS' PRIMERS.

Every part of these primers, beginning with the crude fulminate, is manufactured by Peters Cartridge Co., and they are therefore able to maintain the highest standard of quality. They are sure fire and perfectly adapted to the various shells and cartridges for which they are designed.

PETERS' GUN WADS.

Black Edge.

Gauge	8	9	10	11	12	13	14	15	16	20
Regular thickness per thousand	$0.80	.70	.70	.60	.60	.60	.60	.60	.60	.60
¼ in. thick			1.05		.90				.90	
⅜ in. thick					2.50					

Victor.

Gauge 12

¼ in. thick per thousand $0.90

These wads are especially adapted to nitro powder, contain no oil or grease, and are well protected against dampness. Should be used next to the powder, with lubricated wad above. Recoil will be perceptibly lessened and other qualities improved.

Pink Edge.

Gauge 12

Regular thickness, per thousand $1.00

Damp Proof.

12 Gauge per thousand $1.00

These wads are made from the best quality of elastic felt, especially prepared and covered with black waterproof paper; for use over powder to protect it from dampness or grease.

White Felt.
Lubricated, for Nitro Powder.

Gauge 12

⅜ in. thick per thousand $2.75

REGULAR AND ¼ IN. THICKNESS, 250 IN A BOX; ⅜ IN THICKNESS, 125 IN A BOX.

Cardboard.

Cut from card board made especially for this purpose, of even thickness and density.

Gauge	8	9	10	11	12	16	20
"A" thickness, Over-Powder, 72-1000 in. per thousand	$0.26	.22	.22	.18	.18	.18	
"B" thickness, Over-shot, 40-1000 in. per thousand			.22	.18	.18	.18	.18

Grease Proof Cardboard.

For use over nitro powders. These wads are covered on both sides with waterproof material, preventing the powder from being affected by grease from the felt wadding. They are of uniform density, and will give improved velocity and pattern.

Gauge 12

Per thousand $0.30

Nitro Cardboard.

Thick blue. For use over nitro powders. Will increase velocity and penetration and improve pattern by preventing the felt wads being torn by the explosion.

Gauge	10	12	16
Per thousand	$0.22	.18	.18

ALL WADS ARE PACKED 50,000 IN A CASE.

GUNPOWDER AND BLASTING SUPPLIES.★

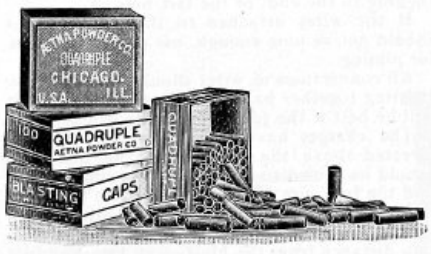
Powder or dynamite cannot be shipped with other goods.

Dynamite is a combination of nitro-glycerine with other explosive ingredients, and when properly manufactured is much safer than gunpowder. 40% is the grade most used and is best for quarry work, stump blasting, etc. The lower grades, 20% to 30%, are suitable for blasting clay, very soft rock and other material which requires a pushing rather than a shattering effect. 30% and 35% are for moderately hard rock and stumps in light soil; 45% to 60% for very hard rock. 60% and 75% are best for breaking bowlders, submarine blasting and shooting wells. Sold by weight only.

DYNAMITE BLASTING CAPS.



Aetna.

Gold Medal, XXXX, quadruple strength, per thousand $10.00

Silver Medal, XXX, triple strength, per thousand 9.00

Always store and carry your caps separate from the dynamite. Caps cannot be shipped with dynamite.

Red Cross Dynamite, Low Freezing.

Strength	30	33	35	40	60%
Per pound	$0.16½	.17	.17½	.18	.21

The above explosives are especially adapted for blasting stumps, breaking bowlders, digging wells, quarrying work, etc.

Freezes slowly and not above 30°.

Repauno Gelatin, Hercules Gelatin, Giant Gelatin and Forcite.

Strength	35	40	60	75%	
Per pound	$0.17½	.18	.21½	.23	

These are especially adapted for use in tunnels or other places where the ventilation is not especially good.

Judson Railway Powder, per pound $0.11

Judson railway powder is especially adapted for open excavations, especially in shaly rock. Cases containing 50 lbs. net, four bags to the case.

All dynamite is packed in cases containing 50 lbs. net, in cartridges ⅞×8 in., 1×8 in. and 1¼×8 in. Special sizes for special purposes can be had at increased cost for package.

Thawing Dynamite.

There are various ways of thawing High Explosives. They are all the same in effect. THAW SLOWLY AND GRADUALLY.

One of the simplest and best ways is to spread the cartridges on a shelf, or on the floor, in a warm room and leave them over night. Burying dynamite in boxes in fresh manure is a safe and fairly effective way to thaw the explosive, provided the manure is fresh.

Never thaw dynamite by putting it near a fire, or in the oven, or against a stove or steam heater. And do not try to thaw by exposing dynamite to live steam, or soaking in hot water.

It is not at all necessary that the cartridge should feel warm.

Be sure they are soft (*all through*) and you will be all right.

POINTS ON BLASTING.

To Prepare a Cartridge for Use.

Cut off a piece of fuse the required length and carefully insert the *freshly-cut end* of the fuse in the *cap*. The fuse should exactly fit the cap. If it is too large, pare it down; and if too small, wrap it with paper till it is the right size. Press the cap down gently until the charge contained in the cap comes in contact with the loose powder of the fuse end, then with the crimpers tighten the empty end of the cap, so that the fuse cannot be pulled out of the cap. The fuse and cap will then be ready to put in the cartridge.

The principal precaution to be observed in crimping caps on the fuse is, to be careful not to crimp the caps tight enough to cut off the powder train in the fuse, thus preventing the fire from reaching the cap and causing a failure of the blast.

If the place where the blasting is being done is wet, the filling of the cap must be protected, as it is quickly spoiled by moisture, and if allowed to become damp might cause the blast to hang fire or miss altogether. This trouble can be very simply prevented by smearing the oustide junction of the fuse and cap (*i. e.*, where the cap is crimped to the fuse as well as the hole in the cartridge where the fuse enters) with grease, tallow, or some similar substance to keep out the dampness.

Now, having prepared the cap as just described, it is ready to be put in the cartridge. Take a pointed stick of wood about the size of a lead pencil and punch a hole in the side of the cartridge about an inch or two from one end, at an angle towards the other end. Insert the cap in this hole and tie the fuse tightly by means of a half hitch to the cartridge.

This prevents the tamping rod from coming in contact with the cap, and keeps the cap from pulling out of the cartridge.

Always be careful when manipulating dynamite not to taste it or get it on the hands, for the smallest quantity will nearly always cause a violent headache.

Charging the Hole.

Having prepared the cartridge for use in the manner described, insert it in the bore-hole and push it firmly home, being sure it fully fills up the diameter of the hole, for crevices or air spaces greatly lessen the power of an explosive. It is sometimes well in dry ground to slit the side of the paper shell before pressing home.

Tamping Rod.

Be sure the tamping is done with a wooden rod. *Never use a metal tamping rod or a rod having metal parts.* An old broom handle makes an excellent tamping rod.

Tamping.

After the charge is pressed home as directed, put in two or three inches of fine dirt or sand, and tamp (pack) *lightly*. The tamping material should be packed as firmly on top of the charge as can consistently be done without disarranging the cap and fuse in the cartridge. Then fill up two inches more of the hole with tamping material, packing it in a little more firmly. After five inches of tamping covers the charge, the tamping may be rammed as hard as is possible with hand power, without danger of premature explosion. Hand power is the limit of safe working. It is not safe to tamp by a blow any stronger than can be given by hand. Fill the bore-hole up with tamping until even with the surface. The firmer and harder it can be made (without overlooking the above precautions), the better will be the results. If proper tamping of the bore-hole is neglected, the charge is likely to "blow out," or at any rate some of its force will be wasted.

DYNAMITE CANNOT BE SHIPPED WITH OTHER GOODS. CAPS CANNOT BE SHIPPED WITH DYNAMITE OR POWDER. NEITHER CAN BE SENT BY EXPRESS.

ELECTRICAL BLASTING SUPPLIES.

BLASTING MACHINES.

These machines will be found to fully sustain their reputation for reliability. They are well made throughout, work smoothly, are hard to break and easy to repair. The design is extremely simple, so that an ordinary workman can keep them in good order and make slight repairs if necessary. This simplicity of design, together with strong and durable construction, enables us to produce a machine which will stand well the hard usage such things generally receive and come as near taking care of itself as any machine can, at the same time being easy to care for and repair.

No. 1—Capacity 8 to 10 holes, height of case 11 in., w't 18½ lbs.....each $15.00

This machine is used mostly for shooting wells, prospecting and any blasting where but a few charges are to be fired simultaneously.

No. 3—Capacity 20 to 25 holes, height of case 13½ in., w't 22½ lbs....each $25.00

This is the favorite of quarry men and railroad contractors.

No. 4—Capacity 30 to 50 holes, height of case 18 in., w't 45½ lbs.....each $50.00

The best size for ordinary quarry work and railroad contractors' use, even if only twenty holes are to be fired at a shot, for the extra current compensates for leaks in the blast line which are sometimes unavoidable.

No. 5—Capacity 50 to 100 holes, height of case 20½ in., w't 66½ lbs....each $75.00

We believe that the No. 5 is as powerful as can be made and still be easily portable and sufficiently easy to drive to enable one man to get the full current out of it.

LEADING WIRE.

No. 16—No. 16 B. & S. gauge copper wire, in coils of 500 ft., w't per coil 8½ lbs., per thousand ft..... $10.00

Enough leading wire is needed with each machine to make two leaders of sufficient length to reach from the blast to a safe distance at which the person who operates the machine should stand. *Five hundred* feet is the quantity usually sold, which means a distance of 250 ft. from blast, but in some cases a greater length of leading wire is needed.

CONNECTING WIRE.

No. 22—No. 22 B. & S. gauge copper wire, 2 lb. spools, 600 ft. on a spool, per pound..... $0.40

This is a pure copper wire perfectly insulated. It is used in connecting the electrical fuses to each other where several charges are to be fired simultaneously, the holes being far apart. A small quantity only of this will be needed if the fuse wires be picked up after each blast, as they can be twisted together and used in place of connecting wire.

Safety of Electric Firing.

Electric firing is by far the safest method, because there is no waiting for the shot to go and no doubt about when it is going to explode. It enables the blaster to retire to an unexposed place in perfect safety and without undue haste, and eliminates all danger of accident because of miscalculation of the time it takes fuse to burn or because of defective fuse, which has frequently resulted in injury to men who have returned to examine a blast about the time it exploded.

In coal mines electric firing does away with practically all danger of the blast igniting gas and furthermore makes it possible to have every man out of the mine when the blast is fired. Many operators consider this latter feature so important that they have adopted electric firing because of this consideration alone.

Smoke from burning fuse is entirely avoided, an item of no little value in mine work.

ELECTRIC BLASTING FUSES.

Cotton Covered, Quintuple Strength, Double Wound Insulation, Warranted Perfect.

Feet.....	4	6	8	10	12
Per 100....	$3.00	3.54	4.08	4.62	5.16

50 IN A BOX, 500 IN A CASE.

BATTERIES AND ELECTRIC FUSES.

When a good deal of blasting is to be done, it is usual to set off the blasts by means of a battery and electric exploder (called an electric fuse). In this way any number of blasts from five or ten up to forty can be fired at once. This is found extremely convenient when it is necessary to get rid of a very large stump or extra large bowlder, as frequently several ordinary sized charges fired simultaneously will destroy an obstacle which would not be affected by the same charges fired successively or by one charge as large as all the smaller ones combined.

Directions for Using Machine.

An electric fuse should be used with the wires attached of such length that the ends may protrude from the surface after the hole is charged, the fuse head being in the center of the charge.

Tamp with dry sand, or in such a manner that the wires will not be cut nor the insulated covering upon them injured.

When all the holes to be fired at one time are tamped, separate the ends of the two wires in each hole, joining one wire of the first hole with one of the second, the other or free wire of the second with one of the third, so proceeding to the end, or the last hole.

If the wires attached to the electric fuses should not be long enough, use connecting wire for joining.

All connections of wires should be made by twisting together bare and *clean* ends, and it will be best if the joining parts be bright.

The charges having all been connected as directed above, the free wire of the first hole should be joined to one of the "leading" wires, and the free wire of the last hole with the other of the two leading wires. The leading wires should be long enough to reach a point at a safe distance from the blast—say two hundred and fifty feet, at least.

All being ready, and not until the men are at a safe distance, connect the leading wires, one to each of the projecting screws on the top of the machine, through each of which a hole is bored for the purpose, and bring the nuts down firmly upon the wires.

Now, to fire, taking hold of the handle for the purpose, lift the rack (or square rod toothed upon one side) to its full length and press it down, with all force, bringing the rack to the bottom of the box with a *solid thud*, and the blast will be made.

ONE DOZEN IN A BOX.

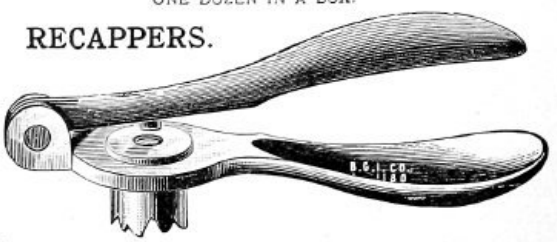
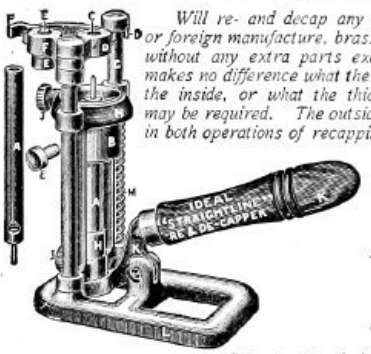
RECAPPERS.



No. 180—10 or 12 gauge, japanned, - - per dozen $1.00
No. 180—16 or 20 gauge, japanned, - - " 1.00

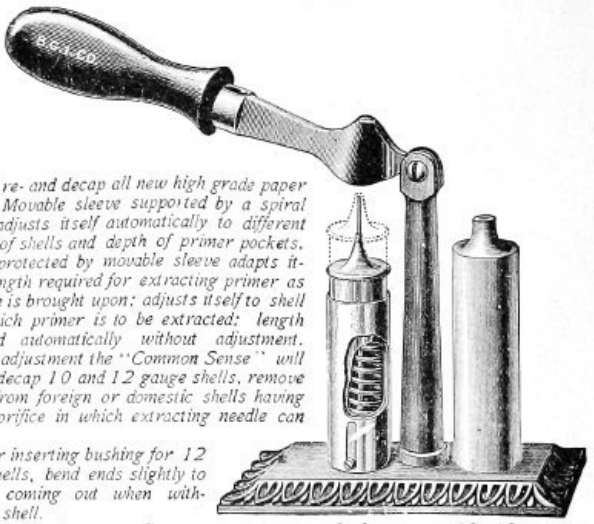
ONE DOZEN IN A BOX.



Will re- and decap any and all shells, whether of domestic or foreign manufacture, brass or paper, from 10 to 16 gauge, without any extra parts except a bushing for each gauge. It makes no difference what the shape or size of the shell may be on the inside, or what the thickness of the head, or what primer may be required. The outside of the shell only is used for a guide in both operations of recapping and decapping. The inside stud or pin "A" is small enough to escape all of the various shapes and sizes of the base of the shells, and all shells rest on and are supported on the top of this inside stud "A" and all of the pressure exerted is received on the top of the pin or stud. There can be no concaving of the head or receding from the pressure applied on the lever.

Ideal Straightline.

No. 20—10, 12 or 16 gauge, japanned iron base, enameled wood handle, steel uprights, detachable steel shell bushing, reversible re- and decapping plunger, milled steel thumb screws, revolving top, steel spring, height 5 in., w't 1 lb., - - - - - - - each $1.50
Extra Guide Bushings, 10, 12 or 16 gauge, for above, " .35



Will re- and decap all new high grade paper shells. Movable sleeve supported by a spiral spring, adjusts itself automatically to different lengths of shells and depth of primer pockets. Needle protected by movable sleeve adapts itself to length required for extracting primer as pressure is brought upon; adjusts itself to shell from which primer is to be extracted; length regulated automatically without adjustment. Without adjustment the "Common Sense" will re- and decap 10 and 12 gauge shells, remove primer from foreign or domestic shells having central orifice in which extracting needle can enter.

After inserting bushing for 12 gauge shells, bend ends slightly to prevent coming out when withdrawing shell.

No. 1186—COMMON SENSE, recapper and decapper, 10, 12 or 16 gauge, - - - - - per dozen $20.00

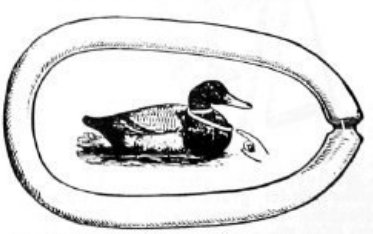
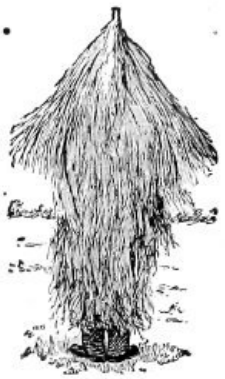
DECOY WEIGHTS.



No. 15—Galvanized iron, 4¾×2¾ in., w't per doz. 6 lbs.....per dozen $1.00

GRASS SUITS AND BLINDS.

HUNTING SUITS.



Grass Hunting Suits, - each $1.50

For wild goose, duck and all kinds of shore bird shooting; made of long, tough marsh grass, into cape coat with hood. Weigh less than 4 lbs.; are convenient to wear and shoot from. Make good waterproofs in rainy weather; are easily packed and carried. Hunters appreciate the value of these suits, as no blind or bough house is necessary when shooting on marshes.

SHORE BLINDS.

BOAT BLINDS.

Grass Shore Blinds, size 6×3 ft., - per piece $1.50

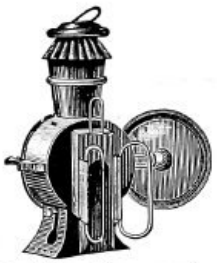
More convenient for certain kinds of shooting than a grass suit, as it can be made as large as desired and give ample room for a comfortable seat. Are supplied with stocks to be fastened to the blinds, which can be set up anywhere. Usually two pieces make a blind.

Grass Boat Blinds, size 5 ft. 10 in. × 27 in., - per piece $1.50

Made to resemble wild rice, rushes, marsh grass, etc., are light in weight, each piece rolling in a small roll. Each piece is supplied with sticks, which fit into screw eyes screwed in rail of boat, making them easily adjusted. Usually four pieces are sufficient to go around an ordinary boat. Some use blinds only on one side of boat.

HUNTING AND OUTDOOR LAMPS.

HUNTING.



No. 357—FERGUSON'S, black, japanned, height 8½ in., depth 2¾ in., face 3¾ in., w't 17 oz., without head attachment, - - - - - - - each $7.50

No. 0318—Witch-Elk, 12 in., otherwise same as No. 0310 - - - - - - - - - - - - " 10.00

This high grade line of hunting boots needs no introduction to the sporting fraternity. In handling this line, the dealer can feel that he is offering the best as well as the best known sporting boot on the market. These boots are as waterproof as leather can be made, and if properly treated with the waterproof dressing, will give entire satisfaction. They are not warranted to be absolutely waterproof, as there is no boot made from leather that can be so warranted.

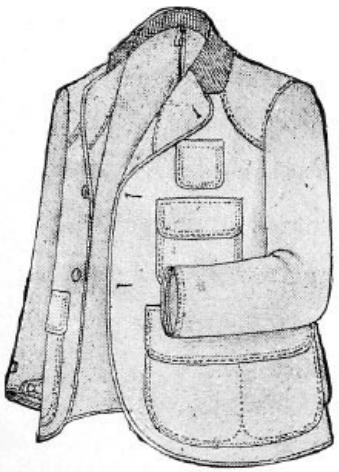
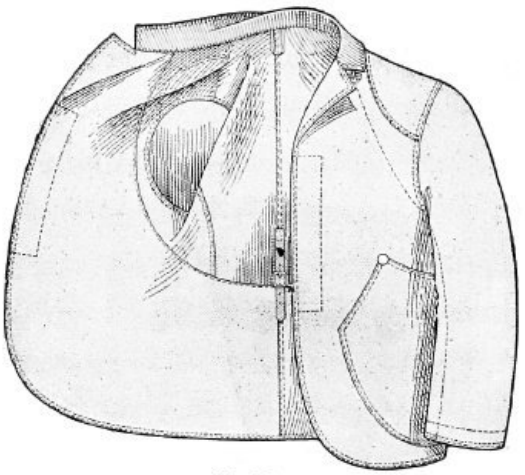
ONE PAIR IN A PACKAGE.

REV-O-NOC HUNTING COATS.



No. 30.



No. 52.

No. 62.

No. 30—Finest quality 10 oz. standard army duck, made in best possible manner, lined with fine 8 oz. army duck and double stitched throughout, corduroy collar and corduroy adjustable cuffs, 5 outside cut-in pockets and 1 whistle pocket, double skirt game pockets with entrance at front edges and back seams, shoulders reinforced and padded, match pocket mackintosh lined with friction striker on inside breast lapel, ventilated gusset under arms which gives great freedom of movement, made in dead grass color, per dozen $42.00

No. 52—10 oz. khaki, lined with same material, 4 large outside pockets extending entirely around the coat, pockets so arranged in front that shells will not drop out when wearer stoops over, the inside pockets extend entirely around coat, open at front edge, shoulders reinforced, corduroy collar, double stitched throughout, open under arms, - - - - - - - - - per dozen 48.00

The pockets of this coat are so arranged in front that shells will not drop out when the wearer stoops over or goes through a wire fence. The rear part of these pockets can be used for carrying lunch, shells or additional game. The inside pockets extend entirely around coat, open at front edge. The special feature of this pocket is its size and arrangement, being made open all around and supported in the center with a strap and buckle which allows cleaning and airing, also an easy access to its contents at any time.

No. 62—Best quality 10 oz. army duck, dead-grass color, full lined with 8 oz. army duck, shoulders reinforced and padded, corduroy collar, adjustable cuffs, 6 outside pockets with large flaps, 3 game pockets, entrance from front edges and back seams, double stitched throughout, ventilated gusset under arms, cut-in pockets, - - - - - - - - - per dozen $50.00

No. 74—10 oz. khaki, full lined with 8 oz. khaki, corduroy collar and cuffs, adjustable sleeves, reinforced and padded shoulders, 6 outside pockets and three inside game pockets, 1 waterproof match pocket inside, gusset under arms, - - - per dozen 54.00

AVERAGE WEIGHT 33 LBS. PER DOZEN.

PLAIN SLICKERS.

		YELLOW	BLACK
Drill, single,	per dozen	$19.00	
Cape Ann, herders', double,	"	21.00	$22.25
Shield Brand, double,	"	25.00	26.25
Fish Brand, double,	"	30.00	31.25

Sizes 0, 1, 2 and 3, lengths 58, 56, 54 and 52 in., according to breast measure. All grades have woolen collar. Shield and Fish brands have epaulets, throat piece and elastic inside sleeves. The herder slicker is a superior article, well adapted for the purpose. Slickers are split up the back about 30 in.

All black slickers are now made with improved silk finish, which greatly improves the appearance and wearing qualities of the goods.

The breast measurement of No. 1 is 46 to 48 in.; No. 2, 42 to 44 in., and No. 3, 38 to 40 in. Sizes 1, 2 and 3 are regular, the usual assortment for one dozen being four No. 1, six No. 2 and two No. 3. Size 0 is extra large (50 to 52 in.) and is sent only on special orders.

AVERAGE WEIGHT 55 LBS. PER DOZEN.

FROCKS.

		YELLOW	BLACK
Shield Brand,	per dozen	$18.00	$19.00

AVERAGE WEIGHT 45 LBS. PER DOZEN.

MEDIUM LONG COATS.

		YELLOW	BLACK
Shield Brand,	per dozen	$21.25	$22.25
Fish Brand,	"	23.50	25.25

Sizes 0, 1, 2 and 3, length 44 in. These are the same as the frock coats in every particular except length, being 6 in. longer.

AVERAGE WEIGHT 48 LBS. PER DOZEN

POMMEL SLICKERS.

		YELLOW	BLACK
Fish Brand,	per dozen	$35.00	$36.25

This slicker is designed to cover both rider and saddle in front and behind. It is otherwise the same as the plain article of the same brand.

AVERAGE WEIGHT 71 LBS. PER DOZEN.

Single drill goods are made from finest standard drills, and are strong and serviceable. Cape Ann double clothing is heavier and better grade. The Shield brand is equal to most first quality goods of other manufacture, and the Fish brand represents the finest material, workmanship, and utility possible in oiled clothing.

"OUR VERY BEST" OILED CLOTHING.

Each step in the manufacture of this unequalled line of clothing, from the selecting of the long staple cotton, from which to make the special close-woven cloth, to putting on the brand, is taken with the one single purpose in mind—viz: TO MAKE AN OILED GARMENT THAT IS THE BEST THAT CAN BE MADE. A garment that is absolutely *Waterproof, Durable,* and entirely *free from stickiness.*

In addition to the extreme and minute care in the process of manufacturing, "O. V. B." Clothing has several features, found in no other line. All "O. V. B." Slickers and Frocks have Shoulder Caps, Elbow Patches, Inner Sleeves, Weather Pieces, Flannel-lined Collars, and Throat-pieces. Two Pockets. The Buttons on the "O. V. B." Garments are patent Eyelet—Fastened Zinc Buttons with a smooth back, that does away entirely with the annoying catching and tearing of clothing so common in other lines. Furthermore these buttons are superior to others in that they will not rust or corrode.

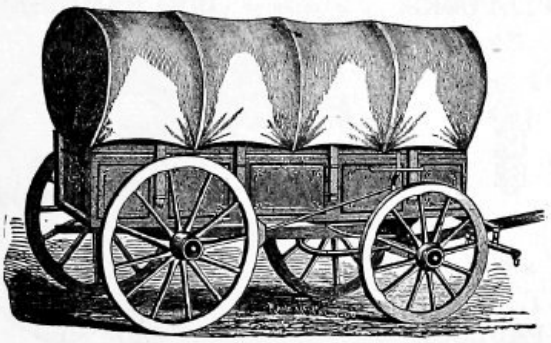
WAGON COVERS, PAULINS AND DUCK.



We carry covers and paulins in three grades.

H.V.B.—This is our extra heavy and select quality. Made of the highest quality of duck. No pains have been spared to make articles in this grade superior in every way. **H.V.B.** grade goods are warranted.

Ajax—This is the recognized standard and made to meet the demand for an extra quality medium weight article of superior construction and at a moderate price. The canvas used is of extra quality, closely woven, and specially produced for this grade. We warrant every square yard of canvas used in Ajax grade goods to be as represented and weight as marked.

Standard—This is made to meet the popular demand for low priced goods. While the material used is light weight and the sizes are not as full as our other goods, nevertheless each article is well and serviceably made. The canvas used is of good quality, closely woven and specially produced for this grade.

ABOUT 100 YDS. IN A ROLL.

TENTS AND SHEETS.

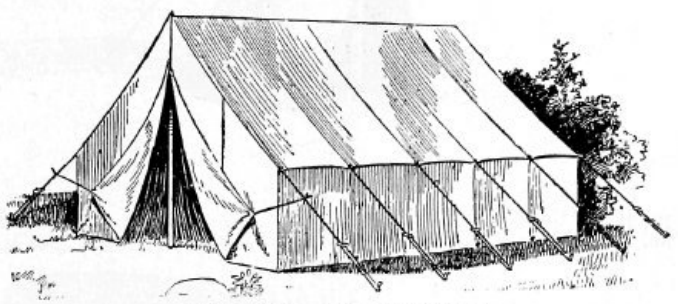
There are two essential features which enter into the cost of any article. The one is quantity and the other quantity. In establishing the standards for our different grades, we deemed it advisable to make quantity or weight subservient to the quality furnished, or in other words, we believe in using the best duck or material produced for the purpose for which every article is intended, or a close woven duck constructed of strictly middling cotton in preference to a loose woven duck made of waste or low or ordinary cotton, heavily sized and artificially weighted.

O.V.B. Grade—Heavy weight. Nothing but fine quality material of close weave is used in constructing articles in this grade, guaranteed superior in every essential feature. All goods in this grade are full standard size in every respect.

Ajax Grade—Medium weight. This grade is the recognized market standard. Material used in this grade is of extra quality and well made and finished. All goods are full standard size.

Standard Grade—Light weight. This grade is designed to be sold strictly on price and without any recommendations. It represents our competitive quality. Goods in this grade are made of good quality material of close weave. All articles are well and serviceably made.

WALL.



O.V.B., Ajax and Standard Grades.

Feet	7×7	7×9	8×10	9×9	9½×12
Height of Wall	3	3	3	3	3 ft.

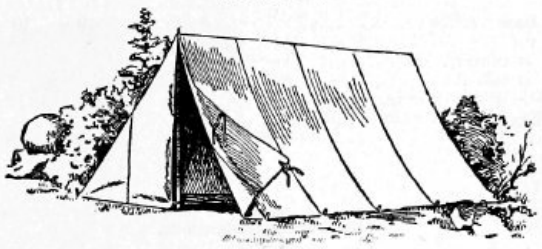
12 oz. Duck, double filling each	22.65		26.80	29.80	35.50

Above prices are for Tents complete with Poles, Stakes, Guy Ropes and Keys, but without Fly. Flies, complete except poles and stakes, are one-half the price of tent of corresponding size. Add five (5) per cent for each additional six (6) inches of wall.

If poles are not wanted deduct five (5) per cent.

The wall and center height measurement given above are in "O. V. B." grade. Standard and Ajax tents do not fulfill these specifications.

WEDGE.



O.V.B., Ajax and Standard Grades.

No. 28S—7×7 ft. base, blue and white striped duck..... " 5.75

FOLDING TENT COTS.

No. 10—ENTERPRISE, hard maple frame, painted green with best waterproof paint, the cot cover is of 10 oz. brown duck, the canopy or tent part 8 oz. brown duck, two end windows 9×12 in. protected by strong mosquito netting, with adjustable flaps, length inside when opened 6 ft. 3 in., when folded 3 ft. 6 in., width 28 in., height above ground 18 in., from bed to top of canopy 32 in., w't 30 lbs..... each $12.00

This cot is very strongly yet lightly built, is impervious to rain or sun and is well ventilated. The sides, top and ends are collapsible and fold down closely within the frame which holds them snugly in place making a compact and convenient bundle.

For sleeping out in the open it is just what has so long been desired, and for those who spend nights out of doors it will be found of the greatest utility and comfort.

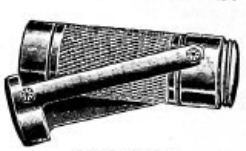
MATCH SAFES.



MARBLE'S.

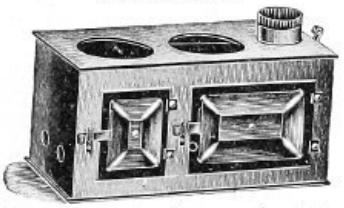
No. G2—Pocket, waterproof, nickel plated drawn brass, size 2¼×⅞ in., per dozen $7.20

The bottom of the box is threaded to receive threaded collar, which is attached to the downwardly extending arms of the cover. The cover has a rubber gasket firmly held in place by a brass washer. A protecting tooth prevents the cover being swung too far to one side.

ONE DOZEN IN A BOX

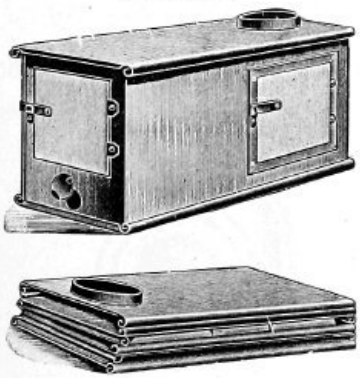
CAMP STOVES.

CAMPERS'.



No. 125G—CAMPERS', sheet steel, with hinge doors, two holes with covers, six feet telescope pipe, size 23×12×12 in., oven 10×10×6 in., w't 15 lbs....each $3.20

OUTING.



No. 50G—OUTING sheet steel, folding, with hinged doors, sliding circular joints, size 26×10×11½ in., oven 8×10×6 in., w't 12½ lbs., takes 5 in. pipe, each $6.00

Can be put together without the use of tools or rivets, and forms an air-tight stove in which the draft can be regulated to a nicety. The stove can be easily taken apart.

In assembling, the sides are secured to the bottom by sliding the sections together; the front and back sections are then forced down, after which the bottom, sides and top of oven are put into position; the top is next slid on from the front.

ONE IN A BOX.

LITTLE PET.

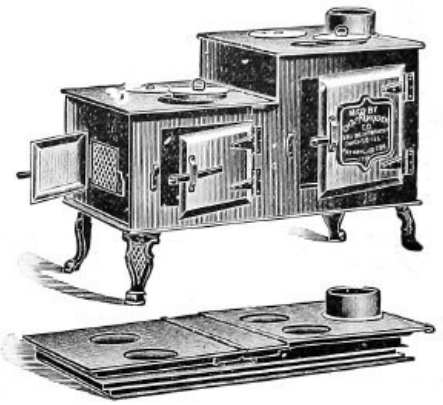
No. 120G—LITTLE PET, 20 gauge steel, length 23 in., height 12 in., width 12 in., 8×8×12 in. oven, two 5 in. cooking holes, not folding, w't 25 lbs., takes 5 in. standard stove pipe.....each $12.00

No. 220G—LITTLE PET, *folding*, otherwise same as No. 120G.. .....each 16.00

Very compact, light and easy to set up.

ONE IN A BOX.

SPORTSMAN'S.



No. 320G—SPORTSMAN'S DELIGHT, 20 gauge steel, length 29 in., 16 in. oven, 11 in. high at the fireplace, removable legs 7 in. high, making the stove 23 in. high when in use, four 5 in. cooking holes, takes 4 in. pipe; oven, 10 in. wide, 11 in. high and 17 in. deep, *not folding, with hearth*, w't 38 lbs...each $16.00

No. 420G—SPORTSMAN'S FRIEND, *folding, without hearth*, otherwise same as No. 320G.....each 20.00

All stoves are packed in a neat pine box, convenient for shipping and storing. Stoves are painted with graphite black enamel, which does not burn or peel off in use. Every cooking hole is protected with a cast iron ring riveted firmly on the inside, so no matter how heavy the cooking utensil may be, there is no danger of injuring the stove.

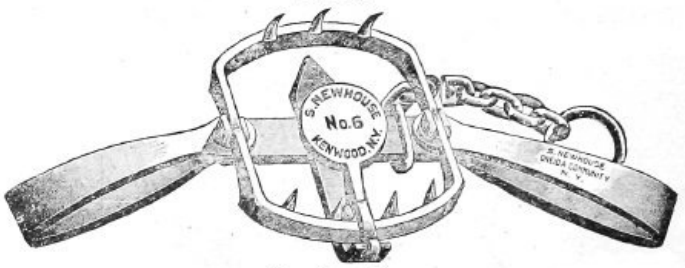
ONE IN A BOX.

STEEL TRAPS.

Nos. 0, 1 and 1½.

Nos. 2, 3 and 4.

No. 2½.



Nos. 5 and 6.

STEEL GAME, WITH CHAIN.

No. 0	—3½ in., rat, single spring, w't per doz. 5½ lbs. ..... per dozen	$ 4.25
No. 1	—4 in., muskrat, single spring, w't per doz. 7¾ lbs. ..... per dozen	5.00
No. 1½	—4⅞ in., mink, single spring, w't per doz. 11¼ lbs. ..... per dozen	7.50
No. 2	—4⅞ in., fox, double spring, w't per doz. 14½ lbs. ..... per dozen	10.50
No. 3	—5½ in., otter, double spring, w't per doz. 22 lbs. ..... per dozen	14.00
No. 4	—6½ in., beaver, double spring, w't per doz. 25 lbs. ..... per dozen	16.50

In this grade we carry both Victor and Hector brands. These are staples in every hardware store and are the most saleable traps on the market. Farmers and trappers of small game, who find that a cheap trap answers their purpose, are pleased with these traps in their present perfected form.

HAWLEY & NORTON, WITH CHAIN.

No. 0	—3½ in., rat, single spring, w't per doz. 6 lbs. ..... per dozen	$ 4.25
No. 1	—4 in., muskrat, single spring, w't per doz. 8½ lbs. ..... per dozen	5.00
No. 1½	—4⅞ in., mink, single spring, w't per doz. 13½ lbs. ..... per dozen	7.50
No. 2	—4⅞ in., fox, double spring, w't per doz. 16½ lbs. ..... per dozen	10.50
No. 3	—5½ in., otter, double spring, w't per doz. 26 lbs. ..... per dozen	14.00
No. 4	—6½ in., beaver, double spring, w't per doz. 29 lbs. ..... per dozen	16.50

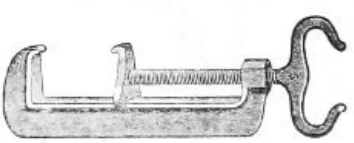
The Hawley & Norton traps are almost identical in form with the Newhouse, but are somewhat lighter throughout and therefore cheaper. They are, however, good, reliable traps with quite a reputation of their own.

NEWHOUSE, WITH CHAIN.

No. 0	—3½ in., rat, single spring, w't per doz. 7½ lbs. ..... per dozen	$ 4.25
No. 1	—4 in., muskrat, single spring, w't per doz. 10 lbs. ..... per dozen	5.00
No. 1½	—4⅞ in., mink, single spring, w't per doz. 14 lbs. ..... per dozen	7.50
No. 2	—4⅞ in., fox, double spring, w't per doz. 17½ lbs. ..... per dozen	10.50
No. 2½	—4⅞ in., otter, single spring, with teeth, w't per doz. 23 lbs., per dozen	16.50
No. 3	—5½ in., otter, double spring, w't per doz. 28 lbs. ..... per dozen	14.00
No. 4	—6½ in., beaver, double spring, w't per doz. 33 lbs. ..... per dozen	16.50
No. 5	—11¾ in., bear, double spring, w't per doz. 234 lbs., w't each spring 2 lbs. 10 oz. ..... per dozen	120.00
No. 6	—16 in., grizzly bear, double spring, w't per doz. 504 lbs., w't each spring 6 lbs. 10 oz. ..... per dozen	280.00

These are the best traps made. Nothing but best crucible steel used in the springs. Each trap is set and sprung to be sure it is working correctly. The stock is a mixture of special Norway iron. The standard is kept up by frequent repetition of tests and by daily watching results. The springs are tested in three different ways before leaving the factory. The other parts are carefully tested and inspected. Newhouse traps are absolutely guaranteed.

NEWHOUSE BEAR TRAP CLAMPS.



No. 5—For setting No. 5, w't per doz. 10½ lbs. ..... per dozen	$ 6.00
No. 6—For setting No. 6, w't per doz. 14 lbs. ..... per dozen	10.00

ONE IN A BOX.

NITRO-SOLVENT OIL.

No. 40—MARBLES, 2 oz. bottles, per dozen. $3.00

This quickly dissolves the residue of all powders. It lubricates and will not gum. It removes rust, gum and dirt, polishes and prevents rust. It contains no acid and is adapted for all tools and mechanisms.

ONE DOZEN IN A BOX.

GUN GREASE.

No. 25—AJAX, prevents rust, cleans and preserves, in 1×5 in. tubes, per dozen $1.80

A light coat of this grease on any unprotected surface of metal will prevent it from rusting and preserves its finish and luster.

ONE DOZEN IN A BOX.

GUN GREASE.

No. 18. No. 19.

No. 18—MARLIN RUST REPELLER, cleans and preserves, in 1×4 in. tubes, per dozen $1.80

No. 19—WINCHESTER GUN GREASE, cleans and preserves, in 1×4 in. tubes, per dozen 1.80

NO. 18, EIGHTEEN; NO. 19, ONE DOZEN IN A BOX.

THE END OF THIS DIVISION

In order to allow for future additions to this line, we have omitted pages 2017 to 2100 inclusive.

Please note that each succeeding division of this catalogue begins with the first number of the following hundred pages.

THE WEIGHTS GIVEN IN THIS CATALOGUE

Are supplied solely as an aid in figuring freights, and are approximately accurate. As changes are constantly being made in the manner of packing goods, and on account of variations in some lines, it is impossible to give figures that will always be exact in every case. Where possible we have given weights of factory packages as ordinarily sold; on all other goods weights are net and do not include cases.

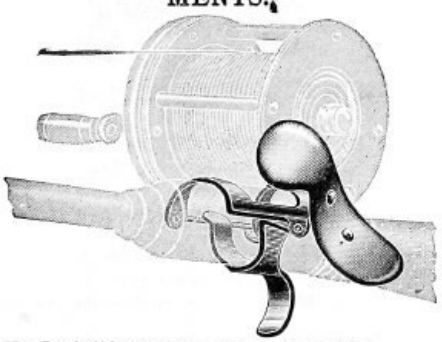
ROD SHORTENERS.

No. 53—2 in., brass, nickel plated, will fit any handle and receive second joint of rod, thus shortening the rod, per dozen $3.00

TWO DOZEN IN A BOX.

HUFFMAN REEL ATTACHMENTS.

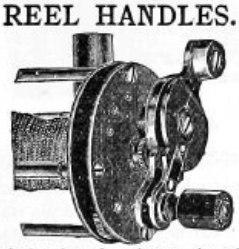


No. 7—Solid German silver, beautiful satin finish, clamps reel firmly on any rod, has a splendid finger hook and hand rest that fits the palm, per dozen..... $24.00

This is a useful device. Its principal use is to enable the angler to hold tackle easily and assist him to lay line evenly and smoothly on reel. The shield part fits the palm perfectly and relieves one of that tiresome, awkward gripping to hold rod in proper position.

ONE IN A BOX.

REEL HANDLES.

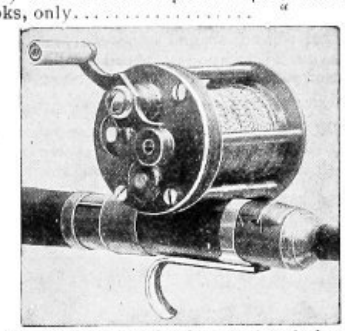


No. 12—Nickel plated ebony handle, per dozen..... $28.00

This handle can be fitted to any reel and greatly increases its efficiency. The handle is made so that there is always a slight drag on the reel. This drag can be made heavier by merely pressing the handle toward the reel. By pressing the handle hard against the reel, the cogs catch and there is no further play given the fish.

FINGER HOOKS.

No. 25—Nickel plated with band, will fit any Bristol rod, complete....per dozen $10.80
Hooks, only..... " 9.00



No. 35—Nickel plated, with two bands for attaching, can be placed in front or back of reel.....per dozen $9.00

ONE IN A BOX.

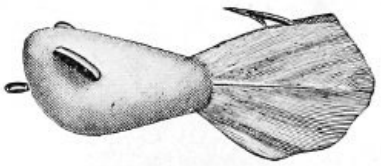
No. 1934—Bucktail Gang, genuine bucktail, mounted on 3/0 treble hooks and one 4/0 sproat single hook, extra strong, waterproof wrapping, per dozen $3.80

ONE ON A CARD; ONE DOZEN IN A BOX.

COAXER.



JAMISON'S.

No. 1—Pickerel and large bass, cork body, red wings, weedless hook, per dozen $9.00

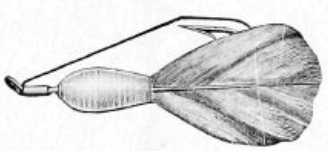
No. 2—Bass, cork body, red wings, weedless hook, smaller than No. 1, per dozen 9.00

No. 5—Muscallonge, cork body, red wings, weedless hook, large size, per dozen 15.00

Coaxer baits are intended for all-around bass, pickerel and muscallonge fishing. Are very attractive and life-like. Each is practically two distinct kinds of bait in one. In addition to having the appearance of a fish while floating on the surface of the water, these baits look for all the world like big bugs when they are flying through the air; a feature that makes them particularly good for bass fishing. Will go through all kinds of weeds and lilies without snagging. Easy to cast and can be used for skittering and trolling as well. A trailer hook for short biters with each bait.

ONE IN A BOX.

COAXER UNDERWATER.

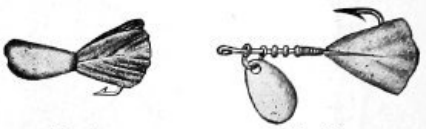


No. 3—JAMISON'S, combination metal and wound body, red feather tail, large open weedless hook .....per dozen $6.80

This bait is designed especially for deep fishing, although it may be used near the surface by rapid reeling. Has no equal for ease of casting, is absolutely weedless and a dead sure killer. When cast, the head goes first and the fluttering of the feathers gives the bait a very life-like appearance. For casting or trolling. Body of bait is about one-half larger than it appears in illustration.

ONE IN A BOX.

TROUT FLIES AND SPOONS.



No. 4. No. 9.

JAMISON'S.

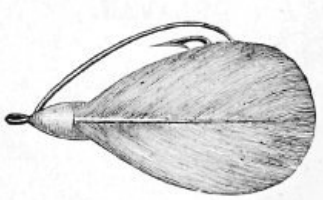
No. 4—Coaxer Trout Fly (floating), cork body, 12 assorted colors, No. 7 hollow point hook .....per dozen $4.80

This bait is the nearest approach to real life ever tied to a line. It rides right side up on the surface of the water under all conditions and never sinks or turns over. When it is used in running water it has the appearance of swimming and apparently of its own accord. To fully appreciate the beauties of this little bait it must be seen in use. Best hollow point hooks. Made to order with any size hook desired.

No. 9—Trout Spoon, nickeled spoon on hollow point hooks, sizes 2, 4 and 6, assorted colors, red, yellow, white and brown .....per dozen $3.80

NO. 4, LOOSE, NO. 9, FOUR ASSORTED COLOR FLIES ON EACH SIZE HOOK ON PERFORATED CARDS CONNECTED. WE DO NOT BREAK CARDS.

BASS FLIES.

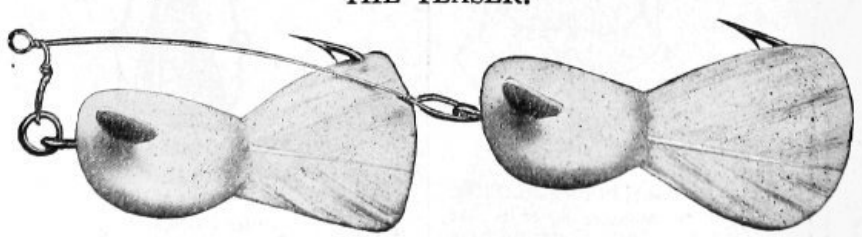


No. 7—JAMISON'S, solid waterproof body, red wings, large open weedless hook, per dozen $4.20

One of the best and most attractive flies made. Best quality sproat hooks. Six specially selected full size feathers. Body can not become loose. Feathers will not break or fray out. Superior quality weed guard.

ONE IN A BOX.

THE TEASER.



No. 6—JAMISON'S tandem bait, cork bodies, red wings, large weedless hooks .....per dozen $16.00

When in full flight this tandem bait bears a striking resemblance to a couple of bugs. The two separate hooks make it a great killer, as well as enabling it to occasionally take two bass at once. Can be used either in tandem form or singly, as one of the baits is on a split ring and can be detached and cast alone. Gives very little trouble when used in weeds. For casting or skittering.

ONE IN A BOX.

WOODEN MINNOWS.

H.S.B. & CO. REV-O-NOC

REVONOC minnows are the best made for catching game fish. Actual tests have shown that REVONOC wooden minnows catch double the quantity of fish that can be caught by the use of live bait.

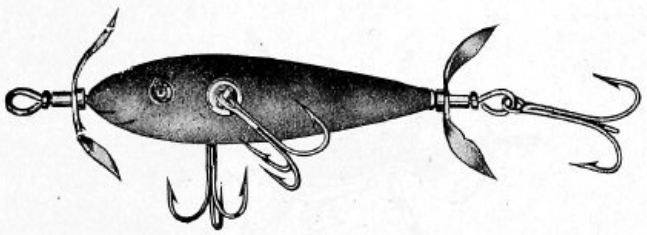
Bodies—of all REVONOC minnows are made of extra selected red cedar, coated with several applications of the best water-proof porcelain enamel, which will not peel off or crack after having been in the water. Their bright and attractive lustre is a sure lure to all game fish.

Hooks—are of the treble pattern, made of best steel wire and are fastened to the sides and tail in such a way as not to scratch body of the minnow. Hooks may be changed at any time from large to small, or vice versa.

Eyes—are of glass, very life-like in appearance, and are well set into the head.

Spinners—Each minnow is fitted with two nickel plated spinners, one at head and the other at the tail, which revolve very swiftly, giving the minnow, in the water, the appearance of being alive.

Materials and Workmanship—The high grade materials used and the expert workmanship in the manufacture of REVONOC minnows, combined with their "fish-catching" qualities, make them the most popular on the market today.



No. 1000.

3 Inch Body, Glass Eyes, with Three Treble Hooks.

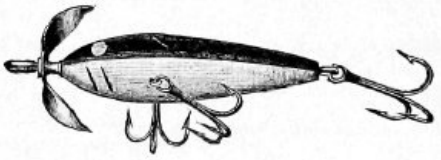
No. 620—Body 1¾ in., green back, yellow belly ..... per dozen $12.00
No. 630—Body 1¾ in., fancy back, white belly ..... " 12.00

Roamer Bait is a very effective fish getter, good everywhere. It is a top water bait and attracts the big ones. Short jerks make the bait more effective. The legs are always working, thus adding to the lifelike appearance. Three treble hooks (two plain and one feathered).

ONE IN A BOX.

IMP.

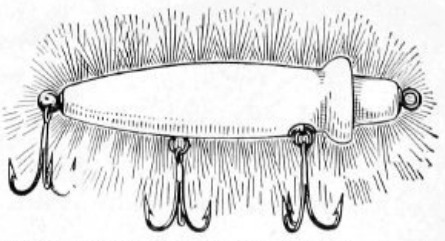


Three Plain Treble Hooks, Wood Body 2½ Inches Long, Weight About 1 Ounce.

No. X20—"Imp," green back, yellow belly ..... per dozen $2.40
No. X30—"Imp," green back, white belly ..... " 2.40

ONE DOZEN IN A BOX.

MOONLIGHT.



No. 95—Luminous, painted white, three treble hooks, length 4 in., w't about 1 oz. ..... per dozen $13.00

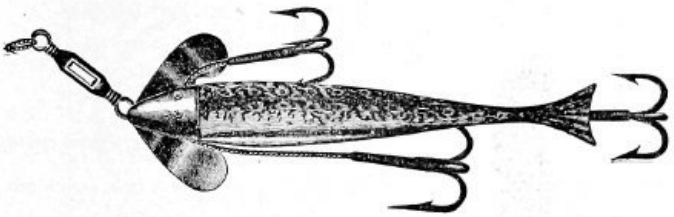
This bait possesses the peculiar quality of absorbing daylight or strong artificial light, and reflecting the same in the dark. It emits a clear white light, which is made more effective by the radiant power of the water. A well exposed bait is good for the whole night.

Can be used for trolling, but preferably for casting.

ONE IN A BOX.

MINNOWS AND BAITS.

PHANTOM MINNOWS.



Highly Polished Metal Head, all Silk Body Covered With Waterproof Varnish, Mounted on Brass Box Swivel and Spring Steel Treble Hooks.

No. **10**—4¼ in., dark back, yellow belly, 3 treble hooks. " 12.80
No. **15**—4½ in., perch, 3 treble hooks..... " 12.80

Has jointed tail portion, which is flexible, and when being drawn through the water the three-blade propeller wiggles the jointed tail portion, and makes an excellent imitation of a live minnow while swimming.

Hooks are very easily detachable, and cannot possibly tangle or interlock, as they cannot swing forward. They can be replaced by any common treble hook of any size or shape.

The bait is finished with a special water-proof finish, which prevents it from soaking water or peeling off.

ONE IN A BOX; ONE DOZEN IN A CARTON.

SPECIAL MUSCALLONGE BAITS.

ONE DOZEN IN A BOX.

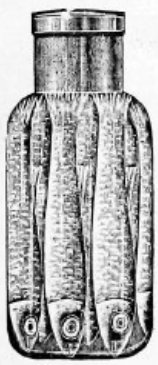
PRESERVED AND ARTIFICIAL BAITS.

PRESERVED BAITS.



Minnows.

Frogs.

Minnows.

No. 1935—Sizes	Small	Medium	Large
No. in bottles	5 to 7	1⅔ to 2⅓	1½ to 2 doz.
Per dozen	$4.00	4.00	4.00

The composition used in preserving the minnow does not affect shape or shininess, will not toughen or harden the bait, and gives all the appearances of a live shiner.

SMALL AND MEDIUM, TWO DOZEN; LARGE, ONE DOZEN IN A CASE.

Frogs.

No. 1936—One dozen in a screw top glass jar.....per dozen $4.00

These frogs are so treated that they preserve their color and, while not rubbery, are slightly elastic and toughened so that they last on the hook better than the live ones.

ONE DOZEN IN A CASE.

PORK RIND.

No. 1937—Prepared in correct shape for casting, 9 or 10 strips in metal boxes.....per dozen boxes $3.80

Strips are 3 to 4 inches long and so shaped that the action in the water is like a live minnow. Can be conveniently carried in the vest pocket.

ARTIFICIAL FROGS.

No. 30.

No. 3-0.

No. 20.

No. 30 REVONOC—Solid rubber with two common hooks, non-floating, length 3 in.....per dozen $4.00

ONE ON A PERFORATED CARD.

No. 3-0 REVONOC—Hollow rubber, with weedless hooks, length 3½ in., per dozen..... 9.60

No. 20 REVONOC—Moulded ground cork and pure, soft rubber, decorated true to life, hollow point hooks, floats belly down, per dozen..... 5.50

ONE IN A BOX; HALF DOZEN IN A CARTON.

WHITE GRUB BAITS.

Pure India Rubber, Very Life-Like.

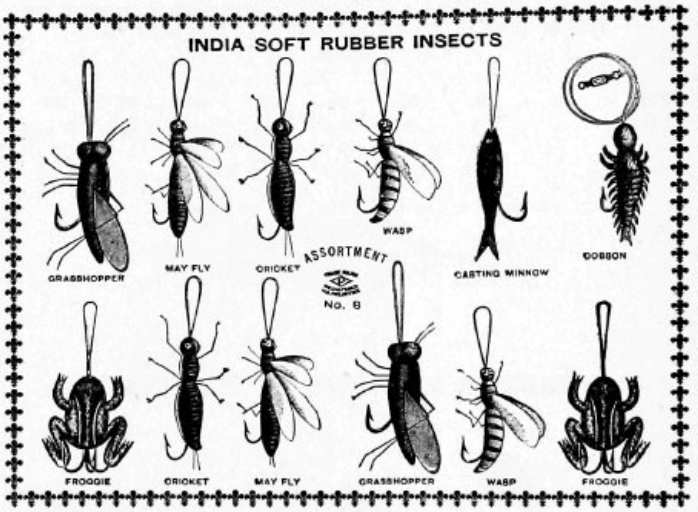
No. 18—Trout, on hollow point hook, per dozen..... $1.60

No. 20—Bass, on hollow point hook, per dozen..... 1.90

A very close imitation of a live grub and equally effective.

ONE DOZEN ON BLOTTER BOARD, IN A FANCY BOX.

RUBBER BAITS.



No. 200—Assortment consists of one dozen of the most popular baits on card in fancy box.....per dozen assortments $30.00

No. 14.

Pure India Rubber, Very Life-Like.

No. 14—Worm	per dozen	$3.40
No. 99—Cricket	"	2.00
No. 13—Minnow, 1¼ in. long	"	3.00
No. 15—Minnow, 2 in. long	"	4.50
No. 11—Froggie	"	3.00
No. 31—Grasshopper	"	2.00

For illustration of these baits see cuts of No. 200 assortment.

ONE DOZEN ON A PERFORATED CARD.

No. 12.

Pure India Rubber, Very Life-Like.

No. 12—Large frog, per dozen $4.20

No. 21—Large Dobson, per doz. 3.80

No. 21.

ONE DOZEN IN A BOX ON A CARD.

No. 100—Per gross	$2.20	2.60	3.00	

The line placed in groove of this sinker can be fastened at will by simply folding over the ears.

No. 216—JAMISON'S, *non-kinking*, for bait casting or trolling, with swivel, per gross.....$16.80

This is a combination of sinker, snap and swivel, will hold any bait right side up and positively prevents the line from kinking in either casting or trolling. Economical in that it makes weighted hooks unnecessary. Weedless. Cannot get out of order. Guaranteed to stand at least 50 pounds strain.

ONE DOZEN IN A BOX.

CASTING WEIGHTS.

No. 217—JAMISON'S "TOURNAMENT," for practice casting; wood body with metal ends, two sizes, ¼ and ½ oz., weights guaranteed accurate.....per gross $21.60

An excellent casting weight. Much easier to handle than the small metal weights.

SURE BAIT.

No. 17—One dram in a bottle in wood box, per dozen $1.50

"Sure Bait" is a preparation which, when applied to any kind of bait, will attract the fish and cause them to bite freely.

"Sure Bait" is the most efficient preparation for this purpose ever discovered, and will do the work claimed for it.

ONE DOZEN IN A CARTON.

SNAGGED HOOK RELEASERS.

No. 1—Heavy brass spring wire, lead weight, cartridge shape, length 6 in., w't per doz. 1½ lbs.....per dozen $4.00

No. 2—Large size for bass fishing, otherwise same as No. 1.....per dozen 5.00

This device is small and can be conveniently carried in the pocket. It works perfectly in all kinds of difficult places, in both swift, running and still water; underneath roots and in sunken logs, etc.

The releaser is simply placed on the line by means of rings which twist round the line, and let go. It slides down the line and releases hook. Hook can then be brought to the surface with no difficulty. The angler can then take the releaser off the line and is ready to continue fishing.

ONE DOZEN IN A BOX.

GAFF HOOKS, FISH SPEARS, NET FRAMES AND RINGS.

GAFF HOOKS.

No. 1—7×2 in., best spring steel, carefully tempered, plain point, japanned, w't per doz. ¾ lb.....per dozen $1.80

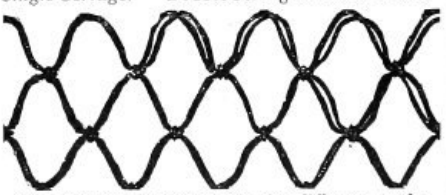
SUGGESTIONS IN ORDERING NETTING.

Single Selvage. Double Selvage. Double Mesh.



The above cut illustrates the different styles of selvage and mesh.

Showing 2 in. stitches mesh.

When ordering or writing for estimates, regard the following suggestions as much as possible:

In Ordering, give full description of net in question, stating its length, depth, size of mesh and size of twine. If you are not acquainted with twines, state the kind of fish you want to catch, and the way you propose to fish for them.

How Measured.—Always state whether the netting is to hang the dimensions given when on ropes, or is to measure those dimensions when stretched. We measure a mesh on square basis; if you give stretched measure, always say so.

Give Depth in Meshes.—When convenient, give depth of net in meshes.

Kind of Selvage.—State whether you want double mesh, double selvage, or single selvage, as per cut.

Kind and Quality.—State whether you want goods tarred, barked or white.

Net or Netting.—Always state whether net is wanted complete or netting only.

We cannot consider claims for shortages or imperfections after seines or nets have been used.

INSTRUCTIONS FOR ORDERING NETTING.

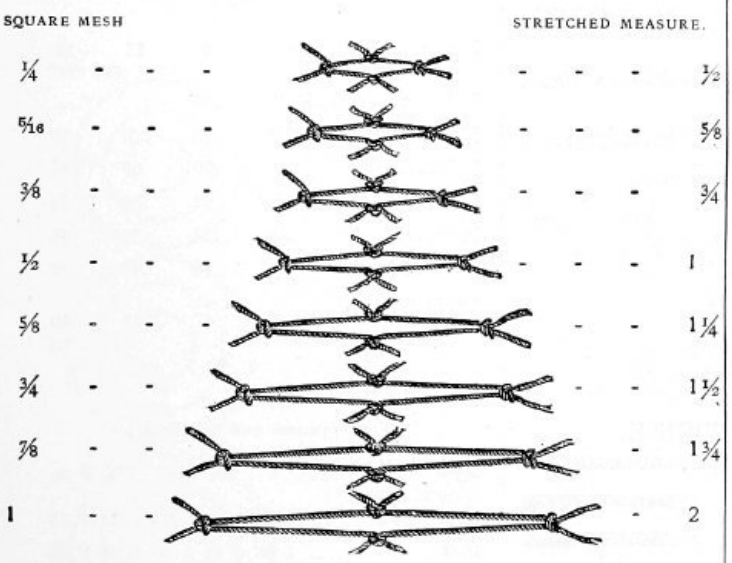
When ordering webs for seines by pounds give length and depth required when hung on the lines. State what kind of border is wanted, etc. Allow one-third for hanging, that is, if a seine is to be 100 yds. long and 10 ft. deep when on lines, we would make the webbing 150 yds. long and 15 ft. deep, stretched measure.

In ordering, give full description of what you want—leave nothing to be guessed at. Estimates of cost and weight of any size netting given on application. We do not hold ourselves responsible for netting that has been tanned or tarred, after it leaves our premises.

No goods will be exchanged or taken back that have been tarred, tanned or wet.

NETTING AND SEINES.

COTTON NETTING.



The dimensions to the left give the size of mesh when not stretched and on the right hand side the stretched measure for the same size.

Tanning or tarring, about 10 per cent. additional.

Made of best quality River Brand cotton seine twine, rigged complete with "Never Sink" cedar floats and improved cast lead sinkers, ready for use. Lines are ¼ in. pure manila rope, thoroughly stretched and tarred; top line single and bottom lines double, with reversed twist, thus preventing rolling up of seine when dragged through the water. Prices are without extra hauling lines. In ordering, give length, depth, size of mesh, and size of twine. If you do not understand sizes of twine, send for samples.

SEINES NOT RETURNABLE UNDER ANY CIRCUMSTANCES.

Seines tarred or tanned, add 10 per cent. All sizes of mesh are square measurement.

For tanning or tarring, 10 per cent. additional.

Tapered seines are deeper in center than at ends, thus forming a bag in center when dragging through water; hung complete on lines with "Never Sink" white cedar floats and improved cast lead sinkers. Lines are¼ in. pure manila, thoroughly stretched and tarred; top line single, bottom line double, with reverse twist to prevent rolling up of seine when dragging through water. Prices are without extra hauling lines; every seine warranted perfect.

We make a specialty of fishermen's large drag seines, with ½, ⅝, or ¾ in. tarred manila or Russian hemp bottom line, also tanned or tarred seines. When writing for prices, give length, depth, size of mesh, and size of twine, also size of lines wanted, and whether net is to be white, tanned or steam tarred.

Our trammel nets have three nets, hung on a single top and a single bottom line. Lines are of best quality cotton obtainable. When ordering trammel nets, always mention kind wanted and price per yard.

Of the three nets, two have large mesh called "walling," made of cotton seine twine; the inside net is made of best quality "imported Scotch linen twine." Our "Superior" trammel net is strictly high grade, combining best quality, quantity of material, and best workmanship. We guarantee them to be the best nets made, and the cheapest in the long run, where good, constant service is required.

CANOES.

Hudson River.

Description—Ribs white cedar, 2½ in. wide at centers, tapering to 1 in. at gunwales, ⅜ in. thick, spaced from 1½ to 2 in apart.

Planking—$\frac{3}{16}$ in. light northern cedar. Copper fastened, special canoe tacks being used, which are clinched on inside of the ribs.

Gunwales—Are $\frac{7}{8} \times \frac{11}{16}$ in. best quality spruce, running full length After decks are put in, finishing rails are also run full length, capping gun wales, and a neatly finished side rail gives the whole a very handsome effect.

Stems—Are of select straight-grained white oak.

The Thwarts—Are of best quality oak or ash, unless otherwise specified two in each canoe, and when ordered specially an extra middle thwart can be installed at small extra charge, which may be found useful in carrying

Seats—There are two hand-caned seats.

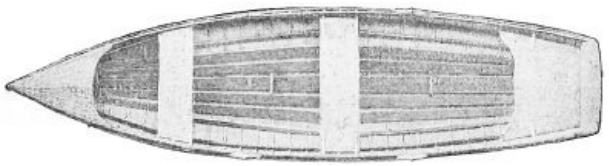
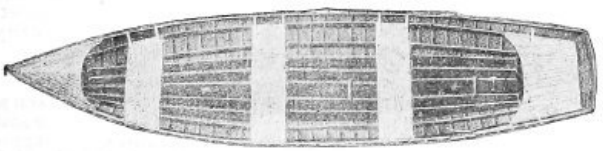
DETROIT STEEL ROWBOATS.*



No. 115—Square stern rowboat, especially designed for livery purposes, length 14 ft., beam amidships 44 in., depth amidships 14 in., height of bow 22 in., height of stern 24 in., distance between ribs 4 in., w't about 150 lbs., crated about 200 lbs., complete with one pair of oars.....each $57.60

A carrying capacity of five persons, air tight compartments in each boat, removable footboards, first class finish and workmanship, hull galvanized steel, oak gunwales.

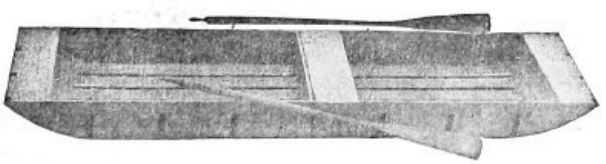


No. 117—Square stern, patent steel clinker boat, length 16 ft., beam amidships 48 in., depth amidships 16 in., height of bow 24 in., height of stern 26 in., distance between ribs 4 in., w't about 180 lbs., crated about 240 lbs., complete with one pair oars.....each $72.00

Ideal boat for clubs and individuals who desire boats, handsome and gracefull in appearance, absolutely seaworthy, reliable and safe under all conditions. Carrying capacity, seven persons. Air-tight compartments sufficient to float boat and passengers even when filled with water.

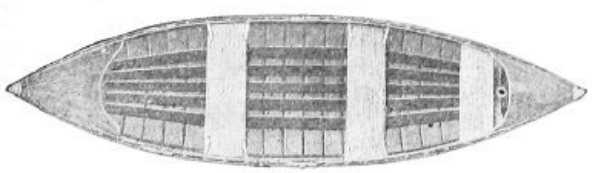
No. 125—Family, steel rowboat, length 16 ft., width amidships 53 in., depth amidships 18 in., height of bow 24 in., height of stern 25 in., distance between ribs 3 in., w't 190 lbs., crated about 250 lbs., complete with one pair oars.....each $80.00

Carries in perfect safety nine persons. Safest model made. Has extra large air-tight compartments. Specially designed for women and children. Impossible to capsize.



No. 150—Square stern combination packing chest or trunk boat, length 12 ft., width amidships 30 in., depth amidships 10 in., w't about 100 lbs., crated about 140 lbs., complete with one pair oars.....each $44.00

When going out to camp, save expenses on baggage by having trunk and boat in one. This boat folds in center, is roomy, safe and an ideal outfit for tourist, hunter, fisherman or other sportsmen.

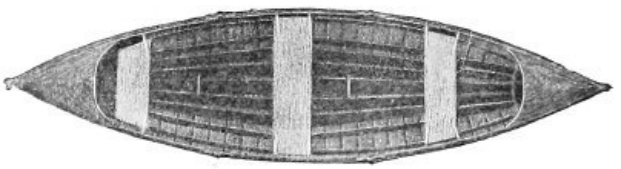


No. 110—Double pointed patent steel clinker boat, length 14 ft., width amidships 45 in., depth amidships 14 in., height of bow 22 in., height of stern 22 in., distance between ribs 4 in., w't about 150 lbs., crated about 200 lbs., complete with one pair oars.....each $56.00

Being pointed at both ends, it is preferred by many, as it can be rowed in either direction. It is safe and roomy, and has the same capacity in air-tight compartments as the square end boat.

No. 112—Double pointed patent steel clinker boat, length 16 ft., width amidships 48 in., depth amidships 15 in., height of bow 23 in., height of stern 18 in., distance between ribs 4 in., w't about 170 lbs., crated about 230 lbs., complete with one pair oars.....each $68.00

Easiest propelled boat made, will carry six or seven persons comfortably, can be rowed either way, does not leak, rust, sink, rot or crack.



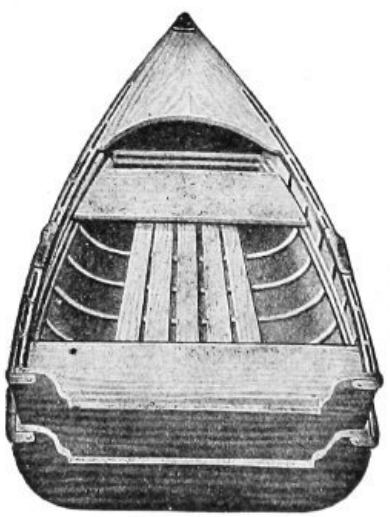
No. 133—Flat bottom steel fishing boat, length 14 ft., width amidships 44 in., depth amidships 13 in., height of bow 15 in., height of stern 15 in., distance between ribs 5 in., w't 120 lbs., crated about 150 lbs., complete with one pair oars, including live well and stoppers.....each $60.00

No. 132—Without live well and stoppers, otherwise same as No. 133.....each 56.00

No. 131—12 ft., w't 100 lbs., crated about 130 lbs., otherwise same as No. 133.....each 52.00

No. 130—12 ft., w't 100 lbs., crated about 130 lbs., without live well and stopper, otherwise same as No. 133.....each 46.00

Is universally praised by liverymen, fishermen and sportsmen. Has a very light draught when loaded. The wide flat bottom permits great carrying capacity. The three stationary wooden fenders on the bottom of the boat protect it from damage. This is one of the most popular designs.



No. 161—Sectional rowboat, length 12 ft., width amidships 44 in., depth amidships 13 in., height of bow, 15 in., height of stern 15 in., distance between ribs 5 in., w't 100 lbs., crated about 130 lbs., complete with one pair oars, including live well and stopper.....each $60.00

No. 160—Without live well and stopper, otherwise same as No. 161.....each 50.00

Flat bottom fishing boat. Sections lock into each other, impossible to break apart, coupling and uncoupling accomplished in a few seconds. Has air-tight compartments, light draught, and when packed can be checked as baggage, or loaded in back of automobile, buggy, etc.

Send for Special Boat Catalogue.

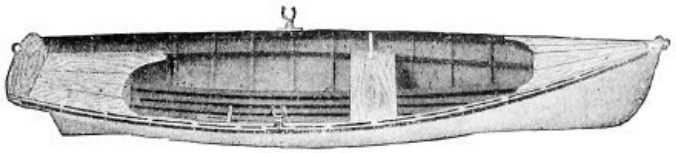
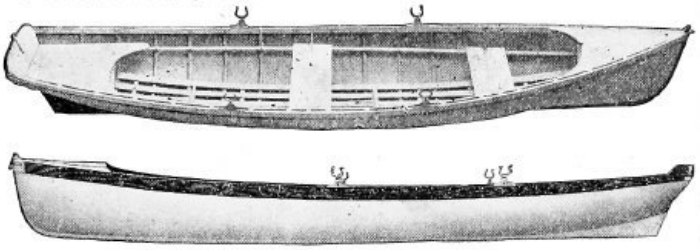
MULLIN'S STEEL BOATS.



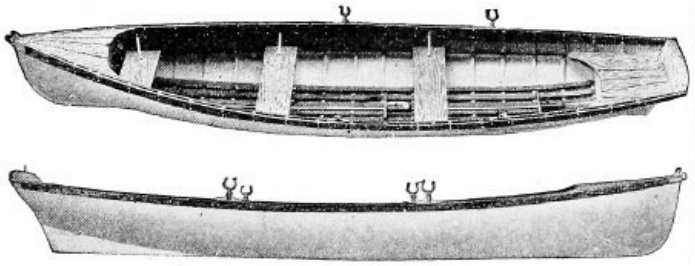
No. 312—"SPECIAL LIVERY", length 12 ft., beam 44 in., height at bow 22 in., stern 21½ in., amidship 13½ in., w't about 150 lbs., crated 175 lbs., with one pair 7½-foot straight leathered ash oars,★ each..... $57.60

Designed especially for boat liveries. It is arranged for but two passengers, and consequently the liveryman will usually let out two or more boats to the same party, greatly increasing his revenue, when otherwise the entire party would go out in a large boat, to the loss of the liveryman. It is light and easily rowed, and will be found a constant source of revenue. It will safely stand the hard wear and tear to which all livery boats are subjected. It is modeled on perfect lines, handsome in appearance, painted aluminum outside, light blue inside, natural wood trimmings, air chambers under decks in each end like a life boat.



No. 314—"PRINCE," length 14 ft., beam 44 in., height bow 22 in., stern 21½ in., amidship 13½ in., w't about 180 lbs., crated 200 lbs., with one pair 7½-foot straight leathered ash oars ★ each $61.20

This boat is one of the best family and pleasure resort boats that has ever been designed. It is modeled on perfect lines, insuring ease in rowing. It is also a first-class fishing boat, and after a vacation spent in one of these perfect steel boats, you will never be satisfied with any other. It is handsomely finished, painted aluminum outside, light blue inside, natural wood trimmings. Large air chambers under decks in each end like a life boat.



No. 316—"SULTAN," length 16 ft., beam 50 in., height bow 25 in., stern 23½ in., amidship 15 in., w't about 225 lbs., crated 260 lbs., with one pair 7½-foot straight leathered ash oars★.....each $70.20

Is modeled on perfect lines, and will make an admirable boat for family or livery use where a good capacity is required, the best boat for children, as it is roomy and very steady. Easy to row. It will appeal to summer resorters on account of its durability, comfort and safety.

Finished in aluminum outside, light blue inside, natural wood trimmings, large air chambers under decks like a life boat.

EXTRAS.

For Nos. 312, 314, 316, 315 and 305.

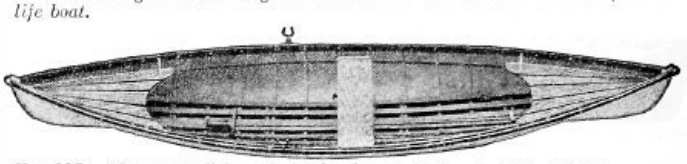
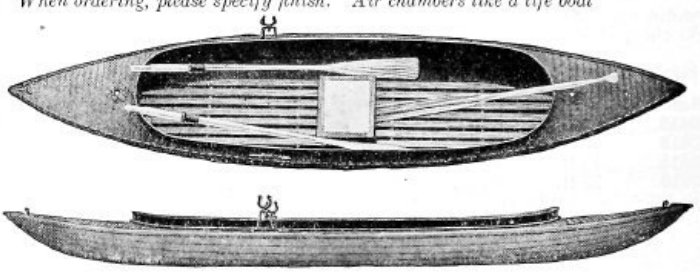
No. 315—"QUEEN," length 15 ft., beam 44 in., height bow and stern 22 in., amidship 13½ in., w't about 185 lbs., crated 200 lbs., with one pair 7½-ft. straight leathered ash oars★.....each $63.00

A double end boat that is a magnificent model for pleasure purposes and is especially desirable where you wish to paddle as well as row. It is light, easy running and thoroughly comfortable and the most beautiful boat on the water. Finished in aluminum outside, light blue inside, with natural wood trimmings. It has large air chambers under decks in each end, like a life boat.



No. 305—"BUCKEYE," length 15 ft., beam 44 in., height at bow and stern 14 in., amidship 12 in., w't 160 lbs., crated 180 lbs., with one pair 7½-ft. straight ash oars★.....each $59.40

Is the best combination hunting and fishing boat made. It has a perfectly smooth molded bottom, is fitted with a keel. Can be propelled with greater ease than any flat bottom boat, built exclusively for marsh shooting. Is steady to shoot or cast from. Free from all defects of the wooden hunting boats. Finished in aluminum outside, light blue inside or in dead-grass paint. When ordering, please specify finish. Air chambers like a life boat



No. 20—"GET THERE," length 14 ft., beam 36 in., 12½ in. high to top of coaming at ends. 10 in. high amidship, cockpit 9 ft. long, 30 in. wide, w't about 100 lbs. including regular fittings, packed for shipment 120 lbs.....each $39.60

No. 27—"BUSTLE," with air chambers on sides, making beam 46 in., otherwise same as No. 20, w't 120 lbs., packed for shipment 140 lbs.....each 52.20

Is recognized wherever it is used as the standard sportsman's boat. Thousands of them are in use and are pronounced by all who have ever had experience with them as the lightest, most comfortable and safest duck boats built. They are painted a dead-grass color, and you are assured of a neat and tasty craft. Air chambers at both ends like a life boat. The outfit complete consists of a bottom board, movable seat, oars and oarlocks and one long or short paddle. No. 20 and 27 boats in stock in Chicago.

This boat was designed to meet the demand for an exceedingly low priced, but a strong, safe and durable boat. The body is of cedar and oak, all ribs, braces and trimmings of hardwood. The whole painted three coats, dry grass color. Is supplied with a movable seat, one pair six-foot oars and one eight-foot push paddle, and removable floor rack. A galvanized steel tube passes through forward and after decks, affording a very convenient and safe way to anchor. This boat is built so that galvanized steel air tanks can be put under both forward and after decks. When supplied with these tanks we guarantee that this boat will sustain 500 lbs. weight when filled with water, making the same practically non-sinkable.

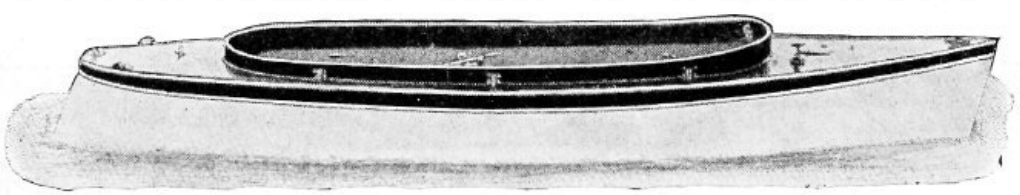
Motor—Consists of 2 horse-power single cylinder reversible motor, bilge water ejector, muffler, under water exhaust, speed controller, batteries, switch, tools, etc.

REV-O-NOC **16 ft.,** compromise stern, family ..... each $270.00

This boat is designed for those who want an inexpensive, yet high grade article, and is especially recommended to meet the requirements that occur at a small family home on river or lake. It is very roomy, safe and seaworthy, and we can recommend it as a very useful boat.



Dimensions—Length 17 ft., beam 4 ft. 6 in., depth amidship 24½ in., seating capacity 10 persons. Speed, 8 miles per hour. Shipping w't 900 lbs.
Frame—White oak keel, natural crook stem, oak stern, oak frames, steam bent, spaced close together, fastened to oak floor timbers with screws.
Planking—Garboard and sheerstrake selected oak, balance of planking northern cedar, all screw-fastened to frames and all butts have oak backs, all seams carefully caulked with cotton and puttied with white lead putty.
Decking—Covering board and coaming clear oak, all screw fastened and plugged flush, deck beams oak, sawed to proper crown. Decking oak strips grooved and tongued, blind fastened and laid in shellac. Fenders made of oak half round, fastened to upper and lower edges of sheerstrake.
Cockpit—Ceiled up in narrow strip. V joint cedar ceiling, seats on side, running fore and aft, made as lockers and nicely paneled fronts. Floor of pine or cedar.
Bulkheads—Built in either end of cockpit with a small door, and nicely finished.
Engine Bed—Made of oak timbers, running fore and aft, notched out over ribs to fit planking and bolted through.
Finish—The entire boat is scraped and sanded down to a smooth surface and finished in three coats of anti-fouling yacht paint, green below the water line and three coats of white above. The sheerstrake, fenders, deck, coaming and cockpit are finished in natural wood with best grade of marine varnish. Cockpit floor nicely painted. The hull also well painted on the inside, to preserve the planking before the ceiling is put on.
Fittings—Steel stem band, nickel plated bow chocks, quarter chocks and cleats. Steel rudder properly connected with coppered chain to nickel plated steering wheel in bow. Galvanized steel gasoline tank under bow deck.
Fastenings—For fresh water use, iron screws, nails and bolts, and for salt water use, brass screws, brass and copper bolts.
Motor—Consists of single cylinder 3 horse-power motor, reversible propeller, bilge water ejector, muffler, under water exhaust, speed controller, batteries, switch, tools, etc.

REV-O-NOC **17 ft.,** Torpedo stern ..... each $354.40

The Torpedo Stern Launch has so many points of merit over the old style fan tail stern variety, which are at once apparent to the average customer, that we have decided without hesitation, to offer it as a Standard Launch.
These boats are staunch, roomy and splendid sea boats, and are at least 10 per cent faster with the same power than the old style model.
The interior of the cockpit can be arranged to suit the purchaser, some preferring willow chairs to the paneled side seats.

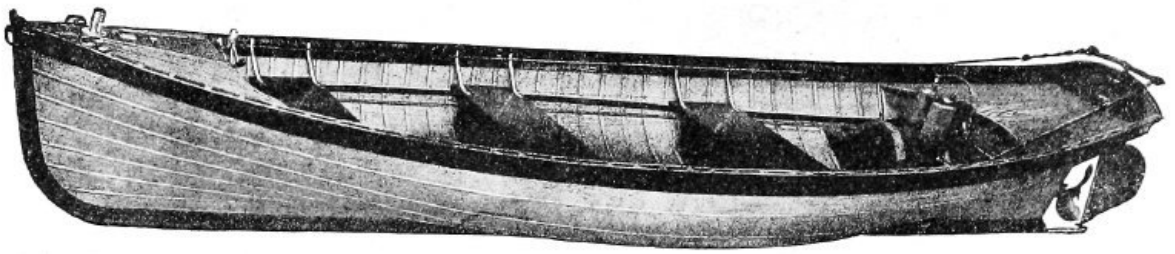
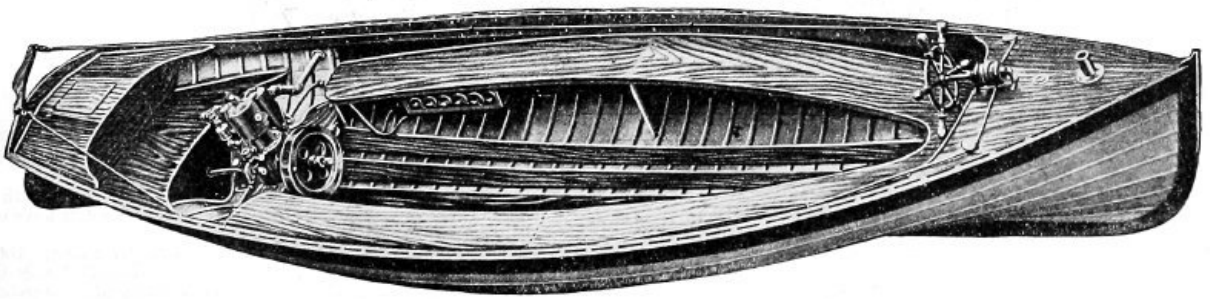
DETROIT STEEL LAUNCHES.*



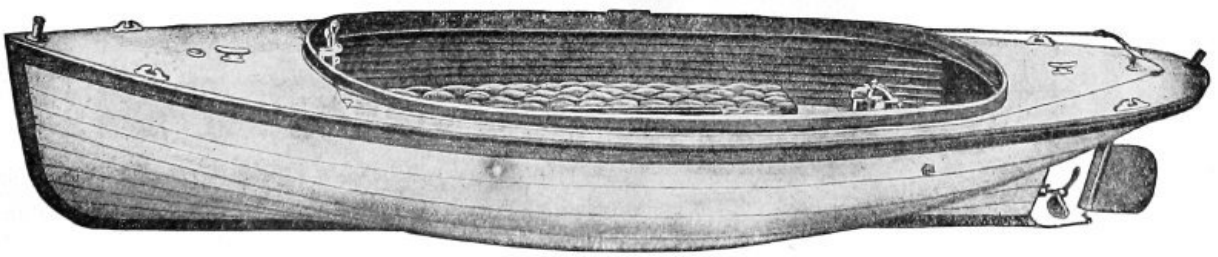
Dimensions—Length 16 ft., beam 4 ft. 2 in., draught, loaded, about 12 in., seating capacity 6 to 8 persons, speed, about 7 to 7½ miles an hour.
Fittings—Complete with 2 H. P. 2 cycle reversible engine with speed controlling lever, bronze propeller, steering wheel in bow and flag pole socket, crated F. O. B. cars or steamer.

16 ft., SPECIAL, shipping w't crated, about 700 lbs.....each $225.00



Dimensions—Length 16 ft., beam 4 ft. 6 in., depth amidships 19 in., seating capacity about 8 to 10 persons. Speed about 7½ miles per hour.
Frame—Ribs of best selected white oak, ⅞×1½ in. every 4 in. Hull of galvanized steel with locked seams, decks, best quality cypress, filled and finished with spar varnish. Shear strakes, best grade white oak, natural finish. Seats and bulkheads of cypress. All inside woodwork finished in natural color.
Fittings—All launches, fitted with heavy iron shoe to protect entirely the rudder and propeller should the boat run into an obstruction. Each 16-ft. launch is fitted with steel cored cable running around the decks for steering purposes. Every boat fitted with air-tight compartments and thoroughly tested out before shipment is made.
Complete, with 2 H. P. 2-cycle reversible engine with speed controlling lever, bronze propeller, steering wheel in bow, flag pole sockets and side seats, crated F. O. B. cars or steamer.

16 ft., Grade A, shipping w't crated, about 700 lbs.....each $250.00



Dimensions—Length 18 ft., beam 4 ft. 6 in., draught, about 14 in. Height of bow 2 ft. 8 in., height of stern 2 ft. 11 in., depth amidships 2 ft. 2 in. Length of cockpit 10 ft. 3 in., width of cockpit 3 ft. 6 in. Length forward deck 3 ft. 9 in., length aft deck 4 ft. Speed about 8 miles an hour with 2 H. P. engine. Carrying capacity, about 10 to 12 persons.
Frame—Ribs of best selected white oak ⅞×1½ every 3 in. Hull of galvanized steel cut in strips and lock seamed. These seams, running from bow to stern, act like iron girders encircling the boat, making it impossible to pull apart.
Decking—Fore and aft of wood, covered with painted canvas, ecru color, set in white lead, same as all up-to-date launches are now being finished.
Cockpit—Seats extend fore and aft and are so situated that the coaming forms a comfortable back rest.
Fittings—Woodwork finished natural color, metal work painted with silver pegamoid, every launch fitted with heavy iron shoe under rudder to protect entirely the rudder and propeller, providing the boat runs into an obstruction. Brass and cherry trimmed steering wheel, speed controlling lever, steel cored cable and forward chalks and cleats included without extra charge.
Crated F. O. B. cars or steamer.

BOATS.

LIFE-SAVING FOLDING.

Folding boats have for some time been used by the sporting fraternity, but it was not until quite recently that it has been possible to secure boats of sufficient strength as to make them adaptable to practicable purposes and at the same time having the lightness and buoyancy necessary for boats of this character.

The Life-Saving Folding Canvas Boat is constructed on lines which make it very strong, durable and buoyant. The carrying capacity for its size is wonderful.

The framework is made of the best high carbon-tempered spring steel. All metal parts are galvanized and will not rust when used in either salt or fresh water. No tools are necessary to set up or take down. The steel frame of the boat makes it stiff and rigid so that the seat and spreaders may be left out at any time, and the boat will keep its perfect shape.

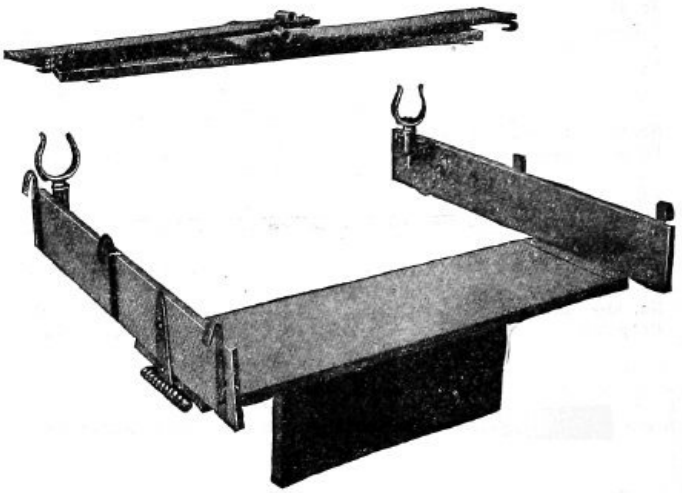
These boats are made of one piece of the best 22 or 24 oz. hard woven duck, made expressly for this purpose. Each end being of double thickness and covered on the outside by a third piece, which fully covers the end and runs back well along the bottom to protect it from possible wear. There is no more danger of puncturing than there is in a wooden boat.

The combination keel and bottom is perfectly flat, rigid and smooth, cannot warp nor get out of order. It is the same as one solid piece when placed in the boat, and has sufficient strength to prevent the boat from springing up at the ends when loaded in the center, or springing up in the center when loaded at the ends.

The boat is as easy to set up in the dark as in the light, because there is nothing to get lost. No bolts, nuts or cotter pins. All the cross ribs are fastened to a strong strap and therefore none of them can get misplaced. It is never necessary to stop and sort out the ribs; they cannot be put on wrong. This is one of the strong features of the boat.

They are used as duck boats and are also used by the U. S. Navy as yacht tenders. Each boat is equipped with the life-saving air chambers. We furnish no boats without them.

In the illustration of the combination thwart seat, spreaders and oar locks, the view at the top of the cut shows the seat folded. The one at the bottom shows the seat opened as it sets in the boat. The seat support rests on the bottom of the boat, and the oar beds are hinged to the bottom side of the seat, and when turned up can only go to a right angle. This makes the whole combination very rigid and gives great strength to the boat. The seat can be moved to different places in the boat, and folds compactly without moving a screw or a bolt.



Combination Thwart Seat, Spreaders and Oar Locks.

No. 9—Length 9 ft., 32 in. beam, 10 in. deep, 16 in. at ends, with jointed oars or double paddle, carrying case, thwart seat and spreaders, air chambers, capacity 350 lbs., package is 3 ft. by 8 in., w't 30 lbs., - - - - - - - - - - each $37.50

BASE BALL BATS.

THE "REV-O-NOC" "CUB" LINE.

The REV-O-NOC "Cub" Bats are made of finest quality selected second growth white ash, thoroughly seasoned, in the following shapes and models, by men who have made bat making a life study. All REV-O-NOC "Cub" bats are hand turned and finished, and for elegance of appearance, perfection of balance and length of life are unequaled.

The word REV-O-NOC is burned into the wood and the magnificent coloring of the "Cub" transfer adds much to the attractiveness of the line.

"REV-O-NOC" CATCHERS' MITTS.

NEW FEATURES ON OUR "REV-O-NOC" CATCHERS' MITTS.

New Buckle Protector—A new arrangement, made of leather to which a piece of felt is sewed. It rests on the back of the hand directly under the buckle of the mitt. This new buckle protector is on all mitts except the following numbers, B11, 304, 33, B12, 34, 32, 36 and 303.

Patented Thumb Laced Arrangement—An extra piece of leather sewed on the strip of the mitt between thumb and palm portion. Eyelets are inserted through the strip of this extra piece of leather and a lacing cord is laced forward and backward through these eyelets. This turns the palm of the glove to the body of the mitt and prevents the thumb of the catcher from being bent forward and also forms a strong, substantial and permanent means of holding the thumb of the glove to the body of the mitt, producing a natural deep pocket. On all mitts in our line.

Internal Edge Stiffener—A heavy flexible fibre board which is attached to the edge strip of the mitt by means of rivets. This protects the ends of the fingers when the player scoops the ball from the ground and the flexibility of the strip is such that the mitt resumes its natural round shape when contact with the ground is removed. This feature is on all catchers' mitts except the following numbers, 11, 33, 303, 34, 304, 35, 32, 307 and 36.

Modeled Patterns—All mitts on this page (except No. A6) are of the popular Modeled Pattern. This form of construction gives a palm entirely of one piece, and is rounded artistically, doing away entirely with an abrupt edge, and thus strengthening and beautifying the mitt.

Front View.

This mitt is the celebrated deep pocket shaped pattern now so popular with all catchers' in the big leagues, will hold its shape as long as it lasts and will last as long, if not longer, than any other catchers' mitt made.

No expense has been spared in manufacturing to make this the best mitt on the market.

Back View.

Full Leather Laced.

No. A7 REV-O-NOC—Rounded model pattern, highest quality selected calfskin, padded with best asbestos felt, hand formed and sewed, deep pocket formed to receive and hold the ball, full leather laced, strap buckle with patent buckle guard to protect the wrist, finished in the most careful manner, per dozen..... $117.00

"REV-O-NOC" TENNIS RACKETS.

REV-O-NOC Rackets are the product of a manufacturer with 35 years experience in tennis racket manufacture.

The wood selected for frames is the choicest second growth ash, which, after thorough seasoning, is bent into frames and these frames are dried by special process. The stringing is done entirely by expert workmen and with the best gut obtainable.

We guarantee REV-O-NOC Rackets; any frame breaking and showing defective material or workmanship will entitle the owner to a new racket. This applies only to rackets weighing 13 oz. or more. All rackets to be sent in for our inspection, charges prepaid.

Tournament.

Expert.

Tournament—Large size handle, strung with extra quality gut, w't 13 to 14½ oz.....each $9.00

Its shape is a gracefully tapered oval. Cane shoulders add strength to the frame's inner sides near the wedge which reinforce the racket where strength is most needed.

Expert—Cedar handle, extra number of vertical strands through the center of the mesh, w't 13 to 14½ oz.....each $8.00

The extra stringing of gut through the center of the mesh, on the "Expert" rackets increases the driving power and durability.

Jackson Park.

Chicago.

Jackson Park—Combed handle, strung with oriental gut, oval shape, full size, w't 13 to 14½ oz.....each $6.00

This racket is especially recommended as an ideal ladies' racket. The frame is lightened by having all edges slightly rounded, the shape being a finely designed oval. Stringing is close center.

Chicago—Combed handle, strung with oriental gut, narrow oval frame, full size, w't 13 to 14½ oz.....each $5.00

This is the most remarkable value in a racket on the market for the price. Includes all the latest features, such as the narrow oval frame with close center stringing.

Calumet.

Cleveland.

Calumet—Combed handle, strung with oriental gut, full size, w't 12 to 13½ oz., each.....$3.10

The "Calumet" is one of the most popular rackets, bearing the "Rev-o-noc" brand. Strongly made, handsomely finished.

Cleveland—Combed handle, strung with extra quality gut, oval shape, w't 12 to 14 oz.....each $2.90

Duchess.

Vantage.

Duchess—Combed handle, strung with oriental gut, narrow oval shape, full size, w't 12 to 13½ oz.....each $7.00

This is a new racket combining an up-to-date narrow, oval frame, with a close strung center with round shaped handle.

Vantage—Large size handle, strung with extra quality gut, w't 13 to 14½ oz., each.....$7.50

The frame is bent on elongated oval with beveled sides and reinforced at shoulders with silk wrappings.

Riverside.

Washington Park.

Riverside—Combed handle tournament strung, with imported gut, w't 12 to 14½ oz.....each $4.50

Particular attention is given to the stringing. The finish is exceptional. The balance perfect.

Washington Park—Combed handle, strung with oriental gut, w't 12 to 14½ oz.....each $3.60

These are designed for a first-class racket at a moderate price.

Buckingham.

Sterling.

Buckingham—Cedar handle, strung with good quality gut, w't 12 to 13½ oz.each $2.70

Well made of first class materials.

Sterling—Cedar handle, strung with good gut, w't 12 to 14 oz.....each $2.20

A good racket for small beginners.

Cub—Cherry handle, well finished and strung, checkered, w't 11 to 13 oz.each $2.00

Well made and finished.

WHEN ORDERING TENNIS RACKETS ALWAYS GIVE THE WEIGHT.

WRIGHT & DITSON'S TENNIS RACKETS.

Wright & Ditson rackets weighing 13 oz. and over are guaranteed by the manufacturers for 30 days after date of purchase. Rackets on which claim of defect is made must be forwarded for inspection and all transportation charges paid by the sender.

Ward & Wright.

Sutton Star.

Ward & Wright—Style A, containing extra center strings, made in weights from 13 to 14½ oz., *in waterproof case*, each $12.00

This racket has been made according to instructions given by Beals C. Wright and Holcomb Ward, former champions of the United States.

It will stand restringing better than any other style racket. The frame is made of specially selected ash. The gut used in stringing is the best imported, noted for its life and driving qualities.

Sutton Star—Regular stringing, large handle, made in weights from 13 to 14½ oz., *in waterproof case* .....each $12.00

Two national championships have been won with this racket in recent years. It is tightly strung with the best quality of gut.

Sears.

Golden Gate.

Sears—Made in weights from 12½ to 14½ oz. .....each $7.00

The Sears racket is made in the latest model, and is strung with English gut and contains extra center strings.

Golden Gate—Made in weights from 12 to 13½ oz. .....each $5.50

This racket is of the same shape as the Sutton, the handle is a little smaller and the head narrower than regular rackets. Strung with good quality gut.

Columbia.

Park.

Columbia—Made in weights from 12½ to 14 oz. .....each $4.00

This racket is made after the latest models, and is strung with good gut, with the extra center strings.

Park—Made in weights from 12½ to 14½ oz. .....each $3.50

Well finished throughout, and is strung with good quality gut.

Pim.

Campbell.

Pim—Plain cedar handle, made in weights from 13 to 14½ oz., *in waterproof case*, each $12.00

The frame is made of lively ash, and is bound with light but strong tape near the throat, which does not interfere with the natural spring in the wood, and is strung with the very best English gut.

Campbell—Made in weights 13 to 14½ oz., each..... $7.00

The Campbell racket in its new shape is a great success. It is strung with English gut.

Champion.

Longwood.

Champion—Made in weights from 12½ to 14½ oz. .....each $5.60

The Champion racket is made in the new and popular Ward & Wright shape, and is strung with an excellent quality of white gut, and contains the extra center strings.

Longwood—Made in weights from 12½ to 14½ oz. .....each $4.80

This racket has for a long time been one of the most popular. It is strung with a good quality of gut.

Country Club.

Hub.

Country Club—Made in weights from 12 to 13½ oz. .....each $3.50

This is a new style racket, strung with good gut, containing extra center strings.

Hub—Made in weights from 12 to 13½ oz. each..... $2.80

The shape and finish of the Hub has made it a very popular racket.

Surprise—Made in light and medium weights. .....each $2.00

Strung with good gut, a popular low priced racket. Same shape as the country club.

WHEN ORDERING TENNIS RACKETS, ALWAYS GIVE THE WEIGHT.

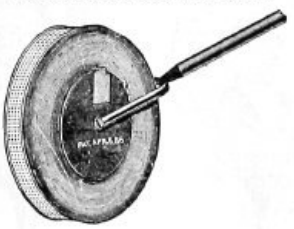
No. 0—Regulation, galvanized iron, per dozen.....$11.50

COURT MARKERS.



No. 15—9 in. perforated cylinder wheel, per dozen..... $19.20

Put in any powdered material, such as marble dust, airslacked lime, plaster of Paris, or ground plaster, such as is used for fertilizing purposes. By sprinkling immediately after marking, or by marking at evening before the dew falls, the lime is rendered more permanent. Fill the wheel about two-thirds full, which is sufficient for once marking the court.

TENNIS TAPES.

Double Court.....per set $5.40
Extra Galvanized Staples....per hundred .80

These tapes are especially adapted for clay, cinder and grass courts. Being light and compact, they can be easily carried and set out almost anywhere in a very short time. They are made up into sets consisting of a sufficient number of strong pieces of webbing (mounted with brass at each intersecting point) for marking out a court correctly. The tapes are fastened to the ground by means of pins and staples, which accompany each set.

REV-O-NOC GOLF CLUBS.

REVONOC wood golf clubs are hand finished by professional golf club makers. The balance and material of these clubs are perfect. The heads are made of sawed or compressed dogwood and persimmon. The shafts are made of selected second-growth split hickory and Texas ash. No club leaves the factory until it has been carefully examined by an experienced player, and no wood is used until it has been thoroughly seasoned. We guarantee every REVONOC club to be perfect in material, finish and workmanship, and agree to replace all clubs that show defects.

The models for the "irons" were carefully selected by leading golf experts, and are perfect in shape, die and weight. Only the best mild steel is used. Being made in dies, the heads of each pattern are alike. In the heads the lines which give the sight are perfectly kept. The finish of the goods is unsurpassed by any now made. The striking surfaces of the heads are true. Many lines of hand forged heads have uneven surfaces. In this important feature the drop-forged heads are perfect, giving a true ball.

No. 522 REVONOC—Men's socket driver, right hand.....each $3.00

DESCRIPTION AND USE OF IRON CLUBS.

Driving Cleek—This is the best club to learn to hit the ball with, for the same reason that a straight faced wood driver is recommended. Many purchase this club first and play with it until they can get somewhere near the ball. A driving cleek is used for long distance iron drives.

Short Neck Driving Cleek—This is the same as the ordinary cleek with the exception that the socket is shorter and the shaft runs clear through the socket to the sole, thereby bringing the spring closer to the point of impact and more weight behind the blow. Many players use this club instead of a brassy.

Driving Mashy—A driving mashy has the same loft as the driving cleek, but the blade is shorter and broader. It is used more by expert players, but requires greater skill in driving a straight ball. It is particularly adapted for making long shots out of bad lies or long grass.

Driving Iron—This is a club between a driving cleek and a midiron. It is short in socket, also in the head, and has some weight filed off the back of the heel. It is a good general club for players who do not wish to carry both a cleek and midiron.

Midiron—This is one of the most useful of iron clubs and can be used for all distances under 125 yards. It is lofted more than a cleek and is a little broader in the blade.

Approaching Mashy—The term "mashy" is usually understood to mean a club with a short, thick blade and is made in a number of degrees of loft. The term "approaching mashy," as used by us, designates a club between a driving and lofting mashy. We carry this club in "Rev-o-noc" brand.

Ladies' Lofting Mashy—This club is beveled off on four sides to a center to concentrate the weight directly behind the point of impact. It is useful for short approaches or playing out of a bad lie.

Lofting Iron—The blade of this club is about the same length as a midiron but has more loft. It is used for approaching the hole from about 40 yards, or lofting the ball over an obstacle at short range.

Taylor Model Lofting Mashy—This is a club designed by the celebrated English professional. Owing to the depth of face, this club lessens the chances of getting too much under the ball when playing a heavy shot. It is used for approach work under 100 yards.

Niblick—A niblick is especially adapted for playing out of bunkers, wagon ruts, etc. It has more "pitch" than most other irons, and is much heavier. This iron is principally used where one has an obstruction to get over and the ball is in a bad lie. It has a stiff shaft.

Putting Cleek—This club is similar in appearance to an ordinary cleek except that it is shorter in the shaft and more upright in the lie. The putting cleek, being slightly laid back in the face, puts a "drag" on the ball which makes it less liable to be deflected from its course.

Putter—This club is usually furnished in gun metal. It is either right or left handed, as both sides of the club are made the same. It is a little more upright than the putting cleek.

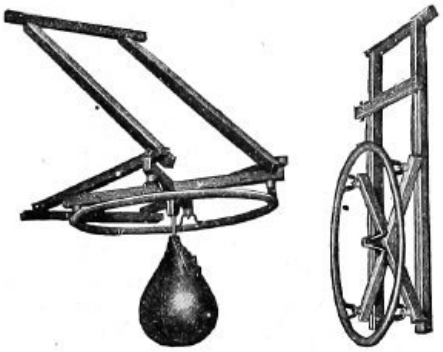
STRIKING BAG PLATFORMS AND BASKET BALL GOODS.

STRIKING BAG PLATFORMS.



No. 28—LIGHTNING, 36 × 20 × 4½ in. frame, when folded, rim 23 in. diameter, w't 7½ lbs.....each $4.00

The "Lightning" striking-bag platform is made entirely of clear Indiana white oak with a natural oil finish. It is very light, but so securely bolted together as to be amply strong for the hardest service.

The rim is made of hard maple and is attached to the frame by means of strong metal stirrups. Between the stirrups and the frame are rubber cushions or buffers one inch thick. These rubber cushions absorb the shock and deaden the noise. They also serve to make the rim more springy and give the liveliest kind of platform.

The platform can be very quickly attached to the wall and ceiling and is absolutely rigid in position. It can be instantly folded flat for shipment.

STRIKING BAG SWIVELS.

No. 3—DETACHABLE, ball bearing, handsomely ornamented and nickel plated on copper.....per dozen $12.00

No. 00—With foot attachment, door hinge attachment and package of hooks; heavy, medium, light or child's cable, complete with chart, - per dozen 12.00

ATHLETE.

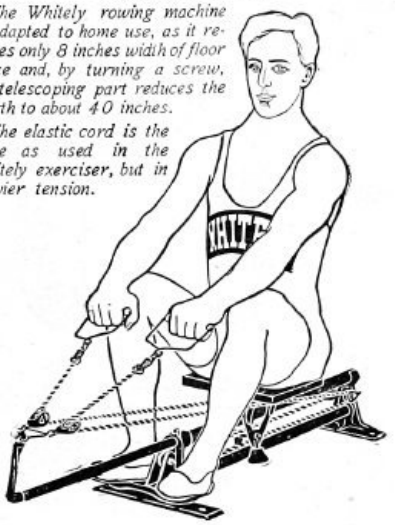
No. 4—Fitted with self-oiling bearings, extra large, finely finished rosewood pulleys; all metal parts full nickel plated, cork handles, very light and strong throughout; recommended for gymnasium and for strong men; complete with Anderson's "Physical Culture," per dozen, - - - - - $42.00

The Whitely is a complete home gymnasium, composed of elastic cord running over fine pulleys. Requires no floor space and is absolutely noiseless. There are no weights to change and no straps to buckle. No tools of any kind are required. Will last several years. Takes the place of all other forms of exercising apparatus, besides giving a great many movements requiring quick action, such as throwing, bowling, etc. The exerciser is suspended from two small steel hooks in a moment of time, or from the hinges of the door. Can be carried without inconvenience by travelers. Equally suitable for the strongest man and the smallest child. Is especially adapted for the use of ladies.

WHITELY ROWING MACHINES.

The Whitely rowing machine is adapted to home use, as it requires only 8 inches width of floor space and, by turning a screw, the telescoping part reduces the length to about 40 inches.

The elastic cord is the same as used in the Whitely exerciser, but in heavier tension.



No. 5—Malleable iron frame, rolling seat, telescoping extension, pendulum hung foot rest, strong elastic cord furnishes the resistance and this is in long lengths, running over 4 Whitely pulleys, giving a smooth, uniform action, each, - - - - - - - $12.00

ONE PAIR IN A PACKAGE.

The new Barney and Berry extension roller skates have all of the features best adapted for good, serviceable skates. The truss construction is so applied as to make a rigid skate at any extended point, in fact more rigid and firm than many non-extension skates. The rubber cushion action is entirely new and of great merit.

ONE PAIR IN A BOX.

The frame being formed of two pieces of special cold rolled sheet steel, assures great strength and durability.

A brace of ample strength supports end of the plate, insuring against the weakness that has developed at this point in many other patterns.

Rubber cushions control and complete adjustment for wear. The ball bearings are dependable in every particular, universally pronounced the best rink skate on the market.

The metal parts, with the exception of the shutter, are nickeled and the cameras are covered with black grain leather. They are fitted with an exceptionally good lens, with a covering capacity designated as F8. The shutter is a double valve new automatic. In other respects they are the same as the Nos. 4 and 5.

For Films.

No. 9—For pictures $3\frac{1}{4}\times5\frac{1}{2}$ in., size $9\frac{1}{2}\times4\frac{1}{2}\times2$ in., fitted with rapid rectilinear lens and Winner shutter, stationary front, focal length of lens $5\frac{3}{4}$ in., w't 35 oz. ..... each $30.70
Carrying Case..... " 2.60

No. 9—Fitted with No. 1 Goerz anastigmat lens, series III with new automatic shutter, w't 35 oz. ★.....each 106.00
Carrying Case..... " 2.60

No. 10—For pictures $3\frac{1}{4}\times5\frac{1}{2}$ in., size $9\frac{1}{2}\times4\frac{1}{2}\times2$ in., fitted with new automatic shutter, front rising and lowering and shifting laterally, rapid rectilinear lens, focal length of lens $5\frac{3}{4}$ in., w't 35 oz..... each 39.10
Carrying Case..... " 2.60

These cameras represent the highest grade of workmanship. A very popular size, for the reason that it allows great scope in photographing landscapes and permits making beautiful panel portraits, especially when using the Ansco portrait attachment. In all other respects they are the same as the preceding Folding Anscos.

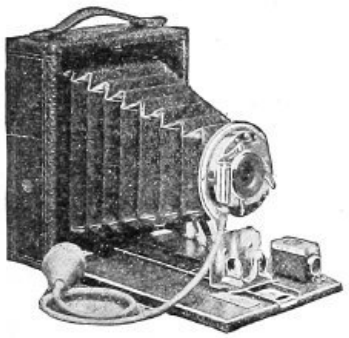
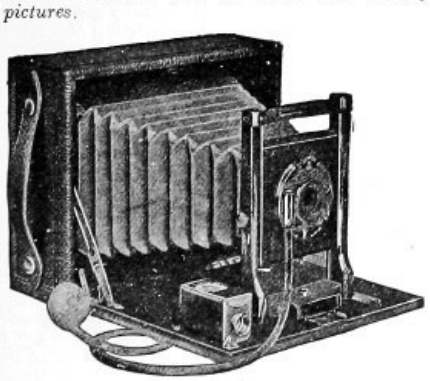
SENECA CAMERAS.



For Plates.

No. S29—Size picture 4×5 in., size 6⅛×5⅛×2 in., complete with one regular plate holder, w't 24 oz...each $11.20

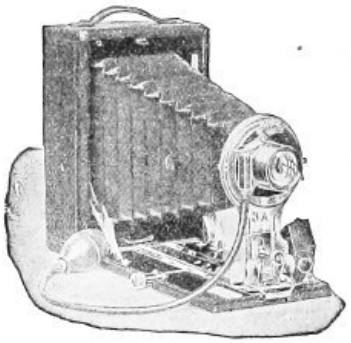
The Pocket Seneca is made of selected cherry with ebonized finish and has but one side arm. It presents a very neat appearance and for the price asked there is none better made. It is designed especially for the beginner who desires a pocket instrument at a moderate price. It possesses a Uno shutter and rapid rectilinear Lens. The holder furnished is the regular Seneca and with each camera we include a book of instructions and also a manual giving full instructions how to take and develop pictures.



For Plates.

No. S2—Takes pictures 4×5 in., size 6×5¼×2⅜ in., ebony finished camera box, corners dovetailed and covered with seal grain leather, solid mahogany camera bed ebony finished, attached to camera with improved nickel plated piano hinge, brass metal parts, handsomely nickel plated, black Russia leather bellows lined with gossamer cloth, complete with one double adjustable plate holder and carrying case, w't 28 oz..... each $14.70

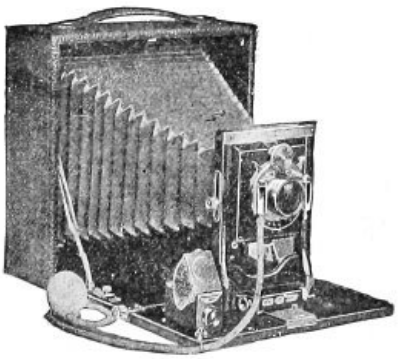
Designed to meet the requirements hitherto unprovided for, and embrace features that make them distinctly popular among those desiring a completely equipped instrument at an extremely low price. Is fitted with a high grade rapid rectilinear lens with Uno shutter, requiring only a pressure of the bulb for an exposure, or if desired the finger release may be used. A carrying case is supplied, with accommodations for the camera in one end and extra plate holders in the other.



For Plates.

No. SA3—Pocket, size picture 3¼×5½ in., post card size; size camera, 6⅞×4½×2⅜ in.; focal capacity, 9½ in.; rising and falling front, metallic, reinforced; removable spring back; ground glass panel for focusing; rack and pinion for fine focusing, with locking device; two tripod sockets; brilliant and reversible finder, metal bound, hooded; Seneca Uno shutter, with bulb and tube attachment; rapid rectilinear lens, special focus, 7 in.; genuine leather bellows; improved Seneca camera plate holder, each..... $18.70

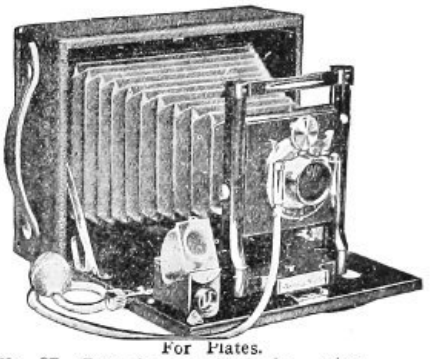
The Pocket Seneca is adapted to the use of both dry plates and film packs. It may be used for profit as well as pleasure—a size that just nicely covers a postal card. It possesses a rack and pinion, made in a compact manner, and at a very reasonable price.



For Plates.

No. S5—Takes pictures 4×5 in., size 6×5¼×2⅜ in., ebony finished camera box, corners dovetailed and covered with seal grain leather, solid mahogany camera bed, ebony finished, attached to camera with improved nickel plated piano hinge, brass metal parts handsomely nickel plated, black Russia leather bellows lined with gossamer cloth, complete with one double plate holder and carrying case, w't 28 oz., each $21.35

Built upon very strong and rigid lines, possessing lightness and compactness. It is equipped with the celebrated Duo double valve shutter and the well-known rapid rectilinear lens. In using this improved shutter it enables the operator to use different speeds of exposure, ranging from one second to one one-hundredth part of a second. The equipment permits of a variety of work.

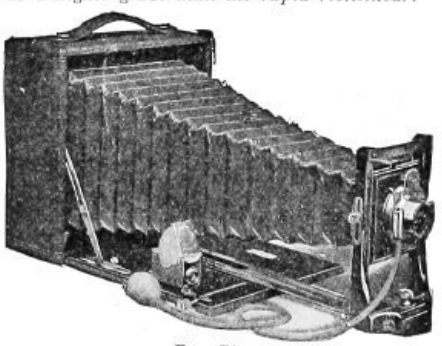


For Plates.

No. S7—For pictures 4×5 in., size 6×6×3 in., ebony finished camera box, corners dovetailed and covered with walrus grain leather, solid mahogany camera bed, ebony finished, attached to camera with improved nickel plated piano hinge, brass metal parts, handsomely nickel plated, black Russia leather bellows lined with gossamer cloth, complete with double adjustable plate holder and carrying case, w't 40 oz., each..... $29.35

No. S7—For pictures 5×7 in., size 8½×8½×3 in., w't 66 oz. ..... each 38.70

Perfect in design and compact in form. This instrument has obtained a world wide reputation for an all around business camera. It possesses a swing back, rising and falling front, hooded reversible brilliant finder, and also a rack and pinion. It is fitted with the celebrated Duo double valve shutter and Seneca symmetrical lens. The increase in draw of this camera is manipulated by a fine focusing attachment, and it also possesses a reversible back. The special features are that it possesses a swing back and the symmetrical lens, which is a higher grade than the rapid rectilinear.



For Plates.

No. S8—For pictures 4×5 in., size 6×6×3 in., ebony finished, camera box, corners dovetailed and covered with walrus grain leather, solid mahogany camera bed, ebony finished, attached to camera with improved nickel plated piano hinge, brass metal parts handsomely nickel plated, black Russia leather bellows lined with gossamer cloth, complete with double adjustable plate holder and carrying case, w't 44 oz., each $33.35

No. S8—For pictures 5×7 in., size 8½×8½×3 in., w't 66 oz.....each 44.00

Embraces features of a more pretentious nature than are to be found in the other numbers of the Seneca series described. Its length of draw and equipment of shutter makes the camera capable of a very wide range in photographic work. It is fitted with a double valve automatic shutter, and the Seneca triple convertible lens. The rear combination of the lens may be used alone, which nearly doubles the size of the image.

LENSES AND PLATE HOLDERS.

IDEAL PORTRAIT LENSES.

With Adjustable Springs.

	DIAM. IN INCHES.	FOR CAMERA.		
No. 1	1 5/16	4×5	each	$2.25
No. 2	1 5/16	5×7	"	2.25
No. 3	For box cameras		"	2.25
No. 4	1 7/16	4×5	"	2.25
No. 5	1 7/16	5×7	"	2.25
No. 6	1½	4×5	"	2.25
No. 7	1½	5×7	"	2.25
No. 8	1¾	any size	"	3.00
No. 9	2	any size	"	3.75
No. 10	2¼	any size	"	4.15
No. 11	2½	any size	"	4.50
No. 12	2¾	any size	"	4.90
No. 13	3	any size	"	5.25

The purpose of these lenses is to increase the light-gathering power of the ordinary rectilinear lenses that are supplied with all modern hand cameras.

They are placed in front of the regular lens and effect an optical combination with it that changes it from a simple rectilinear lens, that normally produces negative images on a relatively small scale, to a practical, quick-acting portrait lens that enables the operator to produce portraits with it on as large a scale as the plate in use is capable of handling.

IDEAL DUPLICATORS.

No. 1—Diam. 1 5/16 in	each	$0.40
No. 2—Diam. 1 7/16 in	"	.40
No. 3—Diam. 1½ in	"	.40
No. 4—Diam. 1¾ in	"	.45
No. 5—Diam. 2 in	"	.45
No. 6—Diam. 2¼ in	"	.55
No. 7—Diam. 2½ in	"	.55
No. 8—Diam. 2¾ in	"	.60
No. 9—Diam. 3 in	"	.60

By attaching this instrument to the lens of any folding camera, any person or persons can be photographed in two positions on the same plate, without showing any division line where the two exposures meet on the plate. Many humorous pictures can be obtained in this way. Two persons can be photographed together in a group without either one having ever seen the other. The Duplicator is attached to the camera the same way as the Ideal Ray Filter, and the duplicator can be turned around so that the image can be thrown on any part of the plate.

IDEAL ENLARGING AND COPYING LENSES.

With Adjustable Springs.

	DIAM. IN INCHES.	FOR CAMERA.		
No. 1	1 5/16	4×5	each	$2.25

No. 3	For box cameras		"	2.25
No. 4	1 7/16	4×5	"	2.25
No. 5	1 7/16	5×7	"	2.25
No. 6	1½	4×5	"	2.25
No. 7	1½	5×7	"	2.25

The Ideal Enlarging and Copying Lens is made to be used in combination with any photographic objective lens, increasing its power for copying to at least twice its capacity.

It will enable those possessing cameras that are not long focus instruments to photograph small articles to their full size or even larger, if it is desired. It will be found invaluable for copying pictures, making lantern slides by reduction with a short bellows hand camera and photographing small objects.

IDEAL RAY FILTERS.

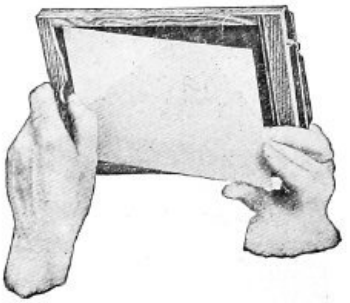
No. 0—For No. 3 F. P. K.	each	$1.50
No. 1—Diam. 1 5/16 in	"	1.50
No. 2—For box cameras	"	1.50
No. 3—Diam. 1 7/16 in	"	1.50
No. 4—Diam. 1½ in	"	1.50
No. 5—Diam. 1¾ in	"	1.90
No. 6—Diam. 2 in	"	2.25
No. 7—Diam. 2¼ in	"	2.65
No. 8—Diam. 2½ in	"	3.00
No. 9—Diam. 2¾ in	"	3.40
No. 10—Diam. 3 in	"	3.75
No. 11—Diam. 3¼ in	"	4.50
No. 12—Diam. 3½ in	"	5.25
No. 13—Diam. 4 in	"	6.40
No. 14—Diam. 4½ in	"	7.50

Prices of square filters and special sizes on application.

This Ray Filter can be used with any make of dry plate on the market. It gives true color value to all objects in a picture, whether landscapes, snow scenes, interiors, flowers, portraits, etc. It should be used in photographing mountains or distant objects. It prevents halation, as it absorbs the rays that cause it. The most beautiful cloud effects are obtained with it.

Mounted in nickel-plated cells with adjustable springs, and supplied in neat circular plush lined cases, which can be used for a cap when the filter is over the lens.

SENECA PLATE HOLDERS.



Steel Spring Bar.

3¼×4¼ in	each	$1.10
4 ×5 in	"	1.10
5 ×7 in	"	1.35

Seneca Improved, Wood Bar.

3¼×5½ in	each	$1.35

To hold plate for No. 3A Seneca Cameras.

Seneca Plate Holders are the best seasoned cherry, and the grooves are accurate and smooth inside, insuring freedom of action. To load them, rest the end of the plate against the spring bar at the end, then by simply pressing the bar with the finger the plate falls into place. To unload, press the bar and let the plate rest against the fingers, when it may be taken from the holder. We are furnishing all of our plate holders, unless otherwise specified, with black press-board slides, especially prepared to prevent warping, swelling, etc., caused by change of temperature. In this way we avoid many of the faults blamable to hard rubber. We recommend press-board slides in every instance.

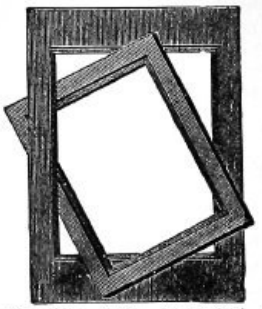
ADJUSTABLE PLATE HOLDERS.

4 × 5 in.—For plates 4×5, 3¼×4¼ and 3½×3½ in	each	$1.70
5 × 7 in.—For plates 5×7, 4¼×6½, 4×5 and 3¼×4¼ in	each	1.70
6½× 8½ in.—For plates 6½×8½, 5×8, 5×7 and 4¼×6½ in	each	2.40
8 ×10 in.—For plates 8×10, 6½×8½, 5×8 and 5×7 in	each	2.80

These plate holders carry and automatically center plates of a size smaller than the holder. When plates the full size of the holder are used, the springs are pushed back and held in a recess. The holders are made to fit all the leading cameras on the market.

Seneca plate holders will fit the following cameras: Century, Korona, Premo and Poco.

PLATE KITS.

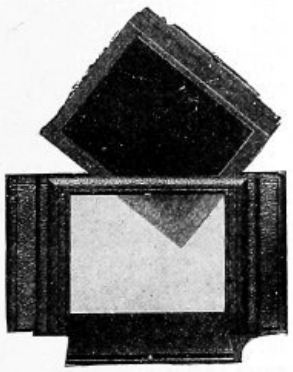


4 × 5 in.—To hold 3¼×4¼ in. plates	each	$0.30
5 × 7 in.—To hold 4×5 in. or smaller, each		.35
6½× 8½ in.—To hold 5×7 in. or smaller, each		.45
8 ×10 in.—To hold 6½×8½ in. or smaller	each	.60

Kit consists of thin wooden frames, made to fit in the dry plate holder, and with rabbets for holding smaller sized plates.

PHOTOGRAPHIC SUPPLIES.

ANSCO DRY PLATE ATTACHMENTS.



Ansco Dry Plate Attachment, complete, each $6.00

This attachment, or rather interchangeable back, is supplied for those who desire to use dry plates instead of films in the Ansco cameras Nos. 4, 5, 6, 7, 9 and 10.

When the Ansco dry plate attachment is substituted for the film back, the Ansco camera does not vary in appearance. It remains the same only that it takes a double dry plate holder. It is not, therefore, a make-shift, as heretofore sold by other manufacturers. An Ansco fitted with this attachment is the most compact, practical and efficient dry plate camera on the market.

SENECA FILM PACK ADAPTER.

Loaded Ready for Use.

Front View.

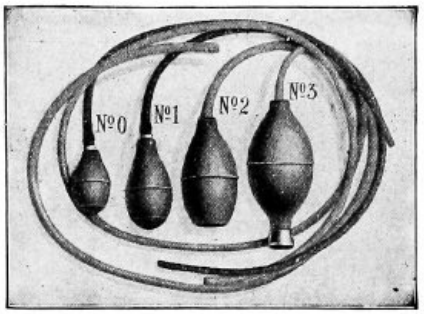
3¼x4¼ in.	each	$1.50
4 x5 in.	"	1.90
3¼x5½ in.	"	1.90
5 x7 in.	"	3.00

Film can be used in a plate camera by its use It is the only perfect adapter for film packs. It is made of aluminum and cherry with a press board slide, and is interchangeable with the plate holders. There are no hinges to become loosened and perhaps spoil the film It is light tight. The use of ground glass for focusing purposes while using film for exposures is made possible by this adapter. Can be used with any plate camera.

We do not furnish the film packs.

ONE IN A BOX

CAMERA BULBS.



No. 0—For pocket cameras	each	$0.30
No. 1—2½×1⅜ in., bulb	"	.35
No. 2—3¼×1½ in., bulb	"	.50
No. 3—3½×1¾ in., bulb	"	.75

These bulbs and hose are made of the finest quality pure rubber. They are very elastic and can be fitted to any shutter. The Nos. 0 and 1 sizes are of red rubber, and the other two sizes of white rubber. The No. 3 bulb is fitted with a wooden plug, and is especially adapted for studio shutters.

RUBBER TUBING.

Red, for camera shutters, same as supplied with bulbs	per foot	$0.09
White, for studio shutters	"	.08

METAL TRIPODS.

No. 11—3 sliding parts, adapted for cameras up to 4×5 in. ..... each $3.50

No. 12—4 sections, adapted for cameras up to 4×5 in. ..... each 4.20

To open the tripod, the several joints are pulled apart when they automatically set and cannot close, except by pushing a spring lever in upper joint. It is light and can be folded.

SLIDING TRIPODS.

No. 3—Maple, for 4×5 in. and 5×7 in. cameras ..... each $1.50

The legs are in three pieces, the center piece sliding in between the outer ones forming the lower section.

The lower section may be clamped at any desired length so that the tripod may be used at varying heights. They are of thoroughly seasoned spruce. The metal parts are all of brass, polished and lacquered.

No. 1—IDEAL, maple; length folded 19 in., supplied with wood head to match, covered with leather on top, fitted with standard thread screw, for 4×5 in. and 5×7 in. cameras ..... each $3.20

No. 2—IDEAL, hardwood; length folded 20 in., fitted with wood head to match, covered with felt on top, with universal camera screw, this is a very strong tripod, suitable for 5×7 in., 6½×8½ in. and 8×10 in. cameras ..... each 4.20

No. 7—IDEAL, especially recommended for the heavier 8×10 in. and 11×14 in. cameras. It is made of ash, with large top suitable for the cameras for which it is designed ..... each 6.00

All of the Ideal tripods are made to fold very compact. Each leg is composed of three sections, the lowest section slides into second, while the upper section folds back upon it.

The lower section may be clamped at any desired length (by means of a screw) so that tripod may be used at varying heights.

The heads are detachable, and are fitted with the standard thread camera screw which fits any camera.

The wood is selected, thoroughly seasoned, smoothed and varnished, and the metal fittings are of brass polished and lacquered.

CYKO POST CARDS.

Packages of 1 dozen.....per package $0.23
Packages of ½ gross..... " 1.13

These are the same size as the ordinary postal card and are used for making souvenir views illustrating incidents and scenes of interest on a person's trip.

INGENTO BLUE PRINT POSTALS.

These cards produce brilliant blue-tone prints, that for beauty and for permanency cannot be surpassed.

The process is so simple that the youngest amateur in photography can understand its theory and secure excellent results.

No chemicals are required; merely print in sunlight, then wash in plain water.

These Postal Cards are packed in hermetically sealed metal cans containing 12 cards and full directions for using.

In cans of 12.....per can $0.23

DRY PLATES.

Stanley.

One of the best for amateur work, very rapid and responds quickly and evenly to the developer, is positively uniform in results.

Seeds 26X.

3¼x4¼ in.	per dozen	$0.68
3½x3½ in.	"	.60
3¼x5½ in.	"	.98
4 x5 in.	"	.98
5 x7 in.	"	1.65

Very rapid, especially desirable for amateur work.

Seeds 27 Gilt Edge.

3¼x4¼ in.	per dozen	$0.72
3¼x5½ in.	"	1.04
4 x5 in.	"	1.04
5 x7 in.	"	1.76

Extra rapid for instantaneous work.

Cramer Crown.

4x5 in.	per dozen	$0.98
5x7 in.	"	1.65

The most rapid plate made. It has good latitude and all the fine printing qualities that are so distinctive a feature of the Cramer plate.

It is recommended especially for hand cameras and instantaneous work and for large work and groups in the studio.

Cramer "Banner X."

4x5 in.	per dozen	$0.91
5x7 in.	"	1.54

Very rapid, with great latitude; gives a brilliant, quick printing negative, full of detail in the shadows, which prints as well as it appears. The Banner X plate is the best for general use in portrait photography.

5X7 IN., TWENTY DOZEN; BALANCE, THIRTY DOZEN IN A CASE.

Cramer Isochromatic.

4x5 in., instantaneous	per dozen	$1.04
4x5 in., medium	"	1.04

These plates give better color values without the use of a yellow screen than any other plate of the same rapidity. They are fully isochromatic when used with a pale yellow Roy Filter, which requires only a trifle longer exposure. On account of their high sensitiveness to yellow and artificial light, they are the best plates for flash-light exposures. Can supply in slow, medium and instantaneous.

FILM NEGATIVE ALBUMS.

No. 1—For 3½x3½ in. film negatives, or smaller, each	$1.20
No. 2—For 3¼x4¼ in. film negatives, each	1.60
No. 3—For 4x5 in. film negatives, each	1.60
No. 4—For 5x7 in. film negatives, "	2.40
No. 5—For 3¼x5½ in. film negatives, each	1.60

Each album contains 100 envelopes or pockets made of tough transparent paper and numbered consecutively from 1 to 100. It also has an index ingeniously ruled and numbered for 100 entries. Thus by referring to the index one can at once determine the location of the desired film negative.

PHOTOGRAPHIC SUPPLIES.

DEVELOPING POWDERS.

These powders will develop all makes of plates, films, lantern slides, bromide papers, etc., in the most perfect manner.

They are complete in themselves—no other chemicals are required. They will keep any length of time in all climates. The youngest amateur will succeed with them. They can be carried in the pockets or sent through the mails.

No fear of breakage. Perfect for travelers, the powders being simply dissolved in four ounces of water in one minute. Six pairs of powders in each box. Sufficient to make 24 ounces of solution. Full directions printed on each envelope containing one set of powders.

Pyro.

No. 1—Boxes of six pairs of powders, each $0.30

This is a most excellent developer for negatives. The finest results can be obtained by its use. Its only disadvantage is its liability to stain, but with ordinary care this can be avoided.

Eiko-Hydro.

No. 2—Boxes of six pairs of powders, each $0.30

For portraits, outdoor views, etc., it is one of the best known reliable developers. It gives detail and density in harmonious proportions as the development proceeds and will not stain either negatives or fingers.

It is suitable for all makes of plates and films.

Hydrochinon.

No. 4—Boxes of six pairs of powders, each $0.30

This developer is especially suited for subjects requiring extreme contrasts with purity in the shadows, such as lantern slides, book illustrations and bromide papers and instantaneous exposures. Especially suitable for films and plates.

Hydro-Metol.

No. 5—Boxes of six pairs of powders, each $0.30

For general use the Hydro-Metol developer will be found the most satisfactory as having he *widest range of adaptability.* This developer gives a rich black deposit, clear whites with complete absence of stain. It is well suited for snapshots on plates and films, and developing papers. For an all around clean working developer this combination is hard to beat.

No. 6—Auto Tank, for use in connection with tank or standard development, boxes of six pairs of powders ....each $0.30

M. Q. (in Glass Tubes).

No. 8—Boxes of six tubes .....each $0.50

Pictures on developing paper affected by this preparation show all the details that were in the negative, and have a tone quality that is equaled only in platinum and carbon prints. The whites are pure; the gradations the softest imaginable; shadows and high-lights rich in detail, and the tone just right.

Negatives on plates or films developed with this preparation will be found to be brilliantly clear, free from stain or fog, and with perfect gradations and details. Always fresh and ready by simply dissolving the contents of the tubes in water.

M. Q. OUTFITS.

Outfit Complete—For developing and fixing Cyko, Velox and Argo paper, and films .....each $0.25

This is a trial size outfit, containing one Ideal M. Q. tube and trial size package of Ingento acid hypo, sufficient to develop and fix about fifty 4×5 in. prints. It can also be used for plates and films.

ANTI-FRICTION DEVELOPERS.

No. 12—Boxes of six tubes .....each $0.35

For lustre and glossy surface papers, put up in paraffine lined tubes, ready for use, six tubes sufficient for 24 oz. solution.

REVONOC HYDRO-METOL DEVELOPER.

For Plates, Films and Developing Paper.

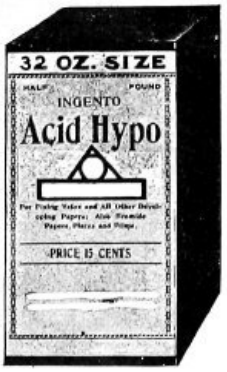
This is a powerful, quick acting developer in solution, ready for use when diluted with water. Every kind of plate, film or gaslight paper can be advantageously developed with it.

The chemicals contained in it are in such exact proportions as to give the greatest possible latitude for under or over exposures. This adaptability, together with the beautiful results it yields, makes it the most perfect developer for general use.

No. 2 REVONOC—36 oz. size, in 8 oz. bottles, each $0.30

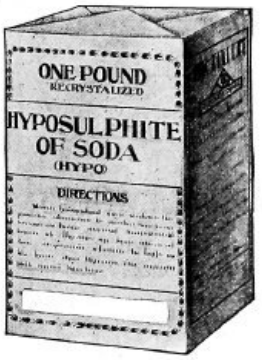
H. S. B. & CO.'S ACID HYPO.

This compound, for fixing Velox and other developing papers, plates and films, crystalline itself, makes a clean, clear solution that fixes. It is, by all odds, the most satisfactory fixing bath that has been shown on the American market, for it not only fixes papers, plates and films to perfection, but it also clears the whites, makes the shadows transparent and hardens the films. Plates and papers that have been fixed in this bath need no other hardening.



No. 1—Boxes (will make 16 oz.)....each $0.10
No. 2—½ lb. pkgs..... " .20
No. 3—1 lb. pkgs..... " .35

H. S. B. & CO.'S (HYPO).



No. 5—1 lb. boxes.....each $0.08

This is a fine selected hyposulphite of soda, either pea crystal or granular, for fixing plates or paper. The crystals are pure, transparent, small and easily dissolved.

Put up in strong, paper covered and sealed square carton boxes.

SEPALINE.

For Producing Brilliant Sepia Tones on Velox, Argo, Cyko, Bromide and Other Developing Paper, Transparencies and Lantern Slides.

Black and white prints on developing paper can be redeveloped at any time to a perfect sepia. It takes but two minutes to produce a finished sepia print, while by the old hypo-alum process it takes from six to twenty-four hours. Prints toned with sepaline are absolutely permanent and the results when finished are equal if not superior to sepia-tone platinums.

No. 8—Package sufficient for 300 cabinet prints..... .....each $0.60

NEG-DRY.

With Neg-Dry negatives can be dried in less than five minutes, after they have been washed by placing them in this preparation and then drying them by artificial heat. It makes the gelatine insoluble and eliminates all traces of hypo that may not have been washed out of the negative.

It makes the film hard and therefore no varnish is required. Neg-Dry is the best hardener made for printing papers. It overcomes all trouble experienced in handling papers during hot weather, and prevents prints from sticking to the ferrotype plate. Sold only in 4-ounce bottles.

Neg-Dry .....per bottle $0.40

PHOTOGRAPHIC SUPPLIES.

REVONOC TONING AND FIXING SOLUTION.

For Gelatine Printing-Out Papers, Including Solio, Royal White Star, Disco, etc.

This toning solution is rich in gold, and its ingredients are so proportioned that when the toning is completed the prints will be thoroughly fixed.

Prints may be immersed in this bath directly from the printing frame as they require no preliminary washing, and the toning and fixing proceed together very evenly and rapidly until the operation is completed.

This bath works perfectly with all makes of printing-out papers; the tones range from light sepia to a deep brown or black, and the results are permanent.

No. 2 REVONOC—28 oz. size in 8 oz. bottles, each $0.30

TONING AND FIXING TUBES.

No. 2—Tube for 12 oz. of solution ..each $0.15

REDUCING POWDERS.

No. 10—Box of 12 packages .....each $0.30

Negatives that are so dense as to be useless or that take hours to print through, can be quickly reduced to the correct density for quick printing by the use of these preparations.

CYANINE BLUE PRINT POWDERS.

Cyanine produces Prussian blue prints of royal tone readily and rapidly on paper, cards and fabrics.

Cyanine consists of one powder to be dissolved in plain water and is then instantly ready for use. It will keep indefinitely without deteriorating. It can be used successfully the first time by the youngest amateur. Prints made with cyanine may be toned at any time to sepia, brown, black or green. Full directions with each bottle. Sold only in sealed glass bottles.

No. 1—1 oz. bottles .....each $0.25
No. 4—4 oz. bottles ..... " .70

SOLINE.

A single application of this solution makes all kinds of cloth, paper and cards very sensitive to sunlight. It will be found invaluable for making prints on sofa pillows, banners, handkerchiefs, visiting cards, note paper, etc.

Soline is easily and quickly applied, and materials sensitized with it are printed like any ordinary photographic paper.

No. 12— 2 oz. bottles..... each $0.64
No. 18— 8 oz. bottles..... " 2.10
No. 20—16 oz. bottles..... " 3.60

POLISHING SOLUTION.

This solution is to be rubbed on the ferrotype plate. It absolutely prevents prints from sticking to the plate so that when the prints dry they peel off without tear or blemish and have a most magnificent glace polish.

No. 13.....each $0.15

RESTRAINING TABLETS.

Potassium bromide C. P. tablets are made of chemically pure potassium bromide and each tablet contains exactly ten grains. The use of potassium bromide has become so necessary that every amateur or professional photographer must use it in order to obtain satisfactory results in developing plates or papers.

No. 17.....each $0.15

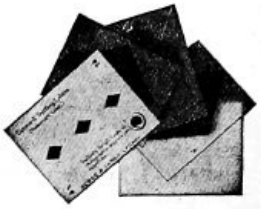
INTENSINE.

No. 19—Tubes ..... each $0.30

This is a powerful, quick-acting intensifier, in crystalline form, that dissolves instantly in water to make a single solution. When applied to thin, flat printing negatives it makes them strong and brilliant printers.

A tube of it making eight ounces of intensifying solution (enough for four or five dozen 4×5 in. plates), can be carried in the vest pocket.

DIAMOND SPOTTING COLORS.



No. 1—Per set of three colors.....each $0.20

This is the "catchiest" set of sporting colors that has ever been provided for amateur use. It is made from the choicest spotting and retouching pigments that are obtainable. It is a very attractive set and is as useful as it is attractive. This should be seen and used to be fully appreciated.

LUXO FLASH-LIGHT POWDERS.

Luxo is a magnesium flash powder, which is very quickly ignited, and is of great actinic power, producing very little smoke and being almost noiseless. It is without doubt the most popular flashlight compound on the American market, being used by all the best flashlight photographers.

It is put up in one and four-ounce wooden boxes. Owing to the danger incident to handling flash-light powder, Luxo is not put up in larger packages than four ounces. Flash-light powder cannot be sent by mail.

½-ounce boxes..... each $0.50
4-ounce boxes ..... " 1.70

LUXO FLASH CARTRIDGES.

No. 1—Small size.....per package $0.35
No. 2—Large size..... " .55

Luxo cartridges are made of Luxo flash powder put up in cartridge form, which is both safe and convenient. They are supplied with fuse ready to use. They yield a magnificent intense actinic light that has a powerful action on a sensitive dry plate, equal to a burst of sunlight. Put up in two sizes, each containing six cartridges.

PHOTOGRAPHIC OUTFITS, WASH BOXES, ETC.

DEVELOPING AND PRINTING OUTFITS.

No. 1—For negatives, 4×5 in. or smaller, complete in cardboard box .. ...each $1.60

Contents.

3 japanned trays.
1 printing frame.
1 ruby candle lamp.
Developing powders to make eight ozs., solution.
Toning powder to make eight ozs., solution.
1 lb. hypo.
1 4-oz. measuring glass.
1 doz. sensitized paper.
1 manual of instructions

No. 2—For negatives, 4×5 in. or smaller, complete in cardboard box.....each $2.40

Contents.

3 electrose trays.
1 ruby candle lamp.
1 printing frame.
1 box developing powders.
1 pkg. toning powders.
1 lb. hypo.
1 4-oz. measuring glass.
1 doz. sensitized paper.
1 manual of instructions

No. 3—For negatives, 4×5 in. or smaller, complete in cardboard box.....each $3.00

Contents.

3 electrose trays.
1 4-oz. graduate.
1 ruby candle lamp.
1 printing frame.
1 box developing powders.
1 pkg. toning powders.
1 negative drying rack.
1 print roller.
1 4-oz. jar paste.
1 paste brush.
1 doz. card mounts.
1 lb. of hypo.
1 doz. sensitized papers.
1 manual of instructions.

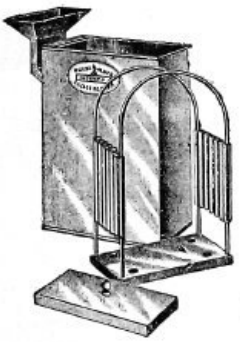
These outfits contain all the necessary apparatus, chemicals and material for the developing and fixing of plates, also for the printing, toning and mounting of prints. Our No. 3 outfit contains everything required for the production of the finished mounted photograph, except the camera, and is especially recommended. We guarantee everything contained in these outfits to be of the best quality.

FOCUSING CLOTHS.

No. 5—Focusing cloth is made of fine black serge cloth, coated on one side with rubber, which makes it perfectly light and waterproof. Each cloth is one yard square.....each $0.60

PACKED IN CARDBOARD BOX.

INGENTO DEVELOPING TANKS.

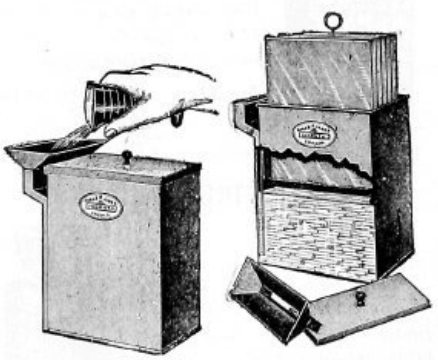


Style A.

For Developing, Fixing and Washing.

3¼× 4¼	in., or L. S.	each $3.40
3¼× 5½	in.	" 3.40
4 × 5	in.	" 3.40
5 × 7	in.	" 5.00
8 ×10	in.	" 8.50

Made of strong brass, polished and nickel plated, and fitted with removable rack with wide grooves to hold the plates.



Style B.

For Developing and Washing.

3¼× 4¼	in.	each $1.75
4 × 5	in.	" 1.75
5 × 7	in.	" 2.50
8 ×10	in.	" 3.50

These tanks are of heavy zinc, fitted with grooves which extend from the top downward and with our patent lifting bottom which allows the negative to be removed without dipping the fingers in the solution.

This tank cannot be used for fixing, as zinc will gradually disintegrate under the action of a Hypo solution.

Ingento Tanks "A" and "B" are made with six wide grooves to take six plates readily. Twelve plates can be developed at once by placing two in each groove with the backs together.

Outside of tanks A and B, and extending to the bottom, is a screened, light-tight tube by means of which the tank is filled through a funnel with the developer in daylight, the solution entering at the bottom of the compartment.

INGENTO PRINT WASHERS.

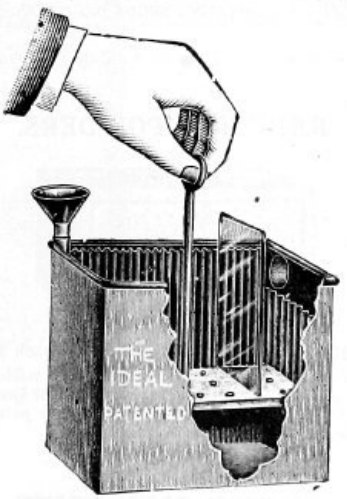
No. 1—For 4×5 in. prints, 10 in. diam., each $2.00

No. 2—For 5×7 in. prints, 12 in. diam., each 2.80

This print washer employs some scientific principles that have never before been applied for such a purpose, and the result is a washing apparatus in which the prints are thoroughly and separately washed without requiring the slightest attention during the operation.

The water is admitted through the side and at first takes a circular direction, following the side of the cylinder, but the circular motion is checked and converted into a centripetal one before the end of the first revolution by a simple device contained within the cylinder, so that the prints are kept constantly in its center and away from the outlet.

ADJUSTABLE WASH BOXES.



No. 2—Same size as No. 5 only very much heavier material and stronger throughout.....each $2.00

These washers are perfect in their construction. The water enters through the inlet tube and is carried to the bottom and is circulated over the whole area of the box. It is carried off through the outlet tube. The water can be carried to the box by attaching a rubber hose from the faucet to the inlet tube, or the box can be placed under the faucet and the water allowed to run into the funnel.

Our patent lifting bottom can be taken up by means of the rod in the center, so that the films can be held at the edge without scratching them.

The washer is constructed of heavy zinc throughout. If desired, the lifting bottom can be taken out entirely.

PHOTOGRAPHIC SUPPLIES.

ELECTROSE TRAYS.

4 × 5⅜ in. ..... each $0.14
5½ × 8½ in. ..... " .30
7 × 9 in. ..... " .48
8½ × 10½ in. ..... " .60

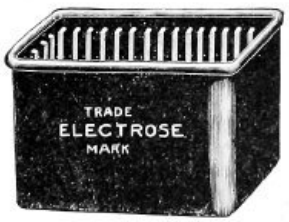
Electrose Trays are entirely seamless and consist of a solid mass of homogeneous material. Chemicals will neither affect nor discolor them. They are provided with an outpour lip. All corners in the interior of the tray are rounded.

IDEAL HARD RUBBER TRAYS.

4¼ × 5¼ in. ..... each $0.75
5¼ × 7¼ in. ..... " .92

For most purposes these hard rubber trays are the best as they are made of pure rubber (vulcanized). They cannot be attacked by any acid or chemical. They will last a lifetime, although constantly used. They are tight and strong and if accidentally broken can be repaired by revulcanizing. Where trays are in constant use, these will be found the most economical.

ELECTROSE FIXING BOXES.

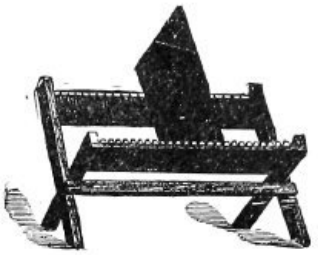


No. 1—For 3¼ × 4½ in. and 4 × 5 in. plates ..... each $1.50

No. 3—For 4 × 5 in. and 5 × 7 in. plates, each 2.25

This box is made of electrose, a chemical proof material which is vulcanized like hard rubber. It is made of one solid mass of the same material throughout, not coated or varnished. It will stand the action of hypo in solution in any form, plain or acid. It is the neatest and most practical box ever offered.

NEGATIVE DRYING RACKS.



No. 1—For 12 negatives ..... each $0.20

These racks are strongly and neatly made and fold up very compactly. The No. 1 is by far the best medium priced rack on the market. It is substantially built, has corrugated bars to hold the negatives, and is made of nicely finished cherry.

PHOTOGRAPHIC PASTE.

No. 846G—SNOW FLAKE, 2 oz., wide mouth office stand, with brush, w't per gro., 51 lbs. ..... per dozen $0.75

No. 844G—SNOW FLAKE, 4 oz., wide mouth office stand, with brush, w't per doz. 6¼ lbs. ..... per dozen 1.60

Will not mould or sour, nor discolor anything on which it is used.

NO. 846, THREE DOZEN; NO. 844, ONE DOZEN IN A BOX.

IDEAL FLASH GUNS.

No. 1—Complete with 4 in. powder pan ..... each $1.90

This is the latest novelty in flash-light powder igniters. The powder is set off by a match, which is lighted by being pushed through a barbed tube. The match is forced through by means of a spring which is released by a touch of the finger on the trigger. The action is instantaneous, sure and noiseless. The pan is one of the special features of this apparatus. It is long and shallow and is so constructed that the light is thrown forward and utilized to its greatest degree. The Ideal Flash Gun is made of brass and handsomely copper plated and oxidized.

BARCLAY GRADUATES.

4 oz. ..... per dozen $3.50
8 oz. ..... " 5.60
16 oz. ..... " 8.00

The Barclay graduates are gotten up to supply the demand for an accurate graduate at a low price. The lines and figures are pressed instead of engraved, which renders them readily seen when in the dark room.

TUMBLER GRADUATES.

4 oz. ..... per dozen $1.20
8 oz. ..... " 1.75
16 oz. ..... " 3 00

These graduates have pressed lines and figures and are accurately graduated.

FUNNELS.

Handy.. per dozen $1.80

As its name implies it is a handy funnel to have about for use with small bottles, having a capacity of 2 ounces. It has a groove on the side of neck so that the air is expelled while filling the bottle.

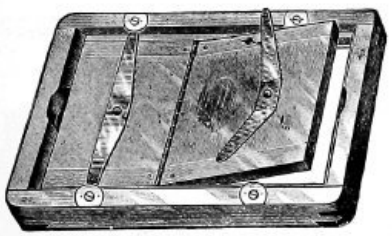
HYDROMETERS.

A hydrometer is an absolute necessity if you make up your own solutions, especially of soda mixtures, as different sodas vary greatly in strength. Our hydrometers have especially long tubes, which make them sensitive to the slightest variation in the specific gravity of the solution under test. Directions for use with each hydrometer.

No. 8—Including glass jar. each $0.40

PHOTOGRAPHIC SUPPLIES.

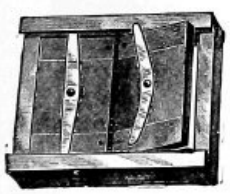
PRINT FRAMES.



IMPERIAL.

3¼×4¼ in., piano hinge	each	$0.54
4 ×5 in., piano hinge	"	.57
5 ×7 in., piano hinge	"	.75

These frames are fitted with countersunk piano hinges, which extend along the full width of the pressure board and which add to its strength, appearance and durability. They have extra heavy springs and large finger cut-outs, and are by far the best heavy printing frames on the market.

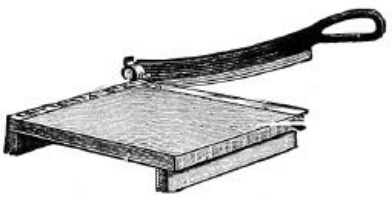


AMATEUR.

3½×3½ in., piano hinge	each	$0.30
3¼×4¼ in., piano hinge	"	.30
4 ×5 in., piano hinge	"	.30
3¼×5½ in., piano hinge	"	.36
3⅝×6 in., piano hinge	"	.36
5 ×7 in., piano hinge	"	.42

Is the highest grade of light frame made; has a steel countersunk piano hinge clear across, making it very durable and giving it a neat appearance.

TRIMMING BOARDS.



INGENTO.

6½ in	each	$2.00
8½ in	"	2.68

The blades of these boards are tempered steel, hollow ground, that keep a sharp edge and may be easily and quickly sharpened with an oil stone.
The board is of hard wood and polished.

IDEAL.

No. 1—For prints 4×5 in. .....each $0.65

These trimming boards are the latest addition to our line, and are especially gotten up to meet the demand for a low priced print trimmer. The boards are made of hard wood and shellac finished. The cutting knives are made of hardened steel and finely ground.

RUBBER PRINT ROLLERS.

4 in., black enameled	each	$0.25
6 in., black enameled	"	.40

The Ideal print rollers are made of the best material throughout. The handles are made of oak and polished, which make a comfortable grasp for the hand. The rollers are made of pure rubber with hardwood center, and revolve free and true in their frames. The pivots are specially manufactured for these rollers and are driven far into the hardwood center.

PUSH PINS.

No. 5G—Non-corrosive metal .per dozen $0.30

These will be found most practical for a great many purposes, especially for hanging up films and prints to dry.

RUBY OIL LAMPS.

No. 1G—Ideal ruby	each	$0.70
No. 2G—Ideal ruby, extra large	"	1.30
Extra ruby or orange glass for No. 1	"	.16
Extra ruby or orange glass for No. 2	"	.18

These lamps are made on improved and scientific plans, giving a volume of light never before obtained with this style of lamp. They are regulated and filled from the outside and they are fitted with a new patent burner which insures perfect combustion without smell or smoke. The front is fitted with both orange and ruby glass, making the light perfectly non-actinic.

PLATE BRUSHES.

No. 2G—Camel's hair, 2 in. flat, for dusting plates and films, tin bound....each $0.60

FERROTYPE PLATES.

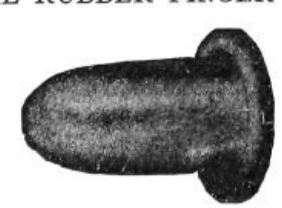
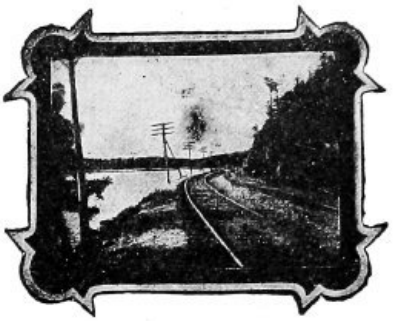
PURE RUBBER FINGER TIPS.



No. 5—Three in a box.....per set $0.25

Made especially for photographic use. The best ever offered to prevent discoloration of nails and fingers from acids and chemicals. They will not impair the sense of touch. Very easily applied or removed.

MANNING'S MASKS.



No. 3—Assortment contains 12 masks, plain, ovals, circles, squares and round corner squares, sizes 3½×3½ in., 3¼×4¼ in., 4×5 in., and 5×7 in., per assortment..... $0.35

No. 5—Assortment contains 12 designs of stars, shields, fancy circles and other irregular figures. Sizes 3½×3½ in., 3¼×4¼ in., 4×5 in., and 5×7 in., per assortment..... .35

These packages are recommended as first-class and sure to please. Use with ordinary printing frames, according to size of negative.

TRANSPARENT WATER COLORS.

No. 4—Per box containing colors, complete.....each $0.40

No. 6—Extra colors, per pan..... " .10

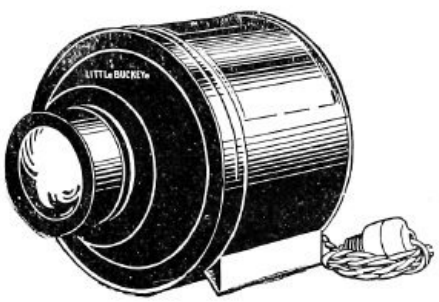
These colors are prepared exclusively for coloring photographs and lantern slides. They are also well adapted for coloring halftone prints now so common in our popular publications, and which when colored and mounted have a rich and attractive appearance.

The few simple directions accompanying the set are clearly worded and readily understood by even the small boy or girl who may want to color a few magazine pictures. Besides the directions, a list of harmonizing colors accompanies the set.

POST CARD PROJECTORS.

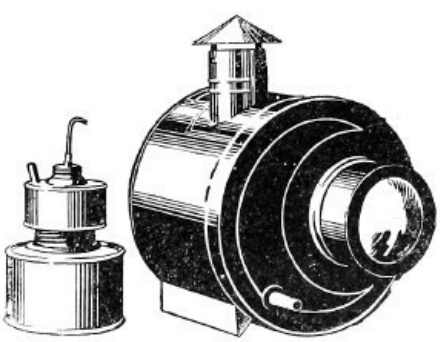
POST CARD PROJECTORS.

The Post Card Projector is one of the latest productions. It will project on a screen, in natural colors, post cards, photos and other opaques *greatly magnified*. The image is clear and sharp to the edge. It is fitted with electric lamps or gas burners and connections ready to attach to any light fixture. Also with acetylene attachment for homes without either electric or gas fixtures. The lenses are special double convex, finest quality. The finish is black enamel decorated. The price is graded on quality of lenses, candle-power and type of lamps and equipment.



No. 107—Electric, 8⅞x8½x8½ in., fitted to use Tungsten clear globe 40 watt lamps in voltage to suit individual circuit, complete with connections, w't 6 lbs.....each $4.00

Unless otherwise specified electric instruments are fitted with lamps suitable for 104 to 115 volt circuits for alternating and direct current.



No. A108—Acetylene gas, 11¼x8½x8½ in., complete with generator, w't 6 lbs., each..... $4.00

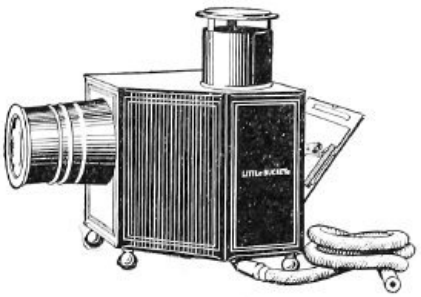
These instruments are essentially for home use and are practical and fascinating in their field. Where directions are carefully followed highly satisfactory results are secured.

Excellent results can be obtained at various distances up to fifteen or eighteen feet from the screen, the size of definition varying up to five or five and one-half feet in diameter, although, of course, results with the cheaper projectors are not equal to those secured with the higher priced ones.

Best results when operating the cheaper instruments are secured at a distance not to exceed eight or ten feet and at this distance the definition will naturally be smaller than when operating the higher priced machines.

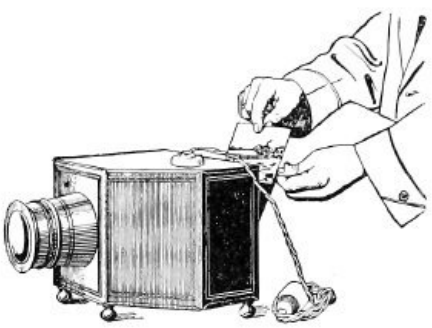
The room should always be entirely dark when operating.

POST CARD PROJECTORS.



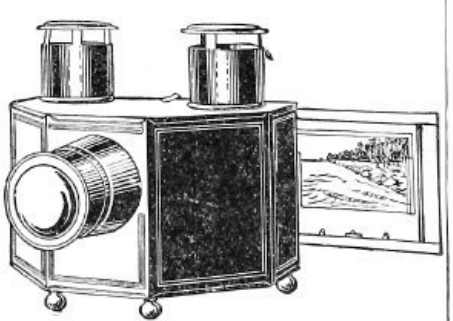
No. 106—Gas, 11¼x9¾x8½ in., high C. P. burner, Buckeye mantle and equipment, including 6 ft. of hose, w't 8 lbs.....each $6.65

No. A106—With acetylene attachments, improved generator, otherwise the same as No. 106, w't 9 lbs.....each 6.65



No. 105—Electric, 11¼x9¾x8½ in., fitted to use Tungsten clear globe 40 watt lamps in voltage to suit individual circuit, complete with connections, w't 8 lbs.....each $6.65

Unless otherwise specified electric instruments are fitted with lamps suitable for 104 to 115 volt circuits for alternating and direct current.



Nos. 104 and A104.

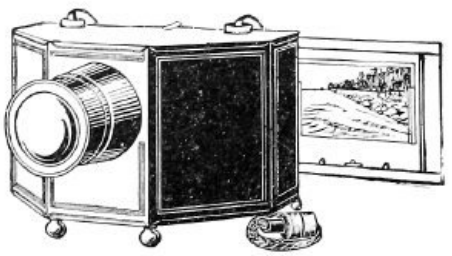
No. 103—Electric, 11¼x13x8½ in., fitted to use Tungsten clear globe 40 watt lamps in voltage to suit individual circuit, complete with connections, w't 10 lbs.....each $10.00

No. 104—Gas, 11¼x13x8½ in., complete with two high C. P. burners, Buckeye mantles and equipment, including 6 ft. of hose, w't 10 lbs...each 10.00

No. A104—With acetylene attachments, improved generator, otherwise the same as No. 104, w't 11 lbs.....each 10.00

Unless otherwise specified electric instruments are fitted with lamps suitable for 104 to 115 volt circuits for alternating and direct current.

POST CARD PROJECTORS.



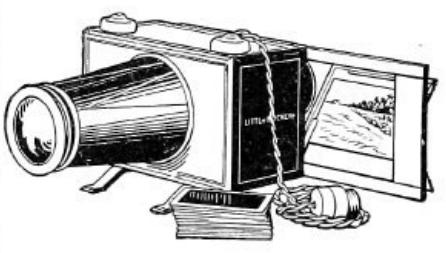
No. 101.

No. 101—Electric, 12x15¼x8½ in., complete with two high C. P. electric lamps, w't 11 lbs.....each $13.35

No. 102—Gas, 12x15¼x8½ in., complete with two high C. P. burners, Buckeye mantles and equipment, including 6 ft. hose, w't 11 lbs.....each 13.35

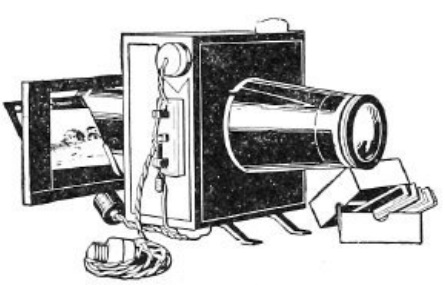
No. A102—With acetylene attachment, each..... 13.35

Unless otherwise specified electric instruments are fitted with lamps suitable for 104 to 115 volt circuits for alternating and direct current.



No. 33—Electric, 18½x10¾x9 in., fitted to use Tungsten clear globes 40 watt lamps in voltage to suit individual circuit, complete with two high C. P. electric lamps, w't 18 lbs.....each $20.00

Unless otherwise specified electric instruments are fitted with lamps suitable for 104 to 115 volt circuits for alternating and direct current.



No. 31—Electric, 21x11¾x12⅞ in., fitted to use Tungsten clear globes 40 watt lamps in voltage to suit individual circuit, complete with four high C. P. electric lamps, w't 20 lbs.....each $26.65

Unless otherwise specified electric instruments are fitted with lamps suitable for 104 to 115 volt circuits for alternating and direct current.

TALKING MACHINES.

This low priced machine makes a rare bargain in a handsome up-to-date talking machine. It has an attractive hard wood case, new aluminum tone-arm with the latest style of sound-box. The floral horn can be swung in any direction. The motor is first class, and will work smoothly and almost noiselessly.

Cabinet—Quarter sawed oak, highly polished, 10-inch base, height 6 inches.

Turntable—10-inch, with gilded edge, covered with green felt.

Motor—Spring, can be wound while running.

Horn—Black enamel with gold bands, 21 inches long with 18-inch bell.

Sound-Box—Improved type attached to swinging taper tone-arm.

Taper Tone-Arm—Aluminum, resists echo.

No. 10—FULTON, w't 23 lbs.....each $27.00

This attractive talking machine is made of hard wood well finished, and presents a good appearance. The motor is especially well made, and will run absolutely uniform in speed necessary to obtain the best results. Machine has the very best quality of sound-box, fine floral horn, and is first class in every respect.

Cabinet—Golden oak, highly polished. 12-inch base, height 7½ inches.

Turntable—10-inch with polished edge covered with green felt.

Motor—Universal, with two springs which can be wound while running.

Horn—Finished in black and gold, 17 inches long with 19½-inch bell. Horn swings in any direction.

Sound-Box—Improved type attached to swinging taper tone-arm.

Taper Tone-Arm—Finished in black enamel. Swing arm and elbow highly nickeled.

No. 25—CLIMAX, complete with 100 needles and needle box, w't 23 lbs.....each $30.00

This is a high class machine in every respect. The woodwork is very pleasing in design and exceptionally well finished. The motor is the very best quality, carefully tested, has latest made sound-box, and fine floral horn.

Cabinet—Golden oak, highly polished. 14½-inch base, height 7¾ inches.

Turntable—10-inch with polished edge covered with green felt.

Motor—Universal, with two springs which can be wound while running.

Horn—Finished in black and gold, 17 inches long, with 10½-inch bell.

Sound-Box—Improved type attached to swinging taper tone-arm.

Taper Tone-Arm—Finished in black enamel. Swing arm and elbow highly nickeled.

No. 40—CLIMAX, complete with 100 needles and needle box, w't 29 lbs.....each $48.00

This machine is unexcelled by any talking machine made. The motor has three springs, avoiding the necessity of frequent winding. All the parts are very carefully fitted and finished. It also has the latest made sound-box, which reproduces all of the notes on the scale with accuracy and distinctness. The wood horn entirely eliminates the metallic tones and adds much to the beauty of the machine. The cabinet is made in a design obtainable only in high class woodwork, and has a piano finish.

Cabinet—Mahogany, highly polished. 15½-inch base, height 7¾ inches.

Turntable—12-inch with polished edge covered with green felt.

Motor—Universal, with three springs which can be wound while running.

Horn—Wood, Mahogany finished, 19½ inches long, with 22-inch bell.

Sound-Box—Improved type attached to swinging taper tone-arm.

Taper Tone-Arm—Finished in black enamel. Swing arm and elbow highly nickeled.

No. 55—CLIMAX, complete with 100 needles and needle box, w't 29 lbs.....each $66.00

TALKING MACHINES.

FOR ILLUSTRATIONS SEE PAGE 2263.

Climax Talking Machines embody every feature that has made possible the talking machine as it exists to-day—the ideal, ever-ready, all-around musical instrument and entertainer as distinguished from the interesting toy which, a few years ago, was all that it could claim to be.

It plays not only Climax Double-Disc records, but all other disc records made.

The Climax Talking Machine is perfect musically and mechanically. Whatever is in the record the Climax Talking Machine will bring out of it—from the simplest band music to the most difficult renditions of the great operatic artists.

In a talking machine reproduction, everything depends on absolute uniformity of speed. Only a mechanical expert could, upon mere examination of the construction, fully appreciate the certainty and accuracy of the Climax motor and the simplicity of the whole device. But the effect of this motor-efficiency is evident to anyone who will take the trouble to watch a Climax talking machine in operation—not only listening to the music and noting the entire absence of any waviness in the reproduction, but also, when the machine is running without a record on the turntable, noting the silence and smoothness of its revolutions.

The Climax reproducer is a perfect device for reproducing record-sound waves. Nothing gets by it—no tone is too heavy to be taken up by its diaphragm and no top note of violin or high soprano is too delicate to be transmitted through its sensitive needle-arm and thrown out in magnified volume through the horn.

TALKING MACHINE RECORDS, CASES, CABINETS, ETC.

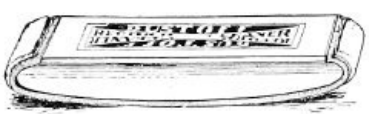
RECORDS.

Climax, double disc, a selection on each side, w't 8 oz.....each $0.78

These records can be played on any disc talking machine. They are made of the best material and are smoother, clearer and last longer than most records.

Only the most popular reproductions are included in our list of records. Send for our complete catalogue of climax records.

RECORD CLEANERS.



Dustoff, covered with high grade velvet carpeting, w't per doz. 2½ lbs., per dozen..... $2.00

Keeps record free from dust, making the reproduction pure and clear, free from harsh sounds caused by the settling of dust in the sound grooves of the records. The soft fine texture and the high nap of the covering accommodates itself to the surfaces of the records.

TALKING MACHINE NEEDLES.

REVONOC—Highest quality steel, oil tempered, 100 in a paper, 1,000 in a package.....per 1,000 $1.00

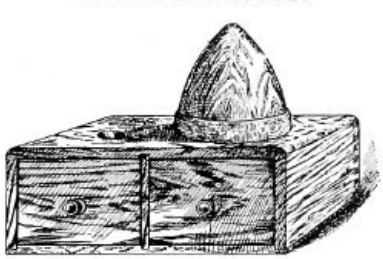
Fibre Needles, large B and H... " 4.80

Fibre Needles, small B and H.. " 6.00

FIBRE NEEDLES 250 IN A PACKAGE.

The split Bamboo Fibre needle is the very latest improvement of the graphophone needle, it is chemically prepared and prevents all possibility of injury to the record, doing away with the scratching, cutting and rasping of the metallic needle.

NEEDLE BOXES.



No. 101—MUSIC MASTER, 4½x2 in., oak or mahogany, complete with cone, w't 6 oz.....each $1.00

There are two drawers, one for a reserve of new needles, and one into which worn needles fall, the cone is for active supply.

The bottom of cone can be removed, cone filled with about 300 needles and bottom replaced. By slowly turning upside down a needle will come out of small end.

WOOD HORNS.

Solid, Plain Highly Finished Surface, with Screw End.

No. 50—MUSIC MASTER, solid mahogany, 21¼ in. bell, w't 2⅜ lbs.....each $18.00

No. 51—MUSIC MASTER, solid oak, otherwise same as No. 50.....each 18.00

No. 52—MUSIC MASTER, solid spruce, otherwise same as No. 50.....each 24.00

No. 53—MUSIC MASTER, solid mahogany, pearl inlaid, otherwise same as No. 50, each..... 56.00

The Music Master Wood Horn is built of solid wood on scientific, sound board principles. It gives a full, round, rich and realistic tone to the record reproduction, rendering all tones in any scale with a fidelity to the original impossible to acquire with the metal or veneered horn.

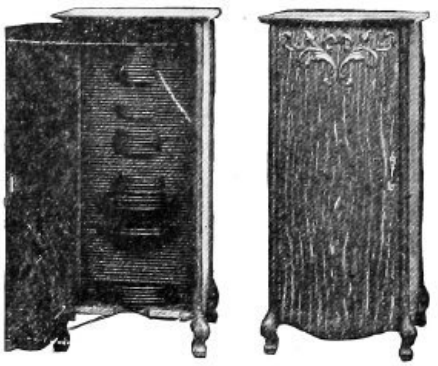
Made for any style or make of disc or cylinder talking machine.

Guaranteed against defect at any time.

DISC RECORD CABINETS.

No. 717—Top 16½x16½ in., height 34 in., made of heavy lumber, with panel door, finished in oak or mahogany, capacity 126 records, w't 50 lbs., each..... $11.40

DISC RECORD CABINETS.



Open. Closed.

No. 780—Top 17x16 in., height 37 in., heavy hardwood construction, heavy columns on corners, fancy shaped feet, hand carving on door, record racks arranged so that record lays flat, one in each compartment, which is indexed, capacity 80 records, cabinet lock and key, finished in oak or mahogany, w't 65 lbs.....each $20.00

Open. Closed.

No. 782—Top 18x18 in., height 37 in., made of massive heavy hardwood, oval front, carved columns, claw feet, finished in oak or mahogany, record racks or compartment arranged so that record lays flat, one in each compartment, which is indexed, enabling one to make selection instantly, furnished with cabinet lock and key, capacity 80 records, w't 75 lbs..each $24.00

DISC RECORD CASES.

Wood, Covered with Imitation Leather, Nickel Corners, Furnished with Lock and Key, Handle on Top.

No. 11—For 50 10 in. records, with index.....each $3.20

FIELD GLASSES, MEGAPHONES, MARBLES, ETC.

FIELD AND MARINE GLASSES.

No. 1100.

"LECLERC," Achromatic, Morocco Covered, Metal Body, Bright Finish, with Case and Strap.

No. 1231—21 lignes, length, closed 5¼ in., extended 6½ in., power 4½ diameters.....each $14.00
No. 1231—24 lignes, length, closed 6 in., extended 7¼ in., power 5 diameters.....each 16.10
No. 1231—26 ligne, length, closed 6¼ in., extended 7½ in., power 5½ diameters.....each 18.30

"LEMAIRE'S," Morocco Covered, Metal Body, Bright Finish, Sole Leather Case and Strap.

No. 1100 —19 lignes, length, closed 4¾ in., extended 6 in., power 5 diameters.....each $19.10
No. 1100 —21 lignes, length, closed 5¼ in., extended 6½ in., power 5¼ diameters.....each 20.60
No. 1100 —24 lignes, length, closed 5¾ in., extended 7¼ in., power 5¾ diameters.....each 24.00
No. 1100 —26 lignes, length, closed 6¼ in., extended 7½ in., power 6 diameters.....each 25.70
No. 1100B—21 lignes, length, closed 5¼ in., extended 6½ in., 12 lenses, power 5½ diameters.....each 29.00
No. 1100B—24 lignes, length, closed 5¾ in., extended 7¼ in., 12 lenses, power 6 diameters.....each 33.70

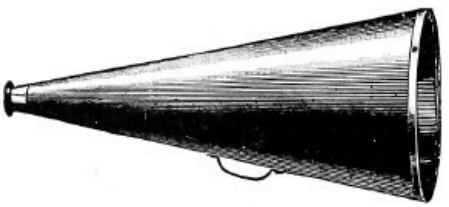
"U. S. CAVALRY," Patent Adjustment, Sun Shades, Case and Strap.

No. 1216—21 lignes, length, closed 5 in., extended 7 in., power 6 times....each $27.10
No. 1216—24 lignes, length, closed 5¼ in., extended 7 in., power 7 times, each..... 33.40

U. S. Cavalry field glasses are constructed with short bodies and long draw tubes, so that while capable of being extended long enough to give the necessary power, they occupy, when closed, a comparatively small compass. They are fitted with a patent adjustment, by means of which they can be always kept at the proper adjustment for the owner's eyes. Having been once adjusted by the screw, as in any ordinary field glass, they can then be closed by simply pushing them together, and when needed, have only to be pulled out, when they are ready for instant use, the adjustment to the eyes having remained undisturbed.

No. 1216, 24 lignes, is recommended as particularly adapted for cavalry and herdsmen.

STENTOR MEGAPHONES.



Waterproof Fibre, Brass Mountings, Nickel Plated Improved Seamless Mouthpiece.

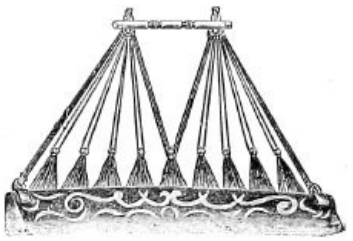
"REV-O-NOC" HAMMOCKS.

REVONOC hammocks represent perfection in construction, design, color combinations and material. The weaving is done by experts and the unique and individual designs and color combinations are the work of artists thoroughly schooled along and experienced in these lines. The result is a line of hammocks that meets the popular taste in all its variations.

The scientific stringing arrangement is another decided improvement. The strings are so arranged as to be strongest and most numerous where the greatest strain is applied. Extra



stringing cords are attached to the spreader ends, and the center cords are double. On all REVONOC hammocks, with divided suspension, a special center pull is arranged for.

Guarantee—REVONOC hammocks are covered with an absolute guarantee. The colors are fast, and each and every thread perfect.

No. 0101.

No. 0081 REVONOC—34x84 in., round pillow and head spreader, gauze weave, three-ply hard-spun yarn, in strong colors, effectively striped, no valance, shipping w't per doz. 45 lbs.....per dozen $15.80

No. 0101 REVONOC—36x84 in., with valance, foot spreader, otherwise same as No. 0081 REVONOC .....per dozen 20.00

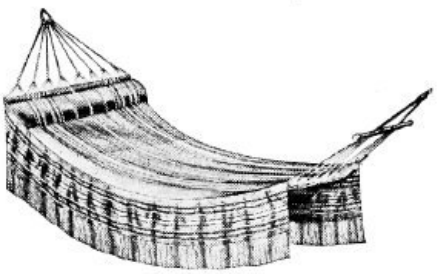
These hammocks are made in three color arrangements. In one the body is green, in another the body is yellow, and in the other the body is maroon.

No. 0111½.

No. 0111½ REVONOC—36 x 84 in., round pillow, foot spreader, plain valance, canvas and twill weave, hard spun yarn, shipping w't per doz. 47 lbs., per dozen $21.00

No. 0121 REVONOC—With large tufted throw-back pillow, otherwise same as No. 0111½ REVONOC .....per dozen 24.00

Made in three combinations: red body with green, black and yellow stripes; yellow body with stripes and green body with stripes.



No. 0122.

No. 0102 REVONOC—34x80 in., round pillow, full color, striped, open weave, heavy five ply yarn, heavy fringe, no valance, shipping w't per doz. 33 lbs., per dozen $20.00

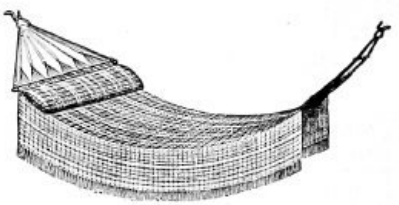
No. 0122 REVONOC—35x84 in., with valance, otherwise same as No. 0102 REVONOC, shipping w't per doz. 38 lbs. per dozen 24.00

Made in one pattern only: a rich red striped with green and black.

No. 0152 REVONOC—35x84 in., with big pillow and wide valance, otherwise same as No. 0102 REVONOC, shipping w't per doz. 56 lbs. .....per dozen 28.00

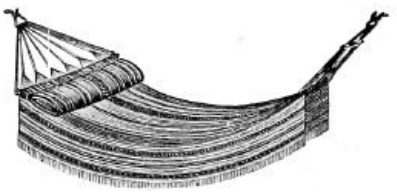
Made in three colors: one with red, another with green, and the other with tan predominating.

No. 0111 REVONOC—36x84 in., with large, tufted pillow, foot spreader finished with nickeled brass caps, wide valance, close canvas damask weave, broad striped pattern, hard spun yarn, assorted colors, black, green, drab and yellow, w't per doz. 47 lbs., per dozen $22.40



No. 0131 REVONOC—36x86 in., large tufted throw-back pillow, foot spreader, with nickeled, brass caps at ends, wide valance, effectively striped in rich colors, red predominating, shipping w't per doz. 48 lbs..... per dozen $28.00

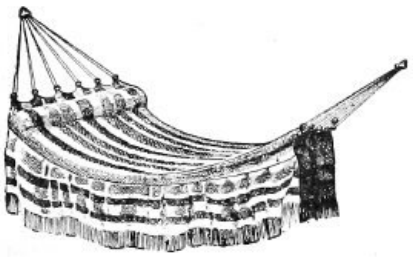
No. 0131½ REVONOC—Green predominating, otherwise same as No. 0131 REVONOC, per dozen 28.00



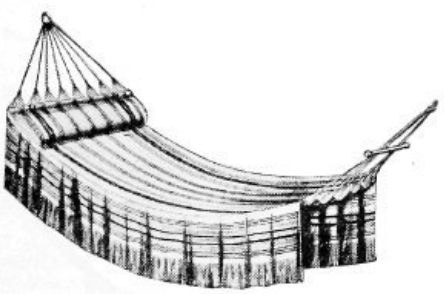
No. 0151 REVONOC—36 x 86 in., canvas weave, effectively striped, red the predominating color, large tufted throw-back pillow, foot spreader, deep valance, shipping w't per doz. 55 lbs., per dozen..... $32.00

No. 0161 REVONOC—36x88 in., tan predominating, otherwise same as No. 0151 REVONOC .....per dozen 32.00

"REV-O-NOC" HAMMOCKS.



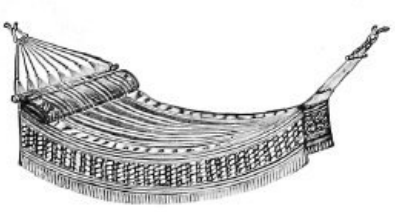
No. 0154 REV-O-NOC—34x78 in., ornamental canvas weave, very attractive design in assorted colors, with either red, black or white predominating, pillow spreader and valance, shipping w't per doz. 52 lbs.....per dozen $27.00



No. 0162 REV-O-NOC—35x86 in., concealed straight wooden spreader, with highly polished nickel caps, wood bar at foot, deep valance, red and green predominating colors, striped design, shipping w't per doz. 51 lbs....per dozen $30.40

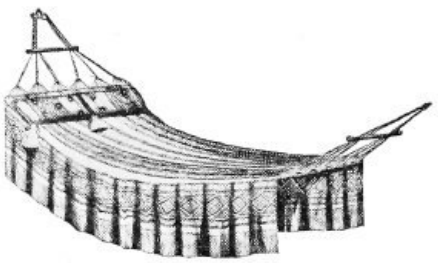
No. 0181 REV-O-NOC—36x88 in., jacquard and canvas weave, large tufted throw-back pillow, fancy tassel trimmings, foot spreader with nickeled brass caps, wide valance, oriental design, red predominating, shipping w't per doz. 56 lbs.....per dozen $36.00

This is fitted with a patent hammock ring which makes it unnecessary to tie any knots when hanging the hammock.

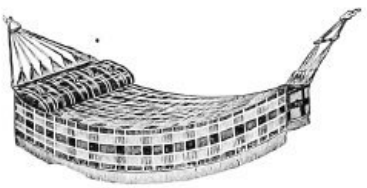


No. 0201 REV-O-NOC—37x88 in., large tufted throw-back pillow, fancy tassel trimmings, foot spreader with nickeled brass caps, wide valance, canvas weave hard spun yarn, fancy design, striping well colored, shipping w't per doz. 60 lbs.....per dozen $40.00

No. 0191 REV-O-NOC—Same as No. 0201, with green the predominating color and a yellow figure, w't per doz. 60 lbs., per dozen..... 40.00



No. 0192 REV-O-NOC—36x86 in., wide upholstered pillow with tassel trimmings, heavy deep valance, fancy detachable wood bars with knobs at head and foot, concealed straight wooden spreader with highly polished nickel caps at ends, jacquard weave closely woven fancy design in red, yellow, black and white, red predominating, shipping w't per doz. 45 lbs.....per dozen $36.80

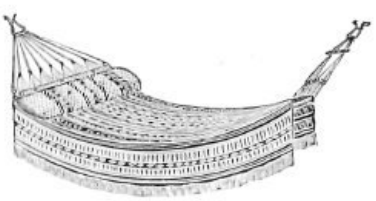


No. 0201½ REV-O-NOC—37x88 in., large tufted throw-back pillow, fancy tassel trimmings, foot spreader with nickeled brass caps and wide valance, canvas weave, hard spun yarn, assorted colors in plaid design, shipping w't per doz. 63 lbs.....per dozen $36.00

A beauty in a Scotch plaid effect.

No. 0211 REV-O-NOC—37x88 in., large tufted throw-back pillow, fancy tassel trimmings, foot spreader with nickeled brass caps, wide valance, closely woven twill jacquard in a conventional design, well colored, green predominating, shipping w't per doz. 54 lbs., per dozen..... $40.00

Quiet and restful, though rich in design.

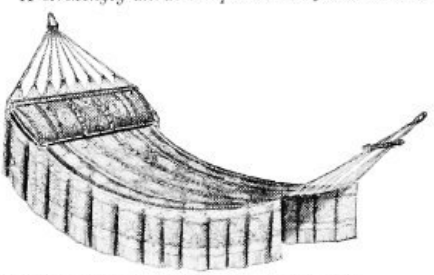


No. 0221 REV-O-NOC—37x88 in., large tufted throw-back pillow, fancy tassel trimmings, foot spreader with nickeled brass caps, wide valance, fancy damask, twill weave in rich coloring, red, green and yellow, shipping w't per doz. 63 lbs.....per dozen $44.00

The small design worked in between the twill stripes imparts richness to the pattern.

No. 0241 REV-O-NOC—38x88 in., large tufted throw-back pillow, fancy tassel trimmings, foot spreader with nickeled brass caps, 15 in. valance, empire design in contrasting colors, jacquard weave, hard spun yarn, shipping w't per doz. 65 lbs.....per dozen $48.00

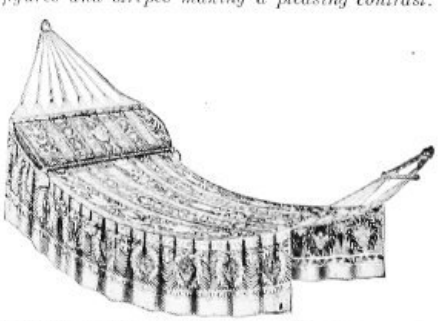
A strikingly attractive pattern in gold and red.



No. 0252 REV-O-NOC—40x88 in., wide upholstered pillow, concealed straight wooden spreader, highly polished nickel caps, fancy detachable wood bar with knobs at foot, heavy deep valance full fluted, heavy close woven jacquard weave, subdued tones of green and brown, shipping w't per doz. 87 lbs.....per dozen $48.00

No. 0251 REV-O-NOC—38x88 in., large tufted throw-back pillow, fancy tassel trimmings, foot spreader with nickeled brass caps, wide valance, black and white figures and stripes, canvas and twill weave, shipping w't per doz. 60 lbs.....per dozen $48.00

A deep black predominates in the color scheme of this beautiful hammock—the white of the figures and stripes making a pleasing contrast.



No. 0242 REV-O-NOC—38x88 in., wide upholstered pillow, concealed straight wooden spreader, highly polished nickel caps, fancy detachable wood bar with knobs at foot, heavy deep valance, fancy scroll jacquard weave, green and yellow predominating colors in attractive stripe and figured design, shipping w't per doz. 57 lbs. per dozen **$48.00**

A color scheme that will always attract.

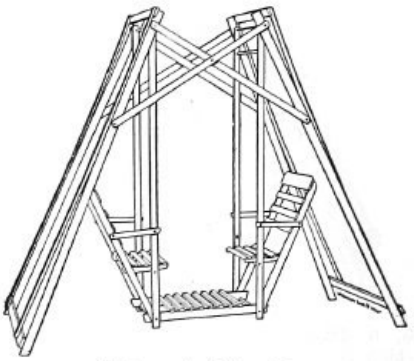
Porch swings are fast becoming very popular, and our line is made with an idea to furnish a swing that will give entire satisfaction. They are finished both in rich green and mission. When ordering, state the finished desired to avoid delay.

LAWN SWINGS.



Factory, Anniston, Ala.

No. 30—DIXIE, 4-passenger, half bolted, 8 ft. high, 30 in. seat, w't crated, 90 lbs.★.....each $7.00

This swing is half bolted, and is constructed to withstand hard usage. The bracing, including the horizontal brace, makes the swing very firm and no lateral motion. The material used is first class, painted in bright red and a coat of coach varnish.

Factory, Hopkinsville, Ky.

No. 35—CRUSO, 4 passenger, 8 ft. high, 27 in. seat, w't 125 lbs.★.....each $8.00

Our "Cruso" is a full bolted swing throughout. The strength of the derrick in this swing admits of making the hangers extra long, thus giving the swing a long pendulum, and consequently a long oscillating reach, which is a big advantage in a swing.

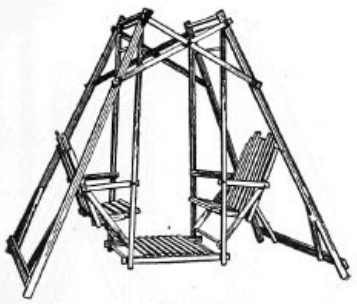
Factory, Kansas City, Mo.

No. 36—MONARCH, 4 passenger, made of selected material throughout, a strictly high grade swing, 8½ ft. high, seat 27 in. wide, w't about 136 lbs.★ each..... $11.00

★*FOR SHIPMENT FROM FACTORY ONLY.*

LAWN SWINGS.

REVO-NOC



No. 0 REVO-NOC — 4 passenger, 8½ ft. high, 25 in. seat, half bolted, hardwood construction throughout, outer frame parts painted a durable and handsome red, the inner parts are natural finish weathered oak, full length, back slats, malleable hooks on swing bars, seat and foot rest adjustments, carried in stock, w't crated 110 lbs.....each $8.00

The materials used in the construction of our line of "Rev-o-noc" lawn swings are the best that money can produce.

They are well finished and carefully fitted. The contrast between the red outer parts and the oak inner frame give these swings a very attractive and artistic appearance.

AJAX.

Factory, Goshen, Ind.

No. 1—2 passenger, 8½ ft. high, 22 in. seat, w't 90 lbs. ★.....each $ 5.00
No. 2—4 passenger, 8½ ft. high, 32 in. seat, w't 100 lbs. ★.....each 6.50
No. 3—4 passenger, full bolted, extra strong, 8½ ft. high, 34 in. seat, w't 110 lbs. ★.....each 8.00
No. 4—Full bolted park swing, 10 ft. high, 36 in. seat, w't 120 lbs. ★..each 15.00

All Ajax swings are constructed of selected hardwood, built on correct mechanical principles, and braced at every point. Seats are deep, wide and commodious, and have a good head rest. Hangers are so built, being hung from top point of frames, that you get full benefit of oscillation. Slats in footboard are extra solid and close enough so that a child cannot get his foot between the slats. All frames are finished in glossy bright vermilion, hangers and foot board natural finish and protected by coach varnish finish.

KALAMAZOO.

Factory, Kalamazoo, Mich.

No. 66—2 passenger, 8½ ft. high, 9 ft. spread, 19 in. seat, w't about 120 lbs. ★.....each $10.50
No. 65—4 passenger, 9½ ft. high, 10 ft. spread, 30 in. seat, folding seat and adjustable back, w't about 180 lbs., ★ each..... 13.00
No. 67—4 passenger, 9½ ft. high, 10 ft. spread, 30 in. folding seat, adjustable back, 6×13 ft. awning with scalloped curtain drop, w't about 200 lbs. ★ each..... 24.00

The swing frame and seats are finished in natural wood, with two coats of varnish. Backs of seats are adjustable to different positions, seat and back strips have oval corners, round ends and are heavy enough to stand all strains placed upon them. The swing frame itself is hung with heavy steel hooks from special one-half inch joint bolts.

There is not one weak point or slighted part about them.

RED STAR.

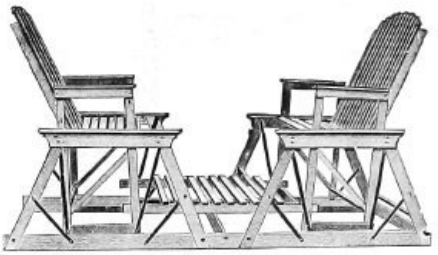
Factory, Batavia, Ills.

No. 25—Galvanized steel, 4 passenger, 9 ft. high, 36 in. seat, with awning, w't packed for shipment 190 lbs. ★..each $20.00
No. 20—Without awning, otherwise same as No. 25★.....each 15.00

The Red Star galvanized steel lawn swing is made of high carbon steel, and is thoroughly galvanized after all cutting and punching is done. The galvanizing protects it against rust and makes a finish that will last forever.

The frames of the seats and platform are angle steel, to which painted wood slats are fastened.

E-Z GLIDER.



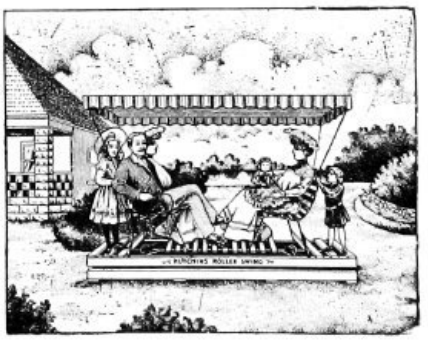
Factory, Goshen, Ind.

No. 60—4 passenger, length of base 6 ft. 10 in., seats 32 in. wide, and 17 in. deep, hardwood construction, finished in weathered oak, steel roller arms with roller rod bearings, extreme length of swing 3 ft. 4 in., w't 125 lbs. ★..each $15.00

The E-Z glider is simple in construction, and maintains a perfect gliding level motion, the full length of the base.

It has reclining and adjustable chair backs; foot rest adjust to two heights, which can be removed and hung level with seats to form hammock or gliding bed.

HUTCHINS.



Factory, Alton, Ills.

No. 70—Roller, w't 160 lbs.★.....each $13.00

Extras.

Canopies, w't 17 lbs.★.....each $3.20
Fan Attachments, w't 10 lbs.★..... " 3.20
Hammock Attachments, w't 35 lbs.★ " 3.20

The swing is constructed of oak and yellow pine and the finest of steel and handsomely painted in red and black. Is 53 in. wide and 8 ft. long (requires 12 ft. of room).

The foot platform which is hung on four flanged wheels riding lower platform with short concave tracks on each end, allows upper platform carrying the seats to move 2 ft. each way by the slightest pressure of the feet.

FLAGS AND PENNANTS.

UNITED STATES FLAGS.

BEST WOOL BUNTING.

The best finished and strongest wool bunting flag ever offered to the trade. Seams all double stitched; hems made with interlining of strong tape. Small sizes finished with canvas heading and grommets. Large sizes, from a 10x15-foot flag, with strong canvas heading and manila rope. Full complement of stars (now 46) sewed on both sides of the field, with the exception of the two smallest sized flags, which have 13 stars.

SEWED COTTON BUNTING.

Fine Fast Color, Guaranteed to Launder.

Small sizes with canvas heading and grommets. Large sizes from 10x15 feet with strong canvas heading and rope. These flags are made with the same care and finish as our all-wool bunting flags, and for outside decorations are more serviceable than the latter. All flags, with the exception of the two smallest sizes, which have 13 stars, have the full complement of stars (now 46) sewed on both sides.
